

The cover features a central illustration of an electric guitar and an electric bass. The guitar is positioned in the upper half, and the bass is in the lower half. The background is a textured, golden-brown surface with dark, expressive brushstrokes. The entire composition is framed by ornate, red, gothic-style scrollwork in the corners. The year '2008' is printed in a large, white, serif font across the center. The Ibanez logo is in the top right, and the product categories are listed in a smaller white font below it.

-THE PRODIGY-

THIS IS THE PAST

In the last two decades, Ibanez has taken electric guitars into realms of the extreme and hard rock is all the better for it. The JEM, the JS Series, the RG, the K7, the Xiphos: all ahead-of-the-curve innovations that only a mystic could have seen coming.

THIS IS THE PRESENT

Otherworldly notes and sounds whisper in your ear. There are no definitive words for the unexplained, but you know you are searching for something that will take you to the next level.

You ask yourself, "Where is the electric guitar heading? What will the future of hard rock guitar look like and how can I push my own musical frontiers into the beyond?"

THIS IS THE FUTURE

Travel inward and find what the darkness is hiding from you. Revel in this harvest season and commune with the unknown.

Ibanez sees all and answers with the Prestige Ultimate, a marvel of 21st Century rock guitar science.

For this undertaking, we've concentrated every bit of the manufacturing process into our Japanese factories.

Every step of the development was overseen by the highest quality craftsmen.

The specs? 24-frets of slippery-fast neck, newly designed state-of-the-art bridges and a new tonal versatility await the brave musicians who dare step into this next dimension.

That is not all: Ibanez will unveil more supernatural instruments in

2008: more eye-catching innovations, more set-in neck guitars and new models designed to mystify and delight.

S Prestige

"This is the future," said the fortune teller as she laid down the last card. Ibanez's S Prestige for 2008 represents a bold, previously unheard universe of metal mayhem. 24-frets of diabolical wizardry, a newly-designed ZR-2 bridge with ZPS3 spring system and vicious Hot Grinder and Short Tracer pickups make this S Prestige the instrument that all metal-minded guitars will be judged against. Made in Japan by Ibanez's premier craftsmen.

THE SIMPLE TRUTH:

- 5pc, wicked fast 24-fret neck.
- Smooth, contoured mahogany body.
- ZR-2 bridge w/ZPS3 spring system.
- Massive tone and sustain.

BBK Finish

Hi-tech, leatherish Baker's Black finish on S5470.

24ft Wizard Prestige Neck

The long-awaited 24-fret Wizard neck has opened the new door for musicians to enter the Realm of S.

New Top-Lok

With the very simple design, the new Ibanez Top-Lok no longer requires the retainer bar to maintain string tension. The Metal injection molding process has made all the edges smooth so your hands aren't scratched.

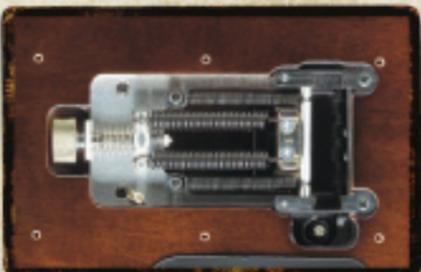

Wrench Holder

If you are serious about the condition of your gear, you must carry the necessary tools with you always. But how...? The S Prestige guitars have a place to store your wrenches with your axe. Access wherever, whenever needed.

ZR-2

The new ZR-2 features the new snap-in arm socket, that ensures the arm goes in properly and is easy to remove.

ZPS3

The Zero Point System keeps evolving. The new ZPS3 is made of Duralumin, which drastically reduces its weight as well as the size of the cavity on the body back. Switchable to floating setup, of course.

Intonation Adjustment Tool

Just unscrew the built-in intonation adjustment tool from the base and screw it into the bottom of each saddle for quick adjustments. U.S. PAT No. 6,957,354

Arm Torque Adjustment

Arm torque is easily tightened or loosened by turning the arm-holder adjustment screw. No matter what the setting, the arm always feels secure.

HGD & ST pickups

The new Hot Grinder pickups are specially designed for the new S Prestige output extra volume, yet sharpness is not sacrificed. The Short Tracer pickup with strong magnet enables low-profile setting in the middle pickup position, for shredding picking.

In the hands of the magician or warrior, these guitars can summon lightning and change the course of raging rivers. The combination of sleek bodies, lethal pickups and state-of-the-art double-locking tremolos gives RG Prestiges the power to charm snakes out of their skins and split mountains in half. Made in Japan by Ibanez's premier craftsmen.

