Prestige

combine the right selection of rich tones, collector's class looks, and the extreme durability and playability needed by the touring pro. These are some of the finest performance instruments we've ever made.

Prestige guitars and basses are the result of extensive work by our luthiers and designers in Sun Valley, California and Nagoya, Japan. By making, modifying and maintaining instruments for our esteemed group of Ibanez artists, our luthiers and designers have come to a unique understanding of the stylistic, recording and performing needs of today's guitarists. The ideas and inspiration from that work, the imagination of our designers, and the finest materials and electronics available are what set Prestige instruments apart from anything else you can own.

Rg Prestige

These are the machines of the gods...with drop dead good looks, sonic lethality and the devastating power and control of a precision double-locking trem. RG Prestige guitars feature flawless Japanese craftsmanship, the finest materials and each axe is perfectly matched with just the right choice of DiMarzio[®], Seymour Duncan[™], EMG[™], or IBZ pickups.

The bASics

- The ultimate in the ultimate metal guitars.
- Six-, seven-, and new for 2007, the first RG eight-string.
- Fast, flat and thin Wizard necks with Prestige finishing for supreme comfort.
- Gotoh[™] precision machines.
- Includes deluxe Prestige case.

RGT320Q WRS

- 5pc Wizard Maple/Wenge neck-thru *Z3055p*
- AAA Quilted Maple top /Mahogany wing body
- Jumbo frets
- Edge Pro bridge
- DiMarzio[®] IBZ-N (H) neck pu
- DiMarzio[®] IBZ-B (H) bridge pu
- color : RBB, WRS

RGT320Q RBB

- 5pc Wizard Maple/Wenge neck-thru *Z3055p*
- AAA Quilted Maple top /Mahogany wing body
- Jumbo frets
- Edge Pro bridge
- DiMarzio[®] IBZ-N (H) neck pu
- DiMarzio[®] IBZ-B (H) bridge pu
- color : RBB, WRS

RGT220A NTF

- 5pc Wizard Maple/Wenge neck-thru *Z3055p*
- Ash wing body
- Jumbo frets
- Edge Pro bridge
- DiMarzio[®] IBZ-N (H) neck pu
- DiMarzio[®] IBZ-B (H) bridge pu
- color : NTF

The Edge Pro features a unique Sound Metal Chip on each saddle which helps to increase sustain right at the most critical area, the intonation point.

The 5pc thru-body neck on RGT Prestige models offers massive sustain, easy playability at the upper frets, and incredible strength and stability.

DiMarzio[®] IBZ Pickups on RGT220A.

- FX EDGE III-8
- EMG® 808 neck pu
- EMG® 808 bridge pu
- color : GK

Special textured "Suede Black" finish of RG1570-SDB.

Double Edge Pro Tremolo on RG1820X
The Double Edge Pro allows brilliant acoustic-style tones, which can also be blended with electric tones. Piezos by L.R. Baggs® are isolated to eliminate palm noise and a 2-band EQ on the piezo output provides added tone control.

The Edge Pro tremolo on the RG1520 is GK compatible, which allows access to Roland's GK effects and midi control. Isolated piezo elements offer superior tracking for controlling midi devices.

Ibanez FX EDGE III-8 double-locking fixed bridge was made specifically to handle and augment the awesome extended range of the RG2228GK 8-string.

The U.S.A.-made EMG® 808 active pickups—the first ever full-production 8-string pickups.

RGA Prestige

Our RGA Prestige feature everything our RG Prestige models do. The highest Japanese craftsmanship, the right choice of premium pickups and Wizard Prestige necks. With two important exceptions: arched tops for even more playing comfort and the Gibraltar Plus fixed bridge which combines simplicity and the ability to handle massive metal tones and lowdown tuning that's just plain sick.

The Basics

- Fast, flat and thin Wizard necks with Prestige finishing for supreme comfort.
- Massive Gibraltar Plus fixed bridge allows wide range of intonation adjustment needed for heavy strings.
- Gotoh® precision machines.
- Includes deluxe Prestige case.

RGA321F SPB

- 5pc Wizard Maple / Walnut neck *23.5mm*

DiMarzio® IBZ pickups on RGA321F SPB.

The brilliant highs and looks of a 16mm arched maple top guarantee visual and sonic attention from the front row to the back of the balcony.

Gibraltar Plus bridge on RGA121H-CDO.

Bridges

In the last two decades, no other guitar maker has done so much to advance the art and science of the bridge. The Edge Pro, Edge III and Gibraltar Plus represent significant advances in the evolution of the guitar bridge.

Edge Pro

The Edge Pro features a unique Sound Metal Chip on each saddle which help increase sustain right at the most critical area, the intonation point.

To avoid the problem of string holder blocks getting lost during string changes, the Edge Pro's sliding string holders are actually part of the bridge and won't drop from the saddle unit. With the Edge Pro design, there's no need to cut off the ball of your strings when installing new strings.

Edge III

The new Edge III is similar in construction and feel to the original Edge locking trem, however it also features lower profile fine-tuners inspired by the Lo-Pro Edge and massive new-design saddles.

Gibraltar Plus

A massive metal sound requires a massive metal bridge. The Gibraltar Plus combines the smooth surfaced Gibraltar III bridge with the Quik Change tailpiece – in one unit. The Gibraltar Plus allows a wide range of intonation adjustment needed for heavy gauge strings. In addition, the saddles won't fall out during string changes.

For two decades, the RG has reigned as the unquestioned monarch of metal guitars. Why? Because the RG has the perfect combination of fast, flat necks, the right pickups and pickup placement, and precision trem systems to mete out creative destruction. And because the RG has evolved and expanded along with the metal genre it was designed for. Which is why the 2007 RG line offers a vast selection that dwarfs anything else remotely comparable.

The bASics

- Double-locking trem systems allow radical effects and sonic chaos with total tuning stability.
- 24-fret thin Wizard II necks in bolt-on and neck-thru versions.

RGR320EX RBK

- 3pc Wizard II neck

- Edge III bridge
- INF3 (H) neck pu
- INF4 (H) bridge pu
- color : AM, TG, TL

The RGR320EX is equipped with pickups custom designed by EMG®.

The increased sustain and playability provided by neck-thru construction have made RGT models some of the highest demand models in the history of the RG.

RG300 Series models feature Infinity 3 and 4 pickups for more bite and chunk and balanced string output.

Edge III tremolo design provides even more stability and strength under the most demanding playing conditions.

GRG

You deserve better. That's why, whether you're a beginner, on a budget, or a working stiff looking for a good backup axe, you shouldn't settle for some famous name's second line guitar that isn't good enough for them to put their famous name on. Ibanez GRG guitars feature the same set-up standards as our most expensive instruments. Which explains why we proudly put the name "Ibanez" (not "by Ibanez") on the headstock.

GRG170DX SL

- AH7-2 (H) bridge pu
- color : BK

The RGR321EX is equipped with pickups custom designed by EMG®.

Fixed bridge with thru-body stringing provides tighter string tension, simplicity and increased sustain.

S

Our sleek S was a revolt against the traditional mahogany guitars of its time that were usually heavy, bulky and uncomfortable. Obviously it was a successful revolt as the S is celebrating its 20th Anniversary with a wider selection of models than ever. Originally the S was designed as an all-round guitar. Now, however, the S now finds its largest number of adherents among the practitioners of the more extreme forms of metal who appreciate the S for its unique combination of fat mahogany tone and sustain with light weight and comfort.

