A X S T A R

Axstar series guitars feature a light body and a unique body shape. The body of the Axstar guitar is contoured to fit the player's body for maximum comfort and playability. Available Axstar models are: the AX 30 with 2 humbucking pickups, the AX 35 with 2 single and 1 humbucking pickups, and the AX 38 with 1 single and 2 humbucking pickups. All Axstar models have a 22 fret, flat-radius rosewood fingerboard, Big Frets, and a black gloss finished neck with black plated parts. Axstar also features the Hard Rocker Pro string lock tremolo system. Axstar by Ibanez.

FEATURES

AX38WH

BODY

Extremely light and slim, the Axstar body is designed with a special contour to fit the player's body.

PICKUP CONFIGURATION

The AX35 and AX38 offers unique pickup-combination settings. The front and rear pickups can be controlled with the toggle switch and the center pickup can be controlled with the center pickup volume control.

22 FRET ROSEWOOD FINGERBOARD

The Flat-Radius Rosewood Fingerboard of the Axstar guitar offers a wide variety of options when you set up the string height. This enables you to play the guitar easily even when the strings are set at a low string height.

HARD ROCKER PRO

The Hard Rocker Pro Tremolo unit features a string lock system that allows the strings to be changed easily, yet keeps the instrument in tune. This tremolo system utilizes round pivot surfaces for smooth operation. Two studs are used for the bridge height adjustment. Your favorite arming action can be set using the saddle height adjustment screws while leaving the string height adjustment unchanged. The Hard Rocker Pro Tremolo System comes with a black plated finish.