THE SIMPLE TRUTH:

- One of the most popular metal guitars ever
- Fast, flat and thin Wizard necks for comfort and speed.
- Ibanez Edge tremolo for rigorous, aggressive playing
- Gotoh precision tuning machines.
- Include deluxe Prestige case

The spc thru-body neck on RG Prestige models offers massive sustain, easy playability at the upper frets, and incredible strength and stability.

Edge-Zero

The ultimate form of Edge, the Edge-Zero is the merge with the ZR Trem, another Ibanez tremolo revolution. Maintaining brutal action of knife edge, the Edge-Zero deploys all unique features of ZR such as on-board intonation adjuster screw and the arm torque adjuster. And the new snap-in arm socket is easy to insert/remove the tremolo arm and you can feel it goes in securely. Edge-Zero is featured on the all RG Prestige, RG3000s and RG2000s.

Intonation Adjustment Tool

Just unscrew the built-in intonation adjustment tool from the base and screw it into the bottom of each saddle for quick adjustments. U.S. PAT No. 6,867,351

Arm Torque Adjustment

Wrench Holder

If you are serious about the condition of your gear, you must carry the necessary tools with you always. But how? The S Prestige guitars have a place to store your wrenches with your axe. Access wherever, whenever needed.

New Top-Lok

With the very simple design, the new Ibanez Top-Lok no longer requires the retainer bar to maintain string tension. The Metal Injection Molding process has made all the edges smooth so your hands aren't scratched.

ZPS3

After having relieved so many players from tuning nightmares, the Zero Point System is now available on selected RG Prestige models. The new ZPS3 utilizes Duralumin, an alloy known for aircraft material, drastically reducing its weight as well as the size of the cavity on the body back. Switchable to floating setup.

Edge Pro

The Edge PRO features a unique Sound Metal Chip on each saddle which help increase sustain right at the most critical area, the intonation point. With the Edge PRO design, the sliding string holders are actually part of the bridge, which prevents string holder blocks from getting lost during string changes and no need to cut off the ball of your strings. Edge Pro is featured on RG1000s.

SER Finish

Unique textured "Suede Red" finish on the RG1570.

Double Edge Pro Tremolo on RG1820X

The Double Edge Pro allows brilliant acoustic-style tones, which can also be blended with electric tones. Piezos by L.R. Baggs® are isolated to eliminate palm noise and a 2-band EQ on the piezo output provides added tone control.

Ibanez FX EDGE III-8 double-locking fixed bridge was made specifically to handle and augment the awesome extended range of the RG2228GK 8-string.

The U.S.A.-made EMG® 808 active pickups—the first ever full-production 8-string pickups.

RG TREMLO

An army stands before the gates of the castle, silently awaiting the call to battle. In their hands they clutch their time-worn axes, bloodied but still razor-sharp as the day they were forged. For two decades, the legion of RG warriors has grown like a virus, thrusting the RG to the head of the metal pack. Fast, flat necks, rabid pickups and double-locking tremos combine to create sonic demons from beyond the world of mortals.

VBX60 Vibrato

Ibanez VBX60 Vintage Vibrato for solid body guitars.

HFS Pickup

The original construction of HFS pickups uniquely cancel the hum, maintaining the single coil's strong highs and clarity.

Jet King

For every futuristic vision, one must always look back and pay respect to the ways of the old. The Ibanez Jet King models harken back to a time when guitars roared through towns like hot rods, engines exposed and blaring.

THE SIMPLE TRUTH:

- New Vintage Vibrato on JTK4RD.
- New Ibanez original soap bar pickups on JTK3 models.

SV Prestige

The Knight of Swords is a powerful card in the Tarot deck and represents the massive energy of a stream-lined, double-edged weapon. The Ibanez SV is an extremely versatile axe that can deliver clear, searing violin-like tones as well as sheer destruction. Its True Duo pickups offer an astounding amount of tonal variations that can cut with precision as well as slash and lacerate.

THE SIMPLE TRUTH:

- Beautiful Ash and Flamed Maple Tops.
- SynchroniZR bridge w/ZPS-FX spring system gives total control and tuning stability.
- True Duo pickups w/push-pull volume knobs for massive tonal possibilities.

