## Cimar Electric Guitars & Bass

The Cimar electric guitars deliver you simplicity of design and quality of performance at an incredible price.

Three singles (2070) were designed for high energy out put, two humbuckers (2071) pour out a thick, rich tone and plenty out put and two singles (2072) are for a warm punch bass tone.

These active pickups are mounted on mahogany body for their colorful talents.

## Cimar Folk & Classic Guitars

The Cimar acoustic guitar is an outstanding value when compared to any other guitar in its price range. While relatively low price, the quality is equal to many guitars costing much more.

All Cimar acoustics feature spruce top that is hand braced for the best possible tone and projection. The bracing on Cimar guitars are carefully shaved piece by piece by skilled craftsmen. Originally, the edge of guitar bracing were sharp. But the brace on the Cimar guitars are rounded off to aid in producing maximum freedom of vibration from a limited body. And the Cimar guitar has a distinctive designed headstock which not only has a beautiful appearance but also provides rich tone quality and good sustain. From the first moment you pick up a Cimar acoustic, you can see why they are at the head of their class.

### D310