The basics

- Heavy mahogany tone without the heavy mahogany weight.
- Thin around the edges for comfort. Fat around the pickups and bridge for tone.
- Back by rapid demand, the S 7-string returns.
- S Prestige model features U.S.A.-made DiMarzio® pickups, 5pc neck with Prestige finishing for increased playing comfort, Gotoh® precision machines and deluxe Prestige case.

S4170AB RVK

ZERO RESISTANCE tremolo

ZR tremolo (Zero Resistance)

The ZR tremolo with the ZPS successfully addresses the inherent drawbacks in traditional locking trem systems. Thanks to the unique ball-bearing mechanism, action and feel are incredibly smooth. The Zero Point System returns the tremolo to the center position (zero point). This system offers ease of tuning, tuning stability and the ability to keep playing even after a string is broken.

ZPS (Zero Point System)

No friction points make the ZPS the smoothest Ibanez Back Stop ever. An additional outer pair of springs provides easier tuning and better tuning stability than the traditional floating tremolo—plus the other strings will remain in tune if a string breaks.

The ZR tremolo may be the most significant advance in locking tremolos since the first locking tremolo. Most floating tremolos use a knife-edge system, but the ZR tremolo uses a ball-bearing based system for precision and friction-free smooth action.

**Ball-Bearing Pivot**

Smoother than smooth. The ZR tremolo's ball-bearing pivot system allows ultra-smooth arm control. The pivot's precision movement virtually guarantees tuning stability. In the floating position, you can really feel the exceptional smoothness and durability of this significant advance in tremolo technology. U.S. PAT No. 6,710,235

Intonation Adjustment Tool

Just unscrew the built-in intonation adjustment tool from the base and screw it into the bottom of each saddle for quick adjustments. U.S. PAT No. 6,867,354

**Arm Torque and Height Adjustment**

Arm torque is easily tightened or loosened by turning the arm-holder adjustment screw. The arm height can be adjusted by spinning the arm clockwise or counterclockwise. No matter what the setting, the arm always feels secure. U.S. PAT PENDING

Manually Adjustable Spring System

Spring tension can be quickly set by thumb. There's no need for a hex wrench.

**Switchable To Floating Trem**

One of the best ZPS features! Just remove the stop bar and the ZPS easily changes to floating trem operation.

SZ Prestige

The powerful SZ is a relatively recent offshoot of the Ibanez S family. Like the S, the SZ is mahogany and sized perfectly for performance. But the SZ is thicker for even more screaming fat mahogany tone and its 25.1" has a different feel than the 25.5" scale of the S. And if the SZ is ever so slightly heavier in weight, its shaped contours make up for any difference with a physical comfort that's almost obscene.

The bASics

- Fat and full mahogany tone.
- Set-in necks for more sustain and comfort.
- SZ Prestige model features U.S.A.-made pickups, 5pc neck with Prestige finishing for increased playing comfort, Gotoh® precision machines and deluxe Prestige case.
- Graduated string post heights and thru-body stringing provide equalized string tension and precise articulation and great playing feel in SZ300 and 500 series models.
- Affordable GSZ bolt-neck models offer SZ neck scale and body style with the same set-up.

- DiMarzio™ D Activator™ (H) bridge pu
- color : RCM

Ever since the Iceman outraged the more musically conservative among us, Ibanez has been possessed by the urge to create radical body shapes. In 2007, we've got more than ever before with new and different forms of the X designs as well as new shapes and colors not of this earth.

The Basics

- The new "Xiphos" XPT700 model features all-new Ibanez X-shape with neck thru construction powered by DiMarzio's D Activator™ pickups.
- Arondite ADD, ADC and ADX models offer the classic combination of mahogany body, set-in neck and humbucking pickups at way below the expected bucks.

XPT model is equipped with DiMarzio™ D Activator™ pickups.

ADC/ADD/ADX models feature a set-in neck for fatter tones and increased playability.

VK pickups mounted on ADC/ADD/ADX models feature alnico V bar polepieces, which provide high output, yet offer clarity in the high end.

Body binding on ADX120.

MBM

matt bachand
shadows fall

"My main focus of my signature model was to obtain maximum tone with the flexibility to be applied to all styles of music. Stripping it down to the basics without all the extra knobs and switches helped me obtain that, as well as using quality materials to withstand the punishing touring lifestyle. Razor tight rhythm tones and full bodied clean tones from the EMG pickups make it the ideal choice for a rock and metal guitar."

- EMG® 60 (H) neck pu
- EMG® 81 (H) bridge pu
- color : BK

The Basics

- Arched top and Wizard neck with Prestige finishing for supreme comfort.
- Massive Gibraltar Plus fixed bridge allows wide range of intonation adjustment needed for heavy strings.
- Gotoh® precision machines.
- Includes deluxe Prestige case.

MTM1 BR

- 5pc Wizard II Maple /Walnut neck-thru
- Mahogany body
- Jumbo frets
- Fixed Edge bridge
- EMG® 60 (H) neck pu
- EMG® 81 (H) bridge pu

MTM2 BK

- 5pc Wizard II Maple /Walnut neck
- Mahogany body
- Jumbo frets
- Fixed Edge III bridge
- V7 (H) neck pu
- V8 (H) bridge pu
- color : BK

The Basics

- Designed with Mick Thomson specifically for heavy rock and metal.
- Mick Thomson's choice of U.S.A.-made original EMG® pickups in the MTM1.
- Fixed Edge bridge offers double-locking stability with fixed bridge simplicity and sustain.
- Factory equipped with heavy strings tuned to D# tuning with a dropped B : (low to high) B-A-B-E-B'-E'.
- 5pc thru-neck and mahogany body pump out full, fat tone with strong sustain.
- New MTM2 offers the Mick Thomson signature design in a powerful, more affordable package.

mTm

mick thomson
slipknot

"The combination of mahogany, maple, and rosewood with a massive fixed-bridge and EMG pickups make the MTM1 sound absolutely huge. The MTM2 is likely the biggest sounding bolt-on guitar you can find. It's based on the same principals as my custom stage guitars: mahogany, maple and a very dense fixed bridge to make chords huge and sustain seemingly forever. The IBZ pickups have rich harmonics and the gain required to handle both crushing and singing."

APEX1 BBK

- 5pc APEX Maple /Wenge neck *Prestige*
- Mahogany body
- Jumbo frets
- Edge Pro 7 bridge w/U-bar
- DiMarzio® Paf 7® (H) neck pu
- DiMarzio® Paf 7® (H) bridge pu
- color : BBK

The Basics

- Ibanez has more experience with solid-body 7-strings than any other guitar maker.
- U.S.A. made DiMarzio® PAF-7 pickups designed specifically for the extended 7-string range.
- The right bridge and nut spacing is why Ibanez 7-string guitar necks feel like guitar necks—not like bats. Transition from 6- to 7-string playing techniques is effortless.
- APEX features D-A-F-C-G-D-A factory-tuning (from 1st to 7th) for Korn's signature low-end crunch.
- Unique U-Bar designed by Munky allows palming the bridge to get tremolo effects without palming the fine tuners. Attached to the Ibanez Edge Pro, the U-Bar System can be removed and replaced with a standard arm.

munky korn

APEX

"After years of touring, I finally found a guitar worthy of becoming my main guitar. Now this guitar is available to everybody as the APEX1 Custom. The APEX2 Standard is a simpler version, but with the same wide tonal range and the durability you need to withstand the rigors of the road."