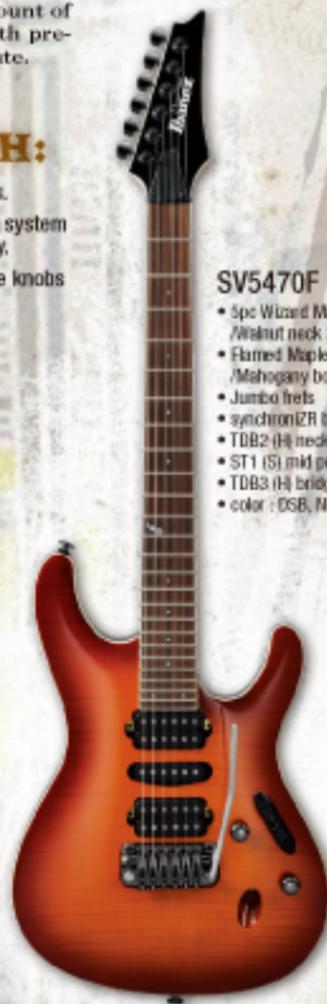

synchroniZR

ZR's tremolo revolution is finally available to non-locking tremolo players! Ibanez synchroniZR does not only feature the unreal smoothness of ball bearing pivot, the one piece saddle construction minimizing the unnecessary wobble and loss of string vibration. The tremolo arm is made of ultra-light Duralumin, which balances between the light weight bridge part with increased durability. The other ZR advantages such as the intonation adjustment and Arm Torque adjustment are inherited.

Auto-Tune Tuner

The smart design cuts excess string while the guitar is tuned. No extra tool is needed.

ZPS-FX

Paired with the synchroniZR tremolo, the SV Prestige features the simpler version of the Zero Point System. The ZPS-FX enables switching between Floating/Non Floating by simply turning the knob on the body back.

Double True-Duo PU

The True Duo Blast pickups on the SV Prestige maximize the True Duo advantage. The special wiring enables switching the PU configuration between H-S-H and S-S-S by one push/pull action.

SAT Pro II Tremolo

SAT Pro II Tremolo Bridge and Metal Pickup ring on the SAS36FM

THE SIMPLE TRUTH:

- Comfortable S shape, size and arched top with a standard flat back.
- Combination of mahogany, SAT tremolo and true single and true humbucking tones offers incredible versatility.

SAS set-in neck features strong 3pc construction and special neck finish for extraordinary comfort and playability.

SA

For the warriors who demand an even more different feel, the SA has another side: On top of the same S-Shaped, comfortable body with flat back, a powerful H-H pickup configuration, solid finish and gorgeous new inlay design make these axes devastatingly exquisite.

- Combination of mahogany, SAT tremolo and true single and true humbucking tones offers incredible versatility.

SZR

A heavier mahogany battle axe than the S, the SZR is thicker for more screaming, fat tone. The 24.75" scale neck clearly separates the demand of players who play those axes from its counterpart. The SZR contours make up for any weight difference with a physical comfort that's almost obscene.

SZR model's 60mm thick mahogany body with maple top.

The SZR's massive tone is also supported by the new original Neo2 pickups that feature the Neodymium, the strongest magnet for guitar pickups.

THE SIMPLE TRUTH:

- Fat mahogany tone.
- Set-in neck for more sustain and comfort.
- High output pickups with strong, state-of-the-art magnets.

ARTIST

In the old days, artisans would refine and re-approach ideas that had long been accepted. Ibanez's classic Artist Series has familiar shapes and designs, meticulously upgraded and re-vamped over time. Yet, re-introducing the original AR300 is not a step backwards, since superb Japanese craftsmanship is still hard to find despite 20 years of progress in guitar manufacturing.

THE SIMPLE TRUTH:

- Set-neck construction, superior hardware, warm mahogany tone and sustain.
- Widest choices available in set-neck guitars, covering different styles, price ranges and playing requirements.
- The AR300RE's original Tri-Sound switching system offers the choice of standard humbucking, single coil or parallel humbucking sounds by using the mini switch. Combined with the regular pickup selector, 15 different and distinct tone settings are available at your fingertips.

ARTIST

The total re-approach for the Artist model has created an arched-top, solid-bodied guitar with a single cutaway. Based on this old and new idea, the ART Series has forged a classic and practical sword, made to win the battle of Rock. Modern refinements include active lo-impedance pickups powered by AA batteries.

HRG

H. R. GIGER

H.R. Giger's vision of death is not for the squeamish. It's black as night, covered by textured scales and an elongated spine which wraps itself, snake-like, around the skulls of the past. Marry this imagery with a guitar as fierce as an Edge III-equipped RG and you have the Ibanez RGHRG1BKF, an instrument as darkly chilling as it is beautiful.

The RGHRG1's special textured head stock featuring the same Biomechanical Matrix design.

E-GEN

HERMAN LI

Blazing brightly on a stage in front of thousands, Dragonforce's Herman Li's speed and heat on the guitar is absolutely radioactive. Li demanded a guitar that would let him incinerate solos to a blackened crisp and Ibanez was happy to oblige. The E-GEN is a flame thrower forged in the flames of hell, an S with nuclear capabilities. Safety gloves not included.

