Sporting a super-charged HSH configuration, Dave's Strat features a Dimarzio® PAF® 36th Anniversary DP103 neck pickup, and a Dimarzio® Super Distortion® DP100 bridge pickup coupled with a Fender vintage style middle pickup, a lacquer finish, and a flatter soft "V" shape neck with satin back. Ritchie and Fender are now proud to introduce the Ritchie Blackmore Signature Strat. Based on his favorite 70's Stratocaster®, the guitar features a maple neck with a graduated scalloped rosewood fretboard, Seymour Duncan® Quarter Pound Flat™ pickups, and 70's style "F" tuners. JA-90 TELECASTER®

539 (Ebony Transparent)

When platinum selling Jimmy Eat World guitarist/frontman Jim Adkins cheerfully challenged Fender by throwing down the gauntlet of designing his perfect guitar, a collaboration began that resulted in the new JA-90. We sat down with Adkins and went over his old Fender TC-90 spec by spec, making some important changes that subsequently produced this unique new model. Features include a mahogany neck set into a semi-hollow ash body, Seymour Duncan® soapbar pickups, independent volume and tone controls, and an Adjusto-Matic™ bridge with anchored tailpiece. "Sweetness," indeed! Case Not Included.

ROAD WORN™ '60S STRAT®

300 (3 Color Sunburst)

The Stratocaster® really came into its own in the 1960s, with players coaxing unbelievable sounds from it amid punishing stage shows and grueling tours. Beaten, bruised and even burned, they only got better as the years wore on—looking even cooler and feeling even more comfortable. Fender's new rosewood-fretboard Road Worn™ '60s Strat® delivers that aged look and feel—built to look, sound and feel like it's got more than just a few miles on it, designed with 1960s specs, including a nitrocellulose-lacquer finish, and supercharged with Tex-Mex™ pickups and 6105 frets. Includes Deluxe Gig Bag

ROAD WORN™ '50S STRAT®

303 (2 Color Sunburst)

Few things in this world have gotten cooler with age than the Stratocaster® guitar. Born in the '50s, they became even cooler after years of use (and abuse) on the road—morphing over time to look appealingly battered and feel even better than when they were brand-new. Fender's new maple fretboard Road Worn™ '50s Strat® delivers that aged look and feel—built to look, sound and feel like it's got more than just a few miles on it, designed with 1950s specs, including a nitrocellulose lacquer finish, and supercharged with Tex-Mex™ pickups and 6105 frets. ROAD WORN™ '50S TELE®

303 (2 Color Sunburst)

The first Fender® workhorse; the original road warrior guitar. Fender's long road begins with the Telecaster®, a guitar that amazingly looked even cooler and handled even better the more players heaped wear-and-tear on it—great when brand-new but positively phenomenal with a few thousand miles on it. Fender's new maple-fretboard Road Worn™ '50s Tele delivers that aged look and feel—built to look, sound and feel like it has survived half a century, designed with 1950s specs, including a nitrocellulose-lacquer finish, and supercharged with Tex-Mex™ pickups and 6105 frets. FENDER® BASS AMPS

FREE YOUR MIND AND YOUR BASS WILL FOLLOW

● **TB-1200 HEAD**

TBFS-4 Footswitch

The PRO series TB-1200 combines 1,200 watts of earth-shaking power with total tonal finesse and versatility to produce thick, natural and balanced Fender bass tone that sits perfectly in the mix, be it recording studio, club gig or concert stage. Based on the acclaimed TBP-1 tube bass preamp, the key to its sound is the passive tone stack—the backbone of classic Fender guitar and bass amps—in which each control knob setting affects the sound of the other controls, producing big, warm notes that are the natural sound of a bass guitar. An overdrive section (Gain, Volume and Blend) sits on top of the clean channel, allowing you to dial in tones from a subtle grind to full on overdrive. Vari-Q™ is a smart semi-parametric EQ with a user selectable frequency and a cut/boost of 15 dB. When boosting frequencies, it automatically widens the focus of the Q for a broader, more musical boost. When cutting frequencies, it automatically narrows the focus of the Q for a well-defined cut (notch). This intelligent Q control keeps “on the fly” operation simple and effective. Room Balance is a global EQ shift for cabinets/ stage response. Clockwise turn cuts lower end frequencies while simultaneously raising upper frequencies. Counter-clockwise brings up lower end frequencies while simultaneously lowering upper frequencies. This knob does not affect the XLR out, so you can “dial in the stage” while giving the soundman an unaltered signal. Free your mind and your bass will follow. Four-button TBFS-4 footswitch included.