APEX2 GSF

- 5pc Wizard II-7 Maple /Walnut neck
- Mahogany body
- Jumbo frets
- Tone Pros® 7 bridge
- DiMarzio® Paf 7® (H) neck pu
- DiMarzio® Paf 7® (H) bridge pu
- color : GSF

JS Joe satriani

"I wanted a guitar with a modern sound, but with a vintage feel, with smaller frets and more radius on the fingerboard. It had to be subtle enough to catch nuances, fast and easy to play."

THE bASics

- Multi-radius Prestige neck (JS1000/JS1200) is an exact digital rendering of the neck on Joe's favorite axe.
- Lightweight aerofoil shaped basswood body provides comfort, upper fret access and expressive singing tones.
- High pass filter on JS1000 and JS1200 volume pots maintains highs at low volumes.
- Combination of 25.5" inch neck scale and DiMarzio® or Ibanez Axis pickups provides wide dynamic range and versatility.

THE bASics

- Contoured basswood or alder bodies with 24-fret Prestige JEM neck provides easy access to all registers.
- Deep routed tremolo cavities allow pitches to be lowered or raised.
- Vai's choice of specific DiMarzio® pickups for each model and combined with Ibanez Split-5 wiring provide incredible tonal versatility.
- Steve Vai's Universe—the guitar that ignited 7-string revolution—allows almost effortless transition from 6- to 7-string techniques.

JEM/UV Steve vai

"This guitar is so slick, you can hurt yourself if you're not careful."

PGM

paul gilbert

"When I pick up any other brand of guitar I have to think of so many things...the volume knob is wrong; the frets are too small...the body pokes me in the ribs. These are things I don't worry about with my Ibanez."

The Basics

- Fixed bridge offers increased sustain and simplicity.
- Paul's specific choice of different DiMarzio® pickups, HSH configuration and 5-way switching offers the multitude of tones required for his mastery of both speed and style.
- And, of course, Paul Gilbert's signature painted f-holes.

NDM

noodles

the offspring

"Based on the first Ibanez guitar I fell in love with. I'm glad Ibanez brought it back as my new signature model guitar."

The Basics

- Re-creation of the first guitar made for Noodles in 1994 which brought him into the Ibanez fold and became his main axe. Updated at this request with special mirrored Noodles symbol on the pickguard.
- Fixed bridge with steel saddles offers durability, simplicity and strong sustain.
- Ibanez Infinity pickups in hum-sing-hum configuration and Special 5-Way switching pump out a vast assortment of tones.
- Thru-body stringing offers improved articulation with greater sustain.

mMM

mike mushok

staind

"I get better tuning and articulation with fuller tone than I could ever achieve with a standard guitar, no matter what I play."

The Basics

- Matte finished mahogany body and thru-neck provide gargantuan tone and sustain.
- 28" scale baritone neck offers the ability to achieve all kinds of low tunings. Factory tuning is B'-F-D'-A'-E'-B' (from 1st to 6th).
- Super 58 pickups custom-wound for baritone.
- Tuning machines feature low string posts for higher tension off the nut.
- Thru-body stringing augments the MMM1's strong sustain and superior articulation.
- Massive Gibraltar Custom bridge, allows radical intonation adjustments and augments the MMM1's great sustain.

For over 30 years, the classic Artist design has provided a real, high quality alternative to "the other famous mahogany double humbucker." The more recent ARC, ARX and the new 2007 ART single cutaway offer more modern variations on the set-neck theme at unprecedented low prices.

The bASics

- Set-neck construction, superior hardware and warm mahogany tones.
- Ibanez brand name quality with a nearly no-name price tag.

Special fretboard inlay on ARX500/ARX500.

ARC500/ARX500 Artist Custom models feature a smooth neck heel for playing comfort and increased accessibility to the higher frets.

Wood binding on ARC500/ARX500.

Quik Change Ultra tailpiece on the ARC features traditional looks but provides untraditionally quick and accurate fine-tuning adjustments.

Quilted maple top on ARX320.

Arched tops with recessed knobs give the Artist models pro appearance and playing comfort at near generic pricing.

Suffering from too much of too much? Maybe you need a return to the rock and roll basics. Ibanez GAX guitars offer no-frills, raw rock simplicity: two humbuckers, a 3-way switch and double-cutway, crystal cut body—all at simple money.

The Basics

- High output humbuckers, high quality construction and low prices—all with the Ibanez brand name and sound.
- GAX75 features Downshifter for rapid tuning shifts.

Noting like a blast from the past. As long as its got modern tweaks, appointments and consistency

The Basics

- The AR300 is one of the first Ibanez original designs, the affordable double-cutaway alternative to the other famous mahogany double-humbucker.
- The set-neck Iceman with its mahogany/humbucker power is the most easily identifiable radical guitar shape—from any distance.
- We've modified our funky pawnshop inspired Jet King by switching out the original humbucker with a high-out exposed polepiece humbucker for stronger leads. Think '50s Greaser guitar with '70s hotrodding.

The Ibanez Downshifter provides quick access to alternate tunings. The availability of a Downshifter on a guitar in the GAX75's price range is unprecedented.

Retro rocker switches on the JTK2 offer vintage looks but have modern coil splitting capability.

The Quik Change Classic tailpiece on the AR300 features a sustain plate and a three-screw design that eliminates the back and forth movement inherent in traditional two-screw units.

True Duo System

SA2160FM Prestige model features DiMarzio® IBZ pickup with the True Duo system.

One of the most popular designs in Ibanez history, the SA was designed for players who wanted the S combination of lightweight comfort with heavy mahogany tones—but with a flat back. It's also one of the most versatile designs. If you've need to cover a wide range of styles and tones with just one guitar, this is the one guitar.

The Basics

- Comfortable S shape, size and arched top with a standard flat back.
- Combination of mahogany, SAT tremolo and true single and true humbucking tones offers incredible versatility.
- SA2160FM Prestige also features the first U.S.A. made True Duo humbucker, 5pc Prestige neck with special finish for increased playability, Gotoh precision machines and Prestige case.
- Affordable GSA models feature the SA body shape, hi-output pickups, and the same set-up as our most expensive models.

THE BASICS

Players, music store owners and music industry press were stunned by the debut of the affordable Artcores in 2002. Which still didn't prepare them for the unveiling of the Artcore Customs in 2005, truly exquisite guitars that offer patrician specs and tones at plebeian prices. The question "How do you do it?" is literally still being asked.

ARTCORE CUSTOM

Floating Pickups are utilized on the AF105F to eliminate feedback.

Artcore Custom models feature 5pc maple/bubinga neck for extra strength and stability.

Quik Change Ultra tailpiece on AS103 and AWD102 features traditional looks but provides untraditionally quick and accurate fine-tuning adjustments.