"The E-Gen is THE electric guitar of the new generation. Fusing incredible diverse tones, playability and innovation into one single beautiful instrument, this is the sickest guitar I have ever played. Now I can take my guitar skills to the next level. From crystal clear sounds to shredding ripping metal, the E-Gen does it all!" -Herman Li-

GB

THE SIMPLE TRUTH:

GEORGE BENSON

"The GB15TR is a fresh idea with a simple approach. Don't be fooled by the single pickup, one pickup is all this guitar needs... you know what I'm talkin' about...ha ha!"

- Our longest running artist signature model celebrates its Thirtieth Anniversary in the U.S.A.
- Floating pickups, thicker top and a smaller full-acoustic body reject feedback.
- GB15TR adds single-coil tone to the array of GB10 colors.
- GB200 features full-sized, full-acoustic body and standard pickup installation for more traditional jazz gigs.
- Deluxe hardshell case included. GB15 includes deluxe gig bag.

THE SIMPLE TRUTH:

- The size of the traditional full acoustic jazz guitar but slimmer for better comfort, projection, and feedback rejection.
- Super 58 pickups feature the classic, warm tone. The PM120 features Silent 58 pickups of Super 58's with an anti-feedback treatment.
- Deluxe hardshell case included.

THE SIMPLE TRUTH:

- Substantial soundblock and a rigid top and body reject feedback.
- Sco's preference of Artist-style "castle" headstock to complement AS body for better tonal balance.
- Super 58 pickups produce classic, warm and versatile tone.
- Side mount output jack offers easier performance and offers less chance of damage than traditional semi-acoustic top mount jack.
- Deluxe hardshell case included

JSM

JOHN SCOFIELD

"The JSM100 is a perfect hybrid of a solid-body and an archtop. I love my guitar. We've grown up together in this business. I do the thinking, but it does the talking. We're quite a pair."

ARTCORE CUSTOM

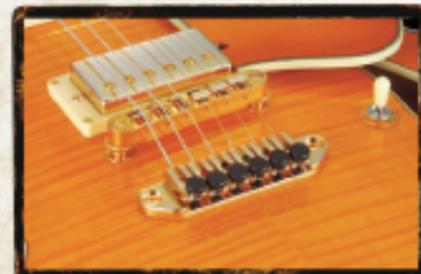

When the smoke had cleared in 2002, players, music store owners and the music industry press were stunned by the debut of the affordable Artcores. And in 2005, when Ibanez lifted the curtain on the exquisite Artcore Customs, there were murmurings of witchcraft and sorcery. How else could such beautiful instruments be produced at such alluring and enchanting prices?

THE SIMPLE TRUTH:

- The true-full-hollow AF models feature traditional pickup installation for traditional jazz gigs.
- AS103NT offers semi-hollow sustain, power, and feedback resistance.
- Deluxe hardshell case included.

Artcore Custom models feature 5pc maple/bubinga neck for extra strength and stability.

The Quik Change Ultra tailpiece features traditional looks but provides untraditionally quick and accurate fine-tuning adjustments.

The true full-hollow AK continues this artisan tradition with respect and detail. The AK eschews the brighter sound of maple tops and metal bridges and replaces them with spruce tops and all-wood bridges for the warmer sound favored in small group and jazz trio formats. Our AG body size offers a slightly smaller width than the AF traditional dimensions, but with the same depth and the true full-hollow body construction.

THE SIMPLE TRUTH:

- True full hollow construction
- AG95/AK95 feature 3pc mahogany neck, gold parts and Abalone inlays elaborated on the fingerboard and tailpiece.

Arcore Deluxe models feature VT1000X tailpiece decorated in gold.

AK95 DVS

AF

The AF is one of our most traditional full-acoustic lines with a large full hollow body that's truly full-hollow. Unlike many so-called "full acoustics" which feature soundblocks in the body, all Ibanez full acoustic guitars are completely full-hollow for the rich, complex tones you can only get from a true, full-hollow guitar.

THE SIMPLE TRUTH:

- The traditional large "jazz box" (but with 22 instead of the traditional 20 frets).
- 95 series models offer all-flamed sycamore bodies, gold hardware, abalone inlays and 3pc necks.

AFS

Always stick to tradition. At Ibanez, our tradition is to start with traditional models as the theme and then play our own variations such as the AFS. Our AFS starts with the classic large body width of the traditional AF, but utilizes a one-inch thinner depth for increased comfort and more mid-range punch.

AS

The defining feature of the semi-acoustic guitar is its sustain block (or sound block) into which the pickups are mounted for increased sustain and feedback elimination. The semi-acoustic is one of the most versatile electric guitars and can be found in every genre of popular music from jazz to rock and pop to punk.

THE SIMPLE TRUTH:

- Classic semi-acoustic construction, size and sound.
- Solid, stable and fully adjustable bridge and tailpiece.

AJD

It's perfect for smaller players, hyperactive stage performers or anyone else who wants the traditional semi-acoustic elements but not the traditional size.

