### RR550/RR150

If you're looking for a guitar to put the excitement back in your stage presence, then the Ibanez Rocket Roll is your instrument. The new Rocket Roll models are bolder and sleeker than ever and for the first time in their history offer a choice of two tremolo systems — the Ibanez Standard or "Hard Rocker Pro" Both the RR550 and RR150 are equipped with Smooth Tuner II machine Heads, Dead End strap pins and Sure Grip II control knobs. The RR550 features a bound body with a book-matched Flamed Maple top finished in Cherry Sunburst. Super 5B pickups in the fretboard position and blazing hot V2 pickups in the treble position give the RR550 more than enough power for high energy Rock and Roll. Top all this off with the Ibanez "Hard Rocker Pro" tremolo system and you've got one mean axe.

The RR150 features a Burgandy finished body with a single ply of cream binding. Other features include an extra smooth, fast playing, one piece Rock Maple neck and a sizzling V2 pickup in the treble position for the ultimate in "hard-edged" sound.

### DT500/DT150

The Ibanez Destroyer has long been a proven favorite among legions of dedicated Rock and Rollers. Its highly stylized body and advanced electronics provide the ultimate in playing comfort and all out raw rock sound. The new 1983 Destroyers offer the latest in Ibanez innovations along with the most desirable "traditional" features found in many of our other models.

The DT500 is the ideal marriage between modern technology and old time craftsmanship. The body is crafted of fine Basswood, topped with book-matched Flamed Maple, finished in Cherry Sunburst and bound in cream. The DT500's art in neck is constructed of three plies of Maple and features a Rosewood fingerboard for excellent playing ease. Super 5B and V2 pickups qualify the DT500 as a veritable Rock and Roll weapon. Also featured is the newly developed Ibanez Short Stop bridge/tailpiece, adding even more power to the DT500's already tremendous sustaining power.

The DT150 features a one piece Rock Maple neck bolted on to a lightweight Birch/Basswood body finished in Fire Red. Scorching hot V2 pickups in the treble position plus the inclusion of an Ibanez standard tremolo system make the DT150 the axe for the '80s.

## DT600

Due to an ever increasing demand for a bass that really looks like Rock and Roll, Ibanez now offers the Destroyer Bass. Equipped with many of the same features of the Destroyer guitar, the DT600 Bass is sure to move you from side line to center spotlight as soon as you take the stage. The DT600's lightweight Birch/Basswood body is superbly balanced for extra playing comfort even after hours of intense playing. A custom designed 32" scale neck, Super P4 pickups, Hercules B machine heads, plus Sure Grip II control knobs make the DT600 an absolute must for today's discern rocker.