THE BASICS

The defining feature of the semi-acoustic guitar is its sustain block (or sound block) into which the pickups are mounted for increased sustain and feedback elimination. The semi-acoustic is one of the most versatile electric guitars and can be found in every genre of popular music from jazz to rock and pop to punk (well, probably not Scandinavian black metal, but you never know).

- depth: 43mm at tail
- color : ATF, TKF

The first knife-edge tremolo designed for semi-acoustic guitar. The ACT eliminates the tremolo cavity on the back of the guitar—there's less space used so there's more tone. Shorter springs use less vibrating room and contribute to a stiffer arm response. Two ways to install the springs offer choice in string and arm tension. And on top of all that the ACT is smooth to the touch and string changes are easy.

The super-thin AGS83B features a 17-fret to the body joint and an extra-deep cutaway that makes it the right choice for players who want to spend more time—with ease and comfort—in the upper regions.

Exquisite Artcore Deluxe inlay utilizes an acrylic block with abalone lines.

The Short Stop III bridge on the AWD83 provides superior playability with a smooth surface and easy string changing.

ARTCORE

THE BASICS

Artcore provides the traditional jazz, rockabilly player and country picker with a vast selection of full-acoustics in both deluxe and standard models. Unlike many so-called "full-acoustics" which feature soundblocks in the body, Ibanez full-acoustic guitars are completely full-hollow for the rich, complex tones you can only get from a true, full-hollow guitar.

GEORGE BENSON

"The GB10's smaller body doesn't have a lot of resonance, but it has a lot of articulation. The notes don't melt together like on softer guitars. It maintains the tone while articulating each note. No other guitar gets that sound."

THE BASICS

- The GB10 debuted in the U.S.A. in Chicago on June 11, 1977. Our longest running artist signature model.
- For 2006, George Benson has ordained the new GB15TR, his first signature model to feature coil-tapping, which allows to add single-coil tone to the array of GB colors.
- Floating pickups, a thicker top and a smaller body reject feedback.
- Pure jazz tone even at rock and roll volumes
- GB200 features full-sized, full-acoustic body and standard pickup installation for more traditional jazz gigs.

GB15 TR

JOHN SCOFIELD

"When Ibanez wanted to reintroduce my original AS200 guitar with the original specs they had to fly me to the Ibanez R&D facility in L.A., where detailed measurements were taken of every conceivable dimension. This became the basis for the JSM John Scofield Model, which reproduced the original guitar plus added some improvements such as a side-mounted jack."

THE BASICS

- Rigid top and body reject feedback.
- Sco's preference of Artist-style "castle" headstock to complement AS body for better tonal balance.
- Classic '80s Ibanez half-brass, half-bone nut.

PAT METHENY

"It took some time, several prototypes and perseverance from all corners, but the final results are excellent! I love playing all of the various Ibanez PM models and am quite proud to be associated with them."

THE BASICS

- Like the artist himself, the PM models are able to play within and without the boundaries of traditional jazz.
- The size of the traditional jazz guitar but slimmer for better comfort, projection, and feedback rejection.
- Double cutaway and 17th fret body joint offers easier upper fret access than completely traditional jazz boxes.
- The PM120 features an even slimmer body than the PM100 (2" vs. 3") for enhanced midrange punch.

PM120 NT

2007 marks a major milestone: The 20th Anniversary of the revolutionary Soundgear bass. Premium woods, Prestige thru-necks, Bartolini® electronics provide our Prestige Soundgears with even more sophistication and versatility than the famous originals. But the core Soundgear philosophy is exactly the same as two decades ago: a modern bass for players who want a thin, fast neck and the ability to dial in any tone for any genre from complex electric jazz to raging black metal.

THE BASICS

- .. Thin yet super-strong 5pc thru-necks for better upper fret access, stability and sustain.
- .. Models with maple back and flamed maple wings for players favoring more high-end emphasis; mahogany back and walnut wings for those desiring warmer tones.
- .. Ibanez Vari-Mid EQ for full bass tones and exceptional versatility.
- .. Gotoh® precision machines.
- .. Includes deluxe Prestige case.

Sleek body contours provide unparalleled playing comfort on even the longest gigs.

SR

SR 4 string

Since 1987, trends have come and gone. But the fast and versatile Soundgear basses continue to lay down the groove in every style imaginable in every venue possible. Now in 2007 Ibanez offers a vast array of different Soundgear models including neck-thru-body and left-handed.

The modern Soundgear narrow neck is perfect for 5- and 6-strings so extended range travel is as physically comfortable as it is musically exhilarating.

Phat II active bass boost easily adds extra low-end power to the affordable GSR200 models.

SRX

We could say that the Soundgear SRX is the Soundgear SR's simpler and even more muscular younger sibling. But a better explanation of what SRX can do for you is this: Soundgear Extreme is the only bass in the world that can count both metal minions and bass icon/hitmaker Carol Kaye in its court. If a bass is so exceptional it can satisfy players that different, what could the SRX do for you?

- Elixir® string
- color : BK

White pinstripe binding on ICB300EX.

ATK

Not everyone needs a sleek, narrow necked bass like the Soundgear. Which is why we first came out in 1995 with the ATK (short for "attack," the aggressive ATK's defining characteristic). Unlike the Soundgear, the ATK is big—with the big, bold tones you get from a traditional big neck and big body. But the ATK is no one-trick trad workhorse. It's also versatile and comfortable thanks to its unique electronics and physical layout. In other words, the right choice for blues, hard rock, country players and anyone else who wants every single plus of a traditional bass and more.

- Jumbo frets
- ATK4 bridge
- ATK triple coil pu
- ATK 3-band eq
- Factory tuning : 1D, 2A, 3E, 4B
- color : TK
- Also available left-handed

With the ingenious ATK bridge, you have the option to string through-the-body for increased low end and more sustain, or through-the-bridge for slightly more high end and attack.

ATK's round, comfortable neck.

ATK's innovative triple coil pickup and active 3-band EQ allow you to dial in anything ranging from earthquake lows to skull-splitting highs.

THE BASICS

- .. Big five-bolt All Access Maple Neck and substantial body provide huge tones.
- .. Unique triple coil pickup and Tone Character Switch offer easy rapid and radical changes in tone.
- .. Well-designed pickup and control placement facilitate easy slapping and popping.

"From the solid ash body, to the sick tones of the ATK triple coil pickup, and the signature Slipknot inlay, the bass is amazing! I took it home from the factory and didn't have to change a thing! I have played it every single day and nothing else even comes close. I love it!"

Paul Gray
Slipknot

ATK Triple Coil Pickup

Mike D'Antonio
Killswitch Engage-

I wanted to base my signature model after one of my favorite basses: the SRX700. My only requirement was that it needed to look even tougher and more metal (than your ma's kettle). The MDB has a simplified control layout I prefer, the great SRX pickups, and a customized graphic I designed. The bass is HUGE sounding, comfortable to play, and looks killer. What more could you want?

MDB1 BKF

- 5pc MDB1 Maple/Walnut neck-thru
- Swamp Ash wing body
- Medium frets
- Accu-Cast B200 bridge (19mm string spacing)
- PFR-ALN4 neck pu
- PFR-ALB4 bridge pu
- Active 1-volume control
- Factory tuning : 1F, 2C, 3G, 4C
- color : BKF

THE BASICS

- .. Mike D'Antonio's simple control layout. One volume control with all tone controls set internally to mid-point.
- .. Factory-tuned to Mike drop-C tuning.
- .. Standout Medusa snake graphic by Mike D'Antonio.
- .. Special beveled edges on the upper and lower horns.
- .. Super high-output Passive Full Range pickups with exposed pole pieces provide awesome levels of output.