THE SIMPLE TRUTH:

- The full tones, strong sustain and light weight of a semi-acoustic.
- The comfortable size and standout rock shape normally associated with a solid-body.
- Double-cutaway for easy access to upper frets.

Quik Change Ultra Tailpiece
The Quik Change Ultra Tailpiece on the AJD91 features traditional look but provides untraditionally quick and accurate fine-tuning adjustments.

ACT Tremolo
The first knife-edge tremolo designed for semi-acoustic guitar, the ACT eliminates the tremolo cavity that sacrifices the tone. Shorter springs use less vibrating room and contribute to a stiffer arm response. Two ways to install the springs offer choice in string and arm tension. And on top of all that, the ACT is smooth to the touch and string changes are easy.

AM

The Artoore AM body shape is an original early '80s Ibanez design that incorporates the classic semi-acoustic shape in a more compact and comfortable body size. It's perfect for smaller players or anyone else who wants the traditional semi-acoustic elements but not the traditional size.

THE SIMPLE TRUTH:

- The full tones, strong sustain and light weight of a semi-acoustic.
- The comfortable size and standout rock shape normally associated with a solid-body.
- Double-cutaway for easy access to upper frets.
- New AM73BBKF features a Black Flat finish, body and neck binding and exposed ACH pickups.

AGS

A guitar does not have to determine the type of music that is played. Ibanez Artoore has always sought to produce box guitars that rock. The semi-acoustic AGS features the same AG shape but with a thinner body and a soundblock for feedback reduction and increased sustain. The 17th fret neck joint assists easier higher fret access and the flat finishes complement both traditional and non-traditional styles.

THE SIMPLE TRUTH:

- Semi-acoustic body with a feedback-rejecting soundblock that increases sustain.
- 17th fret to the body joint for effortless upper-fret access.
- New AGS83BBGNTF features a Natural Flat finish and Bubinga top/back and sides.

The 2008 BTB basses took the traditional BTB formula--massive body and substantial neck-- and moved it forward. The new BTB Prestige, BTB600s and 400s feature neck-thru construction and deeper cutaways, enhancing playability and perfect balance. BTBs continue to have the right mix of select woods and high-tech appointments that provide the huge tones and sustain that BTB players have come to love.

The combination of the newly designed body and neck-thru construction enhance the playability of BTB670s and BTB470s. The Ash body provides for a relatively lighter weight without sacrificing tone (BTB670/675/676).

The core Soundgear philosophy has not changed since its debut in 1987 : a modern bass for players who want a thin, fast neck, and the ability to dial in any tone for any genre—from complex electric jazz to raging metal. The 2008 Soundgear has continued this tradition while adding a modern flavor. SRs are available in 4-, 5- and 6-string models with a wide variety of finishes.

THE BOTTOM LINE

- ★ THINNER NECKS WITH THINNER NUTS THAN TRADITIONAL BASSES.
- ★ LIGHTWEIGHT, BALANCED, COMFORT-CONTOURED BODIES.
- ★ ACTIVE EQ'S PERFECTLY MATCHED WITH THE RIGHT CHOICE OF PICKUPS.

With the ingenious ATK bridge, you have the option to string through-the-body for increased low end and more sustain, or through-the-bridge for slightly more high end and attack.

ATK's round, comfortable neck.

ATK's innovative triple coil pickup and active 3-band EQ allow you to dial in anything ranging from earthquake lows to skull-splitting highs.

One of the most versatile basses ever created, the ATK has a big, traditional neck and body, but that's where tradition ends and innovation begins. The ATK's triple coil pickup and remarkable Tone Character switch enables a player to make radical tone shifts with just a simple turn of a knob. Need a bass that can go from vicious, rocking metal to slap-happy funk to every other traditional tone you'll ever need? The ATK is your bass.

ATK THE BOTTOM LINE

SRX

HIGH OUTPUT

SRX

If the SR is the ambassador of the Ibanez bass line, the SRX is the enforcer, the bass that uses a little extra muscle to get the job done. Equally at home bashing through a set of metallic thrash as it is playing funky soul, the SRX's high-output, passive pickups can both move mountains and smooth the rough seas. For 2008, Ibanez introduces the SRX 750/755, a massive bubinga/ash monster that really can drop the heavy low end.

ICB

THE BOTTOM LINE

- ★ MASSIVE MAHOGANY BODY DELIVERS ABSOLUTELY HUGE TONES.
- ★ ACTIVE ELECTRONICS ON THE ICB300EX "ICEMAN EXTREME."

The most recognized radical shape in rock exudes metallic menace and becomes a call to arms by simply taking it out of the case. The ICB basses have attitude to spare and a fat, mahogany tone that says 'the army is at the gate—let's rock.'

