California Series Models

A combined effort by our guitar makers in Corona, California, USA, and Ensenada, Baja California, Mexico, the California series of instruments represents one the best values in classically styled Fender guitars and basses. All California series guitars and basses are produced along the Pacific Coast Highway. First the bodies and necks are cut and shaped in Corona. Then, they're sent to Ensenada where they're sanded, painted and buffed. Final assembly is then performed in Corona using genuine Fender hardware and electronics.