Fieldy-Korn-
"The K5 is a masterpiece."

K5

THE BASICS

- .. Lightweight hardware allows for more active performance—and pumps out the tremendous low-end and sustain needed for Korn's brand of heavy rock. Powerful ADX active pickups.
- .. Original Vari-Mid EQ sweepable midrange allows you to dial in or dial out any kind of bass sound (or as Fieldy says, "Take the midrange and turn that \$%#@\$ off").

EDB

The original Ergodyne EDBs were molded of man-made materials. That way their comfortable three-dimensional shapes could be offered at a reasonable price that wasn't possible in wood at that time. New bass making technologies allow the EDB's player-friendly ergonomic shape to be affordably rendered in ash, maple or basswood for rich organic tones.

THE BASICS

∴ Ergonomically curved body for playing comfort.

∴ Strong, slender two-octave neck.

∴ Scooped out top for slapping and popping playing styles.

EDB700 bass has a carved top and back.

Bartolini® pickups provide deep, warm tones while retaining treble emphasis. The Bartolini® active 3-band EQ features fully independent bass treble and mid controls and a mini switch for quick mid-frequency adjustments of 250Hz, 500Hz and 1kHz.

BTB

All the top shelf materials, commanding tones and great feel of an extremely expensive boutique bass—without the extremely expensive pricing. The BTB takes the traditional formula of powerful tones produced by a massive body and substantial neck and then adds an even longer 35" inch scale neck, the right mix of select woods and high-tech appointments. The BTB's unique off-center line neck shape, which follows the natural path of the thumb as it moves up the neck, makes upper fretwork as easy as playing the lower frets.

THE BASICS

∴ 35" neck scale provides superior articulation. Perfect for low tuning and on 5- and 6-strings where "flopping" can occur on the low B-string with standard neck scales.

∴ Hi-tech Neutrik® locking jacks offer secure and stable connection.

∴ 18-volt circuitry offers more headroom.

∴ Gotoh® Precision Machines (BTB1205E/1206E).

∴ Includes Deluxe Prestige Case (BTB1205E/1206E).

Secure high-tech Neutrik® locking jacks are just one of several modern enhancements to the BTB's traditional design.

Bartolini® MK1 pickups featured now on BTB550s.

Maple/mahogany/maple body construction on the BTB555MP retains the warm low-end of mahogany but adds the slightly brighter response of two sections of maple.

Phat II EQ active bass boost easily dials in extra low-end on the BTB200s. Ibanez DX pickups provide humbucking quiet and power with balanced string output on both 4- and 5-string models.

RD

RD

If you travel to gigs demanding a multitude of styles and tones—and can carry only one bass on the plane—the Ibanez Roadgear is the bass you should take.

THE BASICS

- .. Neck is thin in the lower frets for fast fretwork, but thicker towards the upper for fatter tone.
- .. J/M pickup configuration offers a wealth of tones and plenty of punch.
- .. Special control allows switching between traditional single coil and modern humbucking tones (RD900s).
- .. Heavy-duty Accu-Cast B400/B100 bridges provide strong sustain.

EQ bypass switch allows the RD900 to quickly change tones—or amplifiers. Special control allows the two single-coil bridge pickup to switch between traditional single coil and modern humbucking tones—in just one bass.

Basslines™ Ibanez pickups for RD900 & RD905.

GAXB

GAXB

It simply doesn't get any simpler. Just one volume and a 3-way switch make it easy for beginners or players in a rush to instantly dial in the right tones.

THE BASICS

- .. 32" scale neck is perfect for students and players who prefer lower tension or a smaller neck.
- .. Double-cutaway body offers easy upper fret access.

JUMP START

Four out of five doctors say that people who play music get more dates, have a lot more fun, and, when you get right down to it, are simply more cool than people who don't play.*

Jumpstart bass and guitar packages have "Everything you need to plug in and play."™ So instead of spending time wondering what it would be like to be on stage, you could be looking out at the audience.

*In entirely imaginary interviews conducted across the United States. But you know it's true. Plus actual studies do show that playing music makes you smarter. That tends to make life easier.

GRG MIKRO

Mikro's 22" inch scale length—(standard guitars feature a neck scale from 24 3/4" to 25 1/2") makes it the right choice for beginner players or pros practicing on the tour bus.

The Mikro is perfect for last minute rehearsals, running scales while waiting for downloads, young rockers just joining the fray or anyone who just wants a smaller neck and body. Not to be confused with other small guitars—Mikro is no toy. Mikro features the same construction, high quality and careful set-up of our full size GRX and GRG models.

X Mode/Channel

The X mode/channel emphasizes tighter low end and a unique tonality in the midrange, which increases sustain and harmonics.

Gain control on Normal Channel

The TBX features a Gain control on the Normal Channel to offer wider tonal variation ranging from pure clean tones to crunchy overdrive.

Parametric MID EQ control

Mid range is a very important aspect in determining the character of an amplifier's sound. The TBX active Parametric Mid control allows you to shape a wide variety of distortion tones and amp sounds. This control also works for the Normal channel on the TBX15R and TBX30R.

The new generation Tone Blaster X series amps were designed and created to answer the needs of today's guitarist. The parametric mid EQ allows you to dial in any tone you're looking for in an instant. The exclusive X mode allows you to get monstrously heavy and lets you cut through the din of the loudest rhythm section. The gain control in the normal channel can be dialed down to give you anything from a clean jazz tone to a crunchy, slightly overdriven rock'n roll tone. Plug in and express yourself with TBX.

Extremely efficient Ibanez IS speaker drivers are voiced for tight and focused low-end for today's modern music styles.

Thermion

Guitar Amplifier

TN120

The 120-watt Thermion features only the finest top-shelf, military-grade components...all in the service of a design that considers every aspect of modern playing from tone to transport. But the most important spec is this: Thermion is all-tube. There is absolutely no solid-state circuitry in the signal path. So you've got the tones, power and control you need to conquer every album track, every stage, every city, and ultimately, the entire universe (admittedly, that may take a little time).

1

3

5

7

2

4

6

8

1. Illuminated front panel logo and controls provide full visibility on stage for you—and the audience.

3. Matched RUBY Tube output tubes are used for optimum performance and stability.

5. Heavy-duty Thermion cabinets feature 5/8" cabinet-grade birch plywood. Two fully isolated left and right sound chambers provide enhanced bottom-end and true stereo performance when used in the stereo mode.

7. Bias adjustment allows easy biasing and changing of tubes (to approximate the same sound as the previous tubes) without removing the chassis. (Should be performed by qualified personnel only.)

2. Select RUBY Tube[™] preamp tubes. Tube shields on every pre-amp tube (not utilized on many other professional grade amps) reduce noise.

4. "Over-spec'd" high efficiency toroidal power transformer virtually eliminates 50Hz hum.

6. Often imitated, never duplicated, Celestion's[™] Vintage 30's[™] are the industry-standard heavy-rock speaker. Another example of the Thermion commitment to using only finest components.