The low, murderous tones of Slipknot rumble the ground beneath your feet and threaten to melt your spine. They're coming from Paul Gray's Signature PGB bass and it's a sound that's not to be trifled with. The PGB has an ATK triple coil pickup and 3-band EQ and, using the Tone Character switch, tones can be manipulated into as many shades of chaos as your warped imagination can think of.

PRB

MDB

Sometimes the simplest statements are the most revolutionary. Shadows Fall bassist Paul Romanko's Signature PRB1-BWF is a streamlined SRX with one volume control to, naturally, turn up all the way. The rest is left to the individual's free will. Ibanez recommends a strict ideology of rocking hard.

Paul Romanko
Shadows Fall

THE BOTTOM LINE

- ★ MONO-RAIL IV BRIDGE: COMPLETE STRING TO STRING ISOLATION/FIXED BASS SADDLES FOR FIRM BASS TONE.

Sometimes straight-forward brute force is the only answer. Killswitch Engage's Mike D'Antonio would agree. His Signature MDB1, modeled after the SRX700, has a simplified control layout of only one volume control with all tone controls set internally at mid-point. Mike's striking Medusa snake graphic basically says "I'm gonna tread all over you."

The new generation Tone Blaster X series amps were designed and created to answer the needs of today's guitarist. The parametric mid EQ allows you to dial in any tone you're looking for in an instant. The exclusive X mode allows you to get monstrously heavy and lets you cut through the din of the loudest rhythm section. The gain control in the normal channel can be dialed down to give you anything from a clean jazz tone to a crunchy, slightly overdriven rock'n roll tone. Plug in and express yourself with TBX.

A 11-Tube Guitar Amplifier

Thermion

The 120-watt Thermion features only the finest top-shelf, military-grade components...all in the service of a design that considers every aspect of modern playing from tone to transport. But the most important spec is this: Thermion is all-tube. There is absolutely no solid-state circuitry in the signal path. So you've got the tones, power and control you need to conquer every album track, every stage, every city, and ultimately, the entire universe (admittedly, that may take a little time).

TN120 THERMION™ Ibanez all-tube amplifier

- 120W 5%THD @4, 8, or 16 ohms
- All tube signal line circuitry (NO SOLID-STATE!) with mechanical relays
- 4 x 6L6GC/MSTR MATCHED Ruby Tubes™** output tubes (user switchable to 6550s)
- 5 x 12AX7A-SELECTED Ruby Tubes™** preamp tubes
- HVLD Input impedance switch
- Two independent channels: Vintage Channel & Hot Channel
- Tube circuit Effects Loop w/Send and Return Level Control on the front panel and Blend/Serial switch on the rear panel.
- Illuminated front panel and illuminated Ibanez logo
- Dampening switch enables different distortion characteristics out of Hot channel
- Rotary 3-position Bright switch in Vintage channel
- Traditional passive EQ in both channels
- 3-button footswitch for Channel switching, Dampening and Effects Loop on/off.
- Maintenance friendly, professional-grade design includes bias adjustment interface for output tube replacement on top of chassis, IEC 60065 compliance, high efficiency toroidal core transformer with automatically resetting thermal fuse, durable 3/4" plywood cabinet, heavy-duty toggle switches, potentiometers with dust-covers, and more.
- Size : 740 (W) x 290 (H) x 260 (D)
- Weight: 24kg

JEMINI & TUBE KING

Jemini
distortion

JEMINI
-Steve Vai Signature Distortion Pedal-

After developing so many guitars with Steve Vai, the long wait for this pedal has all been worth it. All aspects of the JEMINI are expressions of him, as are his axes. Within the multi-colored die-cast casing, two identical distortions are built in for a variety of sonic occasions; and the unique large LEDs tell you they are in operation not only on a dark stage, but even under the daylight. Not just a hair distortion pedal, the Ibanez JEMINI powers you and your axe up as it does Steve and his guitars.

TUBE KING
DISTORTION

TK999HT

When it comes to genuine tube distortion in a stomp box, the Tube King TK999HT rules. Featuring an actual 12AX7 tube, 3 band EQ & Drive controls along with Presence switch, the Tube King generates a wide variety of tones, including thick, singing distortion and outrageous heavy metal distortion. Also with its unique VOID function, it eliminates the noise and helps to create sharp rhythmic expression with heavy distortion. Housed in a unique shaped rigid die-cast case with visible tube through the transparent window, the Tube King will reign forever.

TS808 & 9series

When it comes to compact effects, nine is the magic number. There are sound reasons why, twenty-five years after they were first made, you still see these effects in players' rigs. If you missed out on getting one of these classics the first time around, it's time.

