IC SERIES

ICEMAN II

The Iceman II has been a rock and roll favorite in the Ibanez line year in and year out. Its sleek, futuristic shape and always-hot pickup arrangements has been seen rocking on concert stages with many famous professional players. The newest modification to the Iceman is the use of our awesome V2 pickup in the treble position for screaming output and a Super 58 for clear and clean lows in the fingerboard position. The new IC400 features a bookmatched flamed maple top in a brilliant cherry sunburst finish.

DT SERIES

DESTROYER II

Last year we re-introduced the Destroyer II Series by popular demand. The updated Destroyer II became an even bigger hit than its predecessor. The bold and aggressive shape has tremendous sustaining power and a fullness of sound unlike any other instrument. Power chords have real power and searing leads flow as fast and as hot as you can handle them. The V2/bridge and Super 58 fingerboard pick combination give you enough versatility to rock and roll any way you like.

ROCKET ROLL II

Here's another re-introduction you've been clamoring for. Definitely not a folksinger's guitar, the Rocket Roll II is rock and roll, all the way. Two versions of the new Rocket Roll II are available. The RR50 in a fiery metallic red and the RR400 features a bound body with a bookmatched flamed maple top and cherry sunburst finish. Both Rocket Roll II's feature a roaring V2 pickup in the bridge position and a smooth and clean Super 58 in the fingerboard position. The two volume controls and master tone controls sound best set where they should be - wide open!