8. Big, beefy, high-fidelity output transformer provides the accurate high-end sizzle and full low-end required by modern players (and often not achieved by many tube amps).

[™]"RUBY Tubes" is a trademark of the Magic Parts Co.

^{™™™}Celestion and "Vintage 30" are trademarks of the Celestion Corp.

TN120

TN120 THERMION[™] Ibanez all-tube amplifier

- 120W 5%THD @4, 8, or 16 ohms
- All tube signal (NO SOLID-STATE!) line circuitry with mechanical relays
- 4 x 6L6GC MSTR MATCHED Ruby Tubes^{™™} output tubes (user switchable to 6550s)
- 5 x 12AX7A-SELECTED Ruby Tubes^{™™} preamp tubes
- HI/LO input impedance switch
- Two independent channels: Vintage Channel & Hot Channel
- Tube circuit Effects Loop w/Send and Return Level Control on the front panel and Blend/Series switch on the rear panel.
- Illuminated front panel and illuminated Ibanez logo
- Dampening switch enables different distortion characteristics out of Hot channel
- Rotary 3-position bright switch in Vintage channel
- Traditional passive EQ in both channels
- 3-button footswitch for channel switching, dampening and effects loop on/off.
- Maintenance friendly, professional-grade design includes bias adjustment interface for output tube replacement on top of chassis, IEC 60065 compliance, high efficiency toroidal core transformer with automatically resetting thermal fuse, durable 3/4" plywood cabinet, heavy-duty toggle switches, potentiometers with dust-covers, and more.

Sound Wave

Bass Amplifiers

Whether you play funk, metal, or anything in between, Ibanez bass amps provide the right power, tone control and speaker combination for the job, onstage and off.

SW100

SW100 Sound Wave

- output power 100W@8Ω/145W@4Ω
- speaker unit 15" Ibanez "POWER JAM" speaker with piezo tweeter Direct Out - GND Lift Switch, Post EQ Switch, Sensitivity Switch, Gain, Bass, Middle-Select, Treble, Presence, FX Mix, Volume, Tweeter Switch
- i/o's Input, CD Input, Direct Out, Line Out, Speaker Out, Effects Loop, Tuner Out, Headphones
- cabinet Closed Tilt Back cabinet
- size 540(W) x 590(H) x 490(D) mm
- weight 32.5 kg

SW115S Sound Wave

- speaker 15" Ibanez "POWER JAM" speaker with piezo tweeter
- power handling 300Wrms/600Wmax
- controls Tweeter Switch
- i/o's Input
- impedance 8Ω
- size 540(W) x 530(H) x 490(D) mm
- weight 25kg

Power Jam Bass Speaker

Ibanez's original "Power Jam" bass speaker drivers. The PJ1508B 15" 8 ohm speaker driver features a 2" voice coil and big 55 oz ceramic magnet for full bottom end and warm midrange. 300Wrms/600Wmax input rating.

SW115S

Rear Panel

Includes extension speaker jack, tuner output, and Send and Return jacks.

Speaker System

The SW100 is equipped with a 15" Power Jam bass speaker and a piezo tweeter which can be turned on/off via a front panel switch.

3-Way Middle Frequency Select Rotary Switch

Easily selects 250Hz, 500Hz or 800Hz mid-range frequency positions.

Direct Out

The SW100's Direct Out is a transformer-balanced XLR connector-output which features completely controlled low impedance works for extremely low signal-level loss. Pre- or Post-EQ switchable and GND Lift switch-equipped to avoid ground loops with other connected equipment.

Limiters

All Sound Wave series bass amplifiers are equipped with internal limiter circuitry. Extremely natural limiting minimizes distortion and keeps the low-end smooth and punchy.

SW20 Sound Wave

- output power 20W@4Ω
- speaker unit 8" Ibanez "POWER JAM" Coaxial speaker (with tweeter)
- controls Gain Switch, Volume, Bass, Middle, Treble, Presence
- i/o's Input, CD Input, Headphones
- cabinet Closed Back cabinet
- size 328 (W) x 365 (H) x 277 (D) mm
- weight 8.9 kg

SW35 Sound Wave

- output power 35W@4Ω
- speaker unit 10" Ibanez "POWER JAM" Coaxial speaker (with tweeter)
- controls Gain Switch, Gain, Bass, Middle, Treble, Presence, Volume
- i/o's Input, CD Input, Line Out, Speaker Out, Effects Loop, Headphones
- cabinet Closed Back Tilt Back cabinet
- size 415 (W) x 445 (H) x 335 (D) mm
- weight 15.6 kg

SW65 Sound Wave

- output power 65W@4Ω
- speaker unit 12" Ibanez "POWER JAM" speaker with piezo tweeter
- controls Gain Switch, Gain, Bass, Middle, Treble, Presence, Volume
- i/o's Input, CD Input, Line Out, Speaker Out, Effects Loop, Headphones
- cabinet Closed Tilt Back cabinet
- size 460 (W) x 525 (H) x 425 (D) mm
- weight 20.2 kg

Co-Axial Speaker System

Coaxial speakers on the SW20 and SW35 feature a tweeter mounted in the center of the speaker's pole piece. This design avoids having a particular "hot spot" or "sweet spot" as often found in separate speaker/tweeter setups and provides the full natural sound needed for acoustic guitar reproduction. The SW20 features a PJ804C coaxial speaker (20Wrms/40Wmax input rating). The SW35 is equipped with the PJ1004C (40Wrms/80Wmax input rating).

TROUBADOUR

Acoustic Guitar Amplifiers

Acoustic guitars may be fine for a campfire sing along, but sometimes the natural volume of an acoustic guitar is not loud enough. With Ibanez Troubadour acoustic amplifiers, you can amplify your sound for true stage volume in all venues, from coffeehouses to arenas. The Troubadour is available in various sizes to suit every need.

TA225 Troubadour

- output power 25W@ 8Ω + 25W@ 8Ω

MU30

Chromatic tuner & metronome

WD7 Weeping Demon

The most variable and controllable guitar wah you can get. The Weeping Demon's shrieks, cries, wails and seductive siren songs will have your audience screaming for more. The Weeping Demon features spring and normal footboard action, selectable wah range, fine tuning controls and more.

a. Mode Lever

Changes the mode so the effect can be turned on and off with the FOOTSWITCH (if) or with the AUTO SWITCH (effect turns off when pedal is in the upright position).

b. Auto-Off Delay

In the AUTO SWITCH mode, you can set the effect-off either on standard instant-off when the pedal is returned to the full upright position or a delayed-off by turning the control clockwise.

c. Range

c1. RANGE SWITCH for switching between LOW and HIGH frequency response.

c2. RANGE FINE TUNING allows fine tuning within either the LOW and HIGH RANGE SWITCH settings.

d. Spring Tension

Adjusts the tension of the footboard return-spring in the AUTO SWITCH mode.

e. Pedal Friction

Turn clockwise for more footboard resistance; counter clockwise for a looser feel.

f. Footswitch

Allows on-off switching of the effect independent of the footboard when the MODE LEVER is in the FOOTSWITCH Mode.

Classic Analog Effects

TS808 & 9 SERIES

When it comes to compact effects, nine is the magic number. There are sound reasons why, twenty years after they were first made, you still see these effects in players' rigs. If you missed out on getting one of these classics the first time around, it's time. The reissue of the TS808, described as "the Holy Grail of Tubescreamers," features the warm tones of the JRC4558D chip used in most of the original TS808's.