TS808 TUBE SCREAMER

The TS808 reissue, described as "the Holy Grail of Tube-screamers", features the same famous standard square footswitch of the original and the even more famous warm tones of the JRC4558 chip used in most of the original TS808's. Ignore any over-the-counter look-alikes. If your tone is suffering from a lack of real warmth, the TS808 is the real, non-generic prescription.

TS9 TUBE SCREAMER

The warmth of tube amps has been the goal for most of the over-drive pedals that exist. However, the Tube Screamer has been the choice 2nd to none by people searching for the best, because it lets the guitar sing so well in its original voice. The tone can be heard in playing by countless musicians over the years and still keeps fascinating new generations.

TS9DX TURBO TUBE SCREAMER

"The Tube Screamer", TS9 had evolved on the same platform of TS9. The TS9DX offers three different settings for increased low end crunch: +, Hot, and Turbo, all of which maintain the original TS9 tonal integrity.

FL9 FLANGER

After more than a decade of digital, analog pedals made a quiet come back, because guitar players don't always equate fidelity with quality. Having said that, the Ibanez FL9 has eliminated the unnecessary click noise and provides a wide range of flanging effects with the 4 practical knobs, including the delay time.

CS9 STEREO CHORUS

Advances in technology sometimes declare gear obsolete in disregard of existing demand. The Ibanez CS9 features the sought out BBD IC to replicate the original chorus effect with the two simple controls. Stereo outputs enable creation of an indefinite sound space by using two amps.

AD9 ANALOG DELAY

Analog delay was the hot topic in the music industry when it was first introduced. It changed the whole effort to obtain echo sound into just switching and turning knobs. And nowadays everyone has access to the effect, with much more exact repeat sounds due to digital technology. However, the warmth of analog delay has many adherents that will never be satisfied with its digital counterpart.

DC3&DC5

Splitter cords for powering 3 or 5 pedals from one adapter.

AC109

Standard 9-volt 200mA regulated adapter for Ibanez compact effects.

AC509

Standard 9-volt 500mA regulated adapter for Ibanez compact effects.

TONE-LOK

EFFECTS PEDALS

On the inside, Tone-Lok pedals feature hi-fidelity components carefully tweaked with the constant input from a new generation of Ibanez players. And all this great stuff comes encased in cool looking, road tough metal boxes at prices the working player can afford.

On the outside, Tone-Lok effects are equipped with our exclusive "set and forget" Push-Lok rotary pots. Push the knobs down and your tone settings lock securely inside the case. No more lost settings or knobs broken.

WD7 Weeping Demon

The most variable and controllable guitar wobble you can get. The Weeping Demon's shakers, cranks, wails and seductive other ranges will have your audience screaming for more. The Weeping Demon features spring and normal footboard action, selectable wah range, fine tuning controls and more.

TC7 TRI-MODE CHORUS

Are you bored with normal chorus pedals? If so, the new Ibanez TC7 will bring the thrill back. The TC7 can create three types of chorus with the combination of two in-divided chorus circuits. It truly expands your guitar's expressiveness.

SM7 Smash Box

The Smashbox is the most aggressive weapon in the Tone-Lok distortion arsenal. Armed with obscene amounts of gain, tight low end, and searing highs, the Smashbox is THE heavy rock sound for the contemporary guitarist.

SH7 7th Heaven

Designed specifically for 7-string guitars with the input from some of Ibanez's hottest 7-string players, the SH7 Seventh Heaven distortion pedal accentuates the low-end girth of the 7-string while reducing unwanted string noise. A special mode switch allows you to choose between two different distortion voicings while Lo, Hi, Drive, and Level knobs give you total tone control. An analog master effect for replicating the best 7-string sounds at others or creating your own individual tone.

DS7 Distortion

The most versatile basic distortion pedal ever, capable of producing a wide range of smooth, dynamic overdrive tones. From a subtle tonal nudge to wall-popping rock'n'roll crunch, the DS7 delivers doses of sustain and jabs of gain.

TS7 Tubescreamer

The Tubescreamer isn't just a stompbox, it's an institution. Our latest generation Tubescreamer, the TS7, is no exception. With the Tubescreamer's classic subtle-but-smooth overdrive, the TS7 spreads the expressiveness of your guitar while maintaining its tonal integrity. Tone adjustments are provided by the classic three knob configuration with its added "Tilt" switch for an extra gain boost.

FZ7 Fuzz

Far out! A complete 60's flashback with some of the drivebacks, the FZ7 is the ultimate in psychedelic fuzz. With the FZ7's tone, drive, and level controls, it's never been easier to get the right retro tones. You can even engage the DAMAGE switch for that truly broken speaker sound. "Yeah, baby, yeah!" Dial it, turn up, drop down or whatever turns you on.

