2014: YEAR OF THE ESP

Welcome to our 2014 product preview guide. Inside you'll find information on our 2014 line of guitars and basses, but this is by no means a complete listing of every available model. Although both the ESP Original Series and the USA Series are shown in their entirety, the LTD and E-II lines are highlighted by selected models only. For detailed specifications of all products, ESP news, reviews, videos and more, please visit us at espguitars.com.

2014 marks a very important year for ESP. We've put together a much wider selection of products to accommodate the needs of more musicians than ever before. At the top is our world-renowned ESP Custom Shop, with hand-crafted instruments by the world's finest luthiers. Our new ESP Original Series consists of a number of brand new designs along with some classic ESP shapes, and represents our premier level of quality production models. For the first time in our history, we've also opened a USA manufacturing facility to build our new ESP USA Series instruments. Also new for 2014, our ESP E-II Series includes some of the new designs appearing in the ESP Original Series, plus many classic ESP shapes. E-II models are all manufactured in Japan by ESP. Furthermore, we've expanded our famous Signature Series and the ever popular, more affordable LTD product offerings.

We're positive that no matter what your needs may be, there is an ESP that is perfect for you.

RB SERIES NEW BASSES

The new RB bass series has been a labor of love, passion, and hard work which has resulted in a very special lineup of new basses for 2014! The product team at ESP worked with bass legend Rocco Prestia (Tower of Power) for over a year to design and build an instrument that would not only become his own personal bass of choice, but one that would offer players unprecedented flexibility in tonal options. RB basses utilize unique features including Aguilar J and P pickups, Aguilar OBP-2 preamps, and gorgeous spalted and burl maple finishes in 4-, 5-, and 6-string versions.

ROCCO PRESTIA

As the bassist for Tower of Power, Rocco Prestia is a world-renowned player whose technique as a master of fingerstyle funk has influenced thousands of musicians. His percussive sound and melodic bass lines are immediately identifiable, and he is held in high regard as one of the founders of modern bass playing.

This has been both business and pleasure at its best! It has truly been a wonderful experience working with the entire team here at ESP. They're pros from the top to the bottom, and I'm very happy to be a part of this family now.