TONE-LOK EFFECTS PEDALS

On the inside, Tone-Lok pedals feature hi-fidelity components carefully tweaked with the constant input from a new generation of Ibanez players. And all this great stuff comes encased in cool looking, road tough metal boxes at prices the working player can afford.

SM7 Smash Box

The Smashbox is the most aggressive weapon in the Tone-Lok distortion arsenal. Armed with obscene amounts of gain, tight low end, and searing highs, the Smashbox is THE heavy rock sound for the contemporary guitarist. A special "VOID" noise gate and "EDGE" (sharp/smooth) controls let you handle anything from all-out shred to machine-gun metal riffs and rhythms.

SH7 7th Heaven

Designed specifically for 7-string guitars with the input from some of Ibanez's hottest 7-string players, the SH7 Seventh Heaven distortion pedal accentuates the low-end girth of the 7-string while reducing unwanted string noise. A special mode switch allows you to choose between two different distortion voicings while Lo, Hi, Drive, and Level knobs give you total tone control. An absolute must-have effect for replicating the best 7-string sounds of others or creating your own individual tones.

DS7 Distortion

The most versatile Ibanez distortion pedal ever, capable of producing a wide range of smooth, dynamic overdrive tones. From a subtle tonal nudge to walloping rock n' roll crunch, the DS7 delivers days of sustain and gobs of gain.

TS7 Tubescreamer

The Tubescreamer isn't just a stompbox, it's an institution. Our latest generation Tubescreamer, the TS7, is no exception. With a Tubescreamer's classic subtle-but-smooth overdrive, the TS7 expands the expressiveness of your guitar while maintaining its tonal integrity. Tone adjustments are provided by the classic three knob configuration, with an added "hot" switch for an extra gain boost.

FZ7 Fuzz

Far out! A complete 60's flashback with none of the drawbacks, the FZ7 is the ultimate in psychedelic fuzz. With the FZ7's tone, drive, and level controls, it's never been easier to get the right retro tones. You can even engage the DAMAGE switch for that ratty, broken speaker sound. Yeah, baby, yeah! Dial in, tune up, drop down or whatever turns you on.

DE7 Delay/Echo

Add new dimensions to your sound with the DE7 Delay/Echo pedal. Get the best of both worlds: high tech digital sounds comparable to expensive rack units or warm vintage tape echo sounds—all with a simple flick of the switch. TIME, REPEAT and LEVEL controls help you dial in just the right amount of delay, while stereo outputs can be used for a more spacious sound. With a range of 30ms to 2.6 seconds, the DE7 is the only sound solution for every playing situation.

PH7 Phaser

Designed to emulate the effect of a rotating speaker, the PH7 has a switchable phase circuit capable of either four or eight stages of smooth phasing. With these two very different tonal modes, you can go from a subtle shimmer to all out '70's "Let's Get Furry" phasing.

PM7 Phase Modulator

If you've gone through one phase after another, maybe it's time for the final phase. The PM7 Phase Modulator offers three types of waveforms to give you everything from classic phaser to DJ effects to loy, ray gun sounds. Since good things come in threes, the PM7 also has three phase stages: vintage, deep and dry, and deep and pronounced. With some minor tweaking, the PM7 goes from traditional to 21st century and beyond.

AW7 Autowah

There are autowahs. And there are autowahs. But the Tone-Lok AW7 isn't just any autowah. It's got standard wah where both the highs and lows are cut and it's got a wah setting where only the highs are cut. And it's got a Band Pass Filter provides the sound of a standard wah pedal left at one setting (a favorite wah pedal technique of Joe Satriani). You can even change the chain order of the effects to get different tones: either distortion to wah or wah to distortion.

LF7 Lo Fi

The first dedicated filter pedal for the guitar, the LF7's voltage controlled analog high and low pass filters allow you to emulate transistor radio and megaphone type sounds. Best used at the end of a signal chain in combination with other pedals, this ticking time bomb creates wide soundscapes of far out tones that previously required a massive rack of analog electronics. The Lo Fi also performs equally well with vocals, drum machines or in any "mix-down" context.

PD7 Phat-Hed Bass Overdrive

Why let guitarists rule the stage? Loaded with growing low-end distortion, the PD7 levels the playing field for the rock bassist. The PD7 is armed with three pre-amp style voicings and an attack control switch, which accents the amount of harmonic content in your sound. With DRIVE, LO, HI, and LEVEL knobs, dialing in a thunderous bass sound has never been easier.

SB7 Synthesizer Bass

If you're looking for new tones or you're still smoldering with resentment against synth bass keyboard players, the SB7 is the ticket. You've got real time feel—in other words no annoying tracking errors and delays. You can even play chords.

Picks

Ibanez offers picks for just about every type of player with different feels, functions and looks. Function wise, the Grip Wizard series feature sand or rubber grips for superior gripping ability. Look wise, Ibanez offers a selection of original metallic colors and other unique colors and designs. And then there is the signature line of picks that are exactly what the artists use in most cases. In fact, Steve Vai won't use anything but his signature Ibanez picks.

Basic Color Series

Also, Ibanez covers the basic picks with orthodox shape & color. You can choose from 6 kinds of shapes and 2 kinds of material.

CE4H-WH 1.0mm thickness

Bags

IGB7-BK
Bag for El. guitar
IBB7-BK
Bag for El. bass

IDGB5-BK
Bag for El. guitar
IDBB5-BK
Bag for El. bass

Deluxe Bags

Ultimate gig bag for players on the go. With the detachable accessory bag inserted in the EVA pocket, you can carry your effects, cables, and even your laptop computer comfortably.

Double Bags

Ibanez double gig bag lets you carry two instruments in one bag. With the wheel on the bottom, you can carry your guitars without any hassle.

Standard Bags

Even the most affordable bags have features to hold your instruments securely. Adjustable shoulder straps and easy grip handle equipped.

ISGB5-BK Bag for El. guitar
ISGSB5-BK Bag for AD series
ISBB5-BK Bag for El. bass

300GBP
Bag for El. guitar

300BBP
Bag for El. bass

Backpack

Deluxe Bags w/Backpack

The 300GBP/300BBP bags feature a detachable backpack. Not only is it handy for carrying accessories around along with your guitar or bass, it detaches for typical backpack use.

ISGE5-BK Bag for El. guitar
ISGE5-BL **ISGE5-GY** **ISGE5-PK** **ISGE5-YW** **ISGE5-WH**

Colored Bags

Why only black bags? Now Ibanez offers gig bags in various colors to accommodate your own style.

Original Shape Bag
IGH7
Bag for El. guitar

Cases

No matter which Ibanez guitar or bass you choose, you'll want to protect your valuable investment. Do it in style with an authentic Ibanez hard shell case.

W50RG for all of RG, S, SA (incl. 27" scale & left handed models)
W50SZ for SZ

M100C for RG, RG7, S, SA, JS (except 27" scale & left handed models)

MB100C for SR, SRX, EDB, DWB, GWB (except left handed models)

W50BTB for BTB, ATK, RD
W50SR for all of SR (incl. left handed models)

AFS-C for AF, AFS, AK
AF-C for GB200, PM
AS-C for AS, JSM
GB-C for GB10, GB100
AR-C for AR, AX

Cables

GUITAR CABLES

Series 96

96 micro-standards of silver plated copper core wires offer low impedance and maximum signal transfer.

