

Cimar Electric Guitars

Cimar Astra Series Electrics

Cimar Astra series electrics have all the most asked for features at a very modest cost. Their appearance and sound is on a par with instruments costing several times the price.

The Astra series also offers three different types of body and neck construction. Astra 2085 models feature a neck that runs the full length of the instrument and 2083 and 2080 models feature standard built-in or detachable necks respectively.

When you add up features and value, it's hard to beat the Cimar Astra Series.

ADJUSTABLE TORQUE MACHINE HEADS

The Astra 2085 also features adjustable torque, die cast machine heads. The action of the machine heads can be adjusted from light to heavy to suit any player's taste.

MAGNA-6 PICKUPS

Cimar Magna-6 pickups offer the hot output and classic appearance you're looking for. The cream-colored coils are wound for very high output and the high power ferrite magnet and adjustable polepieces assure you of brightness and balance.

BRASS NUT

Astra 2085 and 2083 feature a solid brass head nut for improved sustain and better balance between open and fretted notes.

FULL-LENGTH NECK AND SMOOTH HEEL

The neck of the 2085 Model is laminated from rock maple and select walnut. It runs the full length of the guitar for the best possible sustain and extreme rigidity. Because there is no neck-to-body joint the heel of the neck can be made smooth for easy action in the upper register.

DUAL-MODE PICKUP SWITCHES

The Magna-6X pickups on the 2085 Model each feature a special two-way mode switch for added versatility. The switch converts the pickup from a standard humbucking to a parallel wired humbucking. This changes the tone from a thick warm humbucking sound to a bright, full sound much like that of a single coil pickup.

EBONY FINGERBOARD WITH ABALONE MARKERS

The Astra 2085 is one of the few guitars in its price range to offer the superb feel and luxury of a select ebony fingerboard. The dot-style position markers are genuine abalone.

FOUR OCTAVE FINGERBOARD

All Astra Series guitars feature a 24-frets fingerboard for four full octaves of playability.

ASTRA 2085

The Astra 2085 has all the deluxe features you could ask for. The maple and walnut neck runs the full length of the instrument and the ash body sections enhance both the appearance and sustain. Magna-6X pickups, gold plated hardware, Dual-Mode switches and a distinctive 4 x 2 peghead are but a few of the many fine points of the 2085.

Body:	Ash / Maple laminated
Neck:	5-piece laminated rock maple and Walnut entire length of instrument, 24 frets
Fingerboard:	Polished ebony, Abalone dot inlays, Solid brass nut

BS

UNIQUE LAMINATED BODY

The body of the Astra 2083 is laminated from beautiful Judas wood accented with walnut stripes.

MAGNA-6 PICKUPS

The Astra 2083 models have two of the warmest sounding humbuckers in captivity - the Magna-6's. These classic design pickups are specially made for the Astra series.

DUAL-MODE PICKUP SWITCHES

The Dual-Mode pickup switches of the 2083 allow you to select between standard humbucking and parallel humbucking modes for each pickup for a wide variety of sound possibilities.

ASTRA 2083

The Astra 2083 Models perform as good as they look. Their striking appearance is only the beginning of their appeal. The Magna-6 pickups literally pour out warm and clear tones while the long-scale rock maple neck is an effortless joy to play.

Body: Judas wood, walnut two stripes
 Neck: Laminated rock maple, bullet, 24 frets
 Fingerboard: Ebonyized rosewood, Abalone dot markers, Solid brass nut
 Pickups: Cimar special Magna-6X

MAGNA-6 PICKUPS

The Magna-6 pickups on the Astra 2080 have a classic appearance and a sound to match, the warm, familiar sound of the Magna-6 is full, rich and pleasing. The output is also considerable hotter than other pickups of this type.

DUAL VOLUME AND TONE CONTROLS

In order to let you balance your sound the way you want it, the Astra 2080 features individual volume and tone controls for each of the two Magna-6 pickups.