DE7 Delay/Echo

Add new dimensions to your sound with the DE7 Delay/Echo pedal. Get the best of both worlds: high tech digital sounds compatible to expensive rack units at warm vintage tape echo sounds—all with a simple flick of the switch. TIME, REPEAT and LEVEL controls help you dial in just the right amount of delay, while stereo outputs can be used for a more spacious sound. With a range of 30ms to 2.6 seconds, the DE7 is the only solid solution for every playing situation.

PH7 Phaser

Designed to enable the effect of a rotating speaker, the PH7 has a switchable phase circuit capable of either four or eight stages of smooth phasing. With these two very different tonal modes, you can go from a subtle shimmer to full-on "70's" Let's Get Funky phasing.

PM7 Phase Modulator

If you've gone through one phase after another, maybe it's time for the real phase. The PM7 Phase Modulator offers three types of waveforms to give you everything from classic phaser to DJ effects to try the gain sounds. Since good things come in threes, the PM7 also has three phase stages: vintage, deep and dry, and deep and pronounced. With some minor tweaking, the PM7 goes from traditional to 21st century and beyond.

AW7 Autowah

There are autowahs. And there are autowahs. But the Tone-Lok AW7 isn't just an autowah. It's got standard wah when both the highs and lows are cut and it's got a wah effect when only the highs are cut. And it's got distortion. Band Pass Filter provides the sound of a standard wah pedal with an added boost. You can even change the drive order of the effects to get different tones, either distortion to wah or wah to distortion.

LF7 Lo Fi

The first dedicated filter pedal for the guitar, the LF7's vintage controlled analog high and low pass filters allow you to emulate transistor radio and response type sounds. Best used at the end of a signal chain in combination with other pedals, this locking tone bomb creates wide soundscapes of far out tones that previously required a massive rack of analog electronics. The Lo Fi also performs equally well with rock, drum machines, or in any "rockdown" context.

PD7 Phat-Head Bass Overdrive

Why let guitarists rule the stage? Loaded with growing low-end distortion, the PD7 levels the playing field for the rock bassist. The PD7 is armed with three pre-amp style sound types and an attack control switch, which accents the amount of harmonic content in your sound. With DRIVE, LO, HI, and LEVEL knobs, dialing in a fatter bass sound has never been easier.

SB7 Synthesizer Bass

If you're looking for new tones, or you're still considering with resentment against synth bass keyboard players, the SB7 is the ticket. You've got real, live feel—in other words, no copying tracking errors and delays. You can even play chords.

Tuners

LU20 PEDAL TUNER

This tuner features a durable diecast housing and LED display with a three-color indicator for maximum visibility from the floor. It also features a true bypass on/off switch for the truest tone and a muting function.

LU10

Wide-size easy-to-read chromatic LED tuner.

GU40BL

Guitar and bass tuner available in blue, red or silver. Manual and automatic tuning. Output jack for effect board use. Internal speaker.

GU40RD

GU40SL

CU40

Chromatic Tuner

MU40

Chromatic tuner & metronome

PU10 -Clip Tuner-

The new Ibanez PU10 tuner is designed to tune electric and acoustic guitars, basses, violins, banjos, mandolins, and more without interference from ambient room noise. It does it all without the use of wires, microphones, or pickups. Tuning in noisy environments is a snap because the unique, flexible clamp actually feels the instrument's vibration instead of relying on sound. The 4 hinges on the PU10 allow a perfect view of the tuner's LCD display from nearly any angle.

RU10 -Jam Tuner-

There is no doubt that tuning is important. However it is just preparation, when your goal is to be playing guitar and having fun. With the Ibanez RU10, Jam Tuner, you can do both without firing up your amp. Besides functioning as a chromatic tuner, the RU10 combines a metronome and the Rhythm Play function that features preset rhythm patterns to play along with. The gain control enables you to produce an amazing, real deal distortion sound out of the built-in speaker, letting you jam right away.

Picks

Ibanez offers picks for just about every type of player with different feels, functions and looks. Function wise, the Grip Wizard series feature sand or rubber grips for superior gripping ability. Look wise, Ibanez offers a selection of original metallic colors and other unique colors and designs. And then there is the signature line of picks that are exactly what the artists use in most cases. In fact, Steve Vai won't use anything but his signature Ibanez picks.

Basic Color Series

Also, Ibanez covers the basic picks with orthodox shape color. You can choose from 5 kinds of shapes and 2 kinds of material.

Ibanez Classic Design Series

Three of Ibanez' legendary icons are now featured on picks — "Flying Finger", "Tree of Life" and a new design derived the "Ibanez checkmark".

Grip Wizard Series Rubber Grip

Non-slip rubber softly fits your finger. Available on polyacetal, or super hard PPS material picks.
