American Professional Telecaster® NEW!

Fender is guided by one clear, simple directive: make life better for musicians. While the original Telecaster certainly did that (and then some), we weren't content to rest on our laurels. Our team of mad scientists examined every component in near-microscopic detail. If we were able to improve it with a new design or modern materials we did; if it didn't need improvement, we left it alone. When the wood chips and solder fumes settled, what was left was the American Professional Telecaster—everything you need to play your best.

American Professional Telecaster® Deluxe Shawbucker™ NEW!

In the late '60s and early '70s guitarists wanted hum-free tone based on the sound of an amp about to blow up. You asked—so we listened and created the Telecaster Deluxe in 1973. Today's version, the American Professional Telecaster Deluxe Shawbucker, brings modern, player-oriented features to the stage and studio, and can still make an amp sizzle without breaking a sweat.

American Professional Jaguar® NEW!

An eye-catching adventurous design—an exercise in chrome, plastic and wood—the Jaguar guitar's delightfully off-kilter aesthetics and unique sound made it a darling of underground artists from the '70s to today. Though it was the pinnacle of guitar technology when it was released in 1962, time (and technology) marches on so we updated the Jaguar with modern features and materials, hot-toddling it for today's players. The result? The American Professional Jaguar—a dangerous instrument with bite.

American Vintage

The American Vintage series introduces an all-new lineup of original-era model year instruments that bring Fender history and heritage to authentic and exciting new life. With key features and pivotal design elements spanning the mid-1950s to the mid-1960s, new American Vintage series instruments delve deep into Fender's roots—expertly preserving an innovative U.S. guitar-making legacy and vividly demonstrating like never before that Fender not only knows where it's going, but also remembers where it came from.

Rather than just replacing the previous models with different ones, we've completely and comprehensively re-imagined the entire vintage-reissue concept—restoring original tooling dies, voicing new pickups, reformulating vintage colors and more—based on actual vintage Fenders we tracked down to make sure we had it right. We did the work, and it shows, because there's pure tonal magic in each new American Vintage instrument.

Starcaster® Bass

Aged Cherry Burst

One of the rarest Fender instruments ever. Only a handful of prototype semi-hollow Starcaster Bass models appeared during the mid 1970s, distinctive as the only offset semi-hollow bass guitar in Fender history, to say nothing of its two enormous humbucking pickups. After decades of virtually faded status, the electrifying Modern Player Starcaster Bass offers superior sound, build and beauty ideal for bassists with a flair for appealingly unconventional Fender style. With its thin semi-hollow offset body with stylish f holes, short scale (30"), dual humbucking bass pickups and much more, you could say the Starcaster Bass is "better than it never was."

CN-90 Classical

Natural

The very first guitars didn't have steel strings, nor were they amplified; those are relatively new developments in the history of guitar. Instead, the classical guitar was the origin of guitar-based music, with a tradition that's continued for hundreds of years. With the CN-90, Fender provides a classical acoustic guitar that offers all of the modern features along with the design practices that date back to the Renaissance. The CN-90 is Fender's most affordable full-size nylon-string guitar, with fine appointments such as a spruce top with fan bracing, a mahogany neck with rosewood fingerboard, and other elements worthy of higher-end instruments. A great choice for players who want to get into classical guitar without breaking the bank.

From Stratocaster® headstocks to custom colors and more, the California series resonates with Fender's innovative '60s-era acoustic legacy.

With the Tim Armstrong Hellcat-12, that same classic vibe is offered in a 12-string version that simply rocks. Whether it's all-folk tunes at the college coffeehouse or slamming punk with a band, the Hellcat-12 combines great acoustic tone with versatile onboard electronics and a satin body and neck finish for smooth playability, all at a surprisingly low cost.

The Nohea's lovely koa body is accentuated by an acrylic abalone rosette and binding, and its sound is shaped by fan bracing and a bone nut and bridge saddle.

The Rumble Series is a mighty leap forward in the evolution of portable bass amps. Re-engineered from the ground up, Rumble amps are lighter and louder than ever, with even more power and classic Fender® vibe. A newly developed foot-switchable overdrive circuit and versatile three-button voicing palette deliver powerful tones ideal for any gig. Additional upgrades include Eminence drivers* and upgraded HF compression tweeters (available on select models).

Rumble Series speaker cabinets have been re-voiced to produce a superior level of sonic detail and low frequency translation. For even greater performance and convenience, all Rumble cabinets are equipped with Fender's patented Magnetic Rumble Head-Attachment System.