- Core: 0.1 x 96 (Silver Plated)
- Shield (Braided): 0.1 x 8 x 12 (OFC 99.99%)
- Sure Grip Rubber on Plug
- Velcro Strap with Ibanez Logo equipped
- Outer Jacket: PVC, Woven

Series DS

double-shielded construction offers pro-quality and durability at standard cable prices.

- Core: OFC (99.99%)
- Shield: OFC (99.99%) Braided and Aluminum Sheet
- Velcro Strap with Ibanez Logo equipped
- Outer Jacket: PVC, Woven (Black, Red & Blue colors are available)

Pickup Character

MODEL NO.	NAME	OUTPUT	CONSTRUCTION	DESCRIPTION KEY		
IBANEZ GUITAR PICKUPS						
ACH1	ARTCORE 1	N	H	C	Clean sounding with a slight overdrive.	
ACH2	ARTCORE 2	B	H	C	Clean version of ACH1.	
ACH1-S	ACH1-S	N	H	C	Light tone with added lows.	
ACH2-S	ACH2-S	B	H	C	Bridge version of ACH1-S.	
AH1	AXIS HUMBUCKER 1	N	H	C	Very responsive and full sounding, excellent string-to-string clarity. Customized for the A series.	
AH2	AXIS HUMBUCKER 2	B	H	C	Full bass sound. Almost magnetic humbucker clarity with harmonics and extended highs.	
AH5	AXIS HUMBUCKER 5	N	H	C	Very responsive and full sounding, excellent string-to-string clarity with lots of character and extended highs.	
AH6	AXIS HUMBUCKER 6	B	H	C	Full bass sound. Almost magnetic humbucker clarity with harmonics and extended highs.	
AH7-1	AXIS HUMBUCKER 7-1	N	H	C	Softer version of AH1 pickup.	
AH7-2	AXIS HUMBUCKER 7-2	B	H	C	Softer version of AH2 pickup.	
AH51	AXIS SINGLE 1	N	S	A	Traditional winding single coil pickup with increased output for each position.	
AH52	AXIS SINGLE 2	M	A	A	Traditional winding single coil pickup with increased output for each position.	
CUSTOM-F	CUSTOM-F	N	H	C	Flaming pickup designed for the Ibanez.	
GB SPECIAL	GB SPECIAL	B	H	A	Flaming pickup redesigned by George Gruhn for higher output and better resonance. Also, with increased output with the "Redneck" tone.	
GB SPECIAL	GB SPECIAL	N	H	C	Rock version of GB.	
INF1	INFINITY 1	N	H	C	Highly responsive with warm, round and rich sound.	
INF2	INFINITY 2	B	H	A	Excellent magnetic pickup. More responsive to sustained string, strong low-end dynamics.	
INF3	INFINITY 3	N	H	C	Provides the dynamic sound for country and blues.	
INF4	INFINITY 4	B	H	A	Delicious lead pickup. Great sounding with great harmonics.	
INF51	INFINITY SINGLE 1	M	S	A	Warm single coil tone with added output.	
INF53	INFINITY SINGLE 3	M	S	A	Excellent sounding high output pickup. Designed to work with humbuckers for the coil pickup.	
PSND1	PSND1	N	H	C	High output coil with "crankiness" to "crankiness".	
PSND5	PSND5	M	S	A	High output with complete tone.	
PSND2	PSND2	B	H	C	High output with excellent harmonics.	
S1	SINGLE 1	M	S	A	Excellent sounding, but high output coil with clean, clear response for lead, clean output. Designed to work with humbuckers for the coil pickup.	
S5B	SUPER 5B	A11	H	A	Classic warm and energetic. Excellent bass jazz and rock without feedback.	
SLS8	SILENT 5B	A11	H	A	Classic, warm and energetic. Excellent bass jazz and rock without feedback.	
True Duo	True Duo	B	H	C	Designed for matching between previous models and designed used in one pickup.	
V7	V7	N	H	C	Light, but bright. Very dynamic for chording and rhythm.	
V8	V8	B	H	A	Warm and articulate lead pickup with enhanced overtones. Good response without excessive dynamics.	
V77	V77	N	H	C	Softer version of V7 pickup.	
V87	V87	B	H	C	Softer version of V8 pickup.	
VK1	VK1	N	H	A	High output, but with clarity in high end.	
VK2	VK2	B	H	A	Bridge version of VK1.	
IBANEZ BASS PICKUPS						
ACHB-2	ACHB-2	B	H	H	C	High output humbucking pickup.
ADXS	ACTIVE DYNAMIC 5	B	H	A	C	Active bass pickup, actively powered with 9V battery. Not intended to be used with humbuckers. Excellent string-to-string clarity. Individual coil output for lead and bridge positions.
AIXA	AIX TRIPLE COIL	B	H	C	C	Many features and natural tone.
DIK4	DYNAMIC 4	B	H	A	C	Two different sound basslines provides even going output. Full range, powerful bass sound with plenty of punch.
DIK5	DYNAMIC 5	B	H	A	C	5-string version of DIK4.
DIKJ	DYNAMIC J	B	H	A	C	Designed to be used with or without an system for high output.
DAP	DYNAMIC P	N	H	C	C	Designed to be used with or without an system for more punch.
DJVS	DYNAMIC S	B	H	A	C	Designed to be used with or without an system for high output.
PSNDJ	PSNDJ	B	H	A	C	High output with added lows.
PSNDM	PSNDM	B	H	A	C	High output humbucking pickup.
PSNDP	PSNDP	B	H	A	C	High output with plenty of punch.
DFR-4	DYNAMIC FULL RANGE	B	H	A	C	Medium output passive pickup with good attack and superior dynamics.
DFR-5	DYNAMIC FULL RANGE	B	H	A	C	5-string version of DFR-4 pickup.
DXM-H	ERGO DYNAMIC	B	H	A	C	Designed with good response punch. Designed specifically to work with the active bass circuit of DFR series.
PRR-AL4	PASSIVE FULL RANGE	B	H	A	C	Powerful Alnico magnet pickup with exceptional clarity and very even response.
PRR-4	PASSIVE FULL RANGE	B	H	A	C	Powerful full range pickup with added low end.
PRR-5	PASSIVE FULL RANGE	N	H	A	C	Powerful full range pickup with added low end.
SFR-GW	SONIC FULL RANGE	B	H	A	C	Custom wound for DFR315. Quick attack, superior dynamics and added highs.
DI54	DUAL COIL SOAP BAR	B	H	A	C	Powerful wide range tone.

MODEL NO.	NAME	OUTPUT	CONSTRUCTION	DESCRIPTION KEY		
BARTOLINI™ BASS PICKUPS (INDIVIDUAL BARTOLINI PICKUPS ARE NOT SOLD BY IBANEZ)						
GBW	BARTOLINI WILLIS	B	H	H	C	Powerful response with the quick string to allow more precise string-to-string clarity. (EMG 185)
SR Bass	BARTOLINI CUSTOM	B	H	H	C	Repeating active vector pickup. Excellent clarity with well balanced response.