ASTRA 2080

The Astra 2080 Models while reasonable in price, give you features like Magna-6 pickups and a four-octave fingerboard. The straight ahead approach of the 2080 gives you all the performance you expect without frills.

Body: Solid Mahogany
 Neck: Laminated rock maple, detachable, 24 frets
 Fingerboard: Ebonyized rosewood with Pearloid dot inlays and bone nut
 Pickups: Cimar Special Magna-6X
 Bridge & Tailpiece: Cimar Specially designed, Heavy chrome
 Controls: Dual volume and tone controls, 3-Position Pickup selector
 Machine Heads: Cimar Chrome Machine heads
 Hardware: Heavy chrome plated
 Available colors: Antique cherry (AC), Black (BK), Brown Sunburst (BS), Wine Red (WR)

XR MODELS

The entirely new line of Cimar XR Model electric offers many improvements over other guitars of similar construction. From the high output pickups to the solid brass bridge saddles, the XR Models have all the updated features you could want.

HIGH OUTPUT SINGLE COIL PICKUPS

The pickups featured on the XR Models are wound for increased output over similar single coils. This added output results in a sound that is big and full. Because of their single coil design, XR pickups have extended high frequency response for bright, ringing chords and crystal clear solos.

FIVE POSITION PICKUP SELECTOR

The five position pickup selector on the XR Models allows you to select any pickup individually or front/middle or rear/middle combinations.

DIE CAST BRIDGE WITH SOLID BRASS SADDLES

The XR bridge is heavy die-cast metal and the bridge saddles are solid brass. This combination provides the utmost in sustain and quick response.

- Body: No.2075: Balsa wood on Mahogany body or solid Mahogany
- No.2076: ABR Body
- Neck: Laminated rock maple, detachable, 22 frets
- Fingerboard: Rock maple (2075) Ebonyized rosewood (2076) with pearl dot inlays
- Pickups: Three Cimar XR single coils
- Bridge & Tailpiece: Cimar Die-cast bridge with solid brass saddles
- Controls: Individual volume and tone, 5-position Pickup Selector
- Machine Head: Cimar chrome machine heads
- Hardware: Heavy chrome plated
- Available colors: Antique Brown(ABR), Amber(AM), Transparent Ivory(IV), Black(BK), Wine Red(WR), Brown Sunburst(BS)

XR BASSES

Cimar XR basses offer clarity, punch and superb feel at a modest price. Available as either single or double pickup models, and in a variety of finishes, XR basses are one of the best values on the market.

DIE CAST BRIDGE WITH SOLID BRASS SADDLES

The XR bass bridge is precision die cast from zinc alloy and features solid brass barrel-type saddles for excellent sustain. Each saddle is individually adjustable for height and intonation length.

XR BASS PICKUPS

XR bass pickups are single coil designs with a wide frequency response for a pure and clean sound. You'll be well pleased with punch, clarity and excellent output of the XR bass.

- Body: 2065 & 2067: Balsa wood on Mahogany body, 2066 & 2068: Ash body
- Neck: Laminated rock maple, detachable, 20 frets
- Fingerboard: 2065 & 2067: Rock maple, 2066 & 2068: Ebonyized rosewood
- Pickups:
 - 2065 & 2066: Cimar XR Basses two single coils
 - 2067 & 2068: Cimar XR Basses one single coil
- Bridge & Tailpiece: Cimar Die-cast bridge with solid brass saddles
- Controls: Individual volume and tone, (2065 & 2066: 3-position Pickup Selector)
- Machine Heads: Adjustable: Tunege, Heavy chrome machine heads
- Hardware: Heavy chrome plated
- Available colors: Brown Sunburst(BS), Antique Brown(ABR), Amber(AM)

SC Series

SC MODELS

Cimar SC models feature a graceful single cutaway body and the warm sound of Magna-6 humbucking pickups. The bodies are constructed of carved Judas or carved maple on mahogany for excellent response and sustaining power. The 2060 and 2061 Models feature a built in mahogany neck and deluxe die-cast tuning machines.
