schechter c-1 elite c-1 classic

schecter c-1 e/a electric/acoustic semi-hollow

# c-1 e/a electric/acoustic semi hollow

the ultimate in sonic versatility

the new c-1 e/a combines the mellow warmth of a vintage hollow body with addition of true acoustic tone and clarity; courtesy of a specially designed rmc piezo loaded tonepros bridge.

the duncan design humbuckers (magnetic) and piezo acoustic signals can be played separately or combined together for exciting new tonal possibilities!

**c-1 e/a**  
construction: set-in  
body: mahogany w/ quilted maple  
neck: maple

**usa** *Schecter Custom*

**"custom shop" and "custom built"...** both popular guitar company buzz phrases from a few years ago seem to have disappeared again.

The internet has bred a smarter consumer who now knows that even the most popular hand-built guitars are in reality not much more than high priced cookie-cutter instruments mass produced by CNC copy carvers running 18-20 hours a day!

From our conception in 1976, Schecter Guitar Research was the original California custom shop. This hasn't changed in over 25 years! Our new Burbank facility houses a modest 1,000 sq. ft. custom shop with two master luthiers building custom-ordered guitars by hand... plain and simple. No computers or duplicators, just old school hand tools, saws, sanders and a pair of pin-routers. Not too exciting to look at, but when you turn through the following pages, you will certainly see that the instruments produced certainly are.

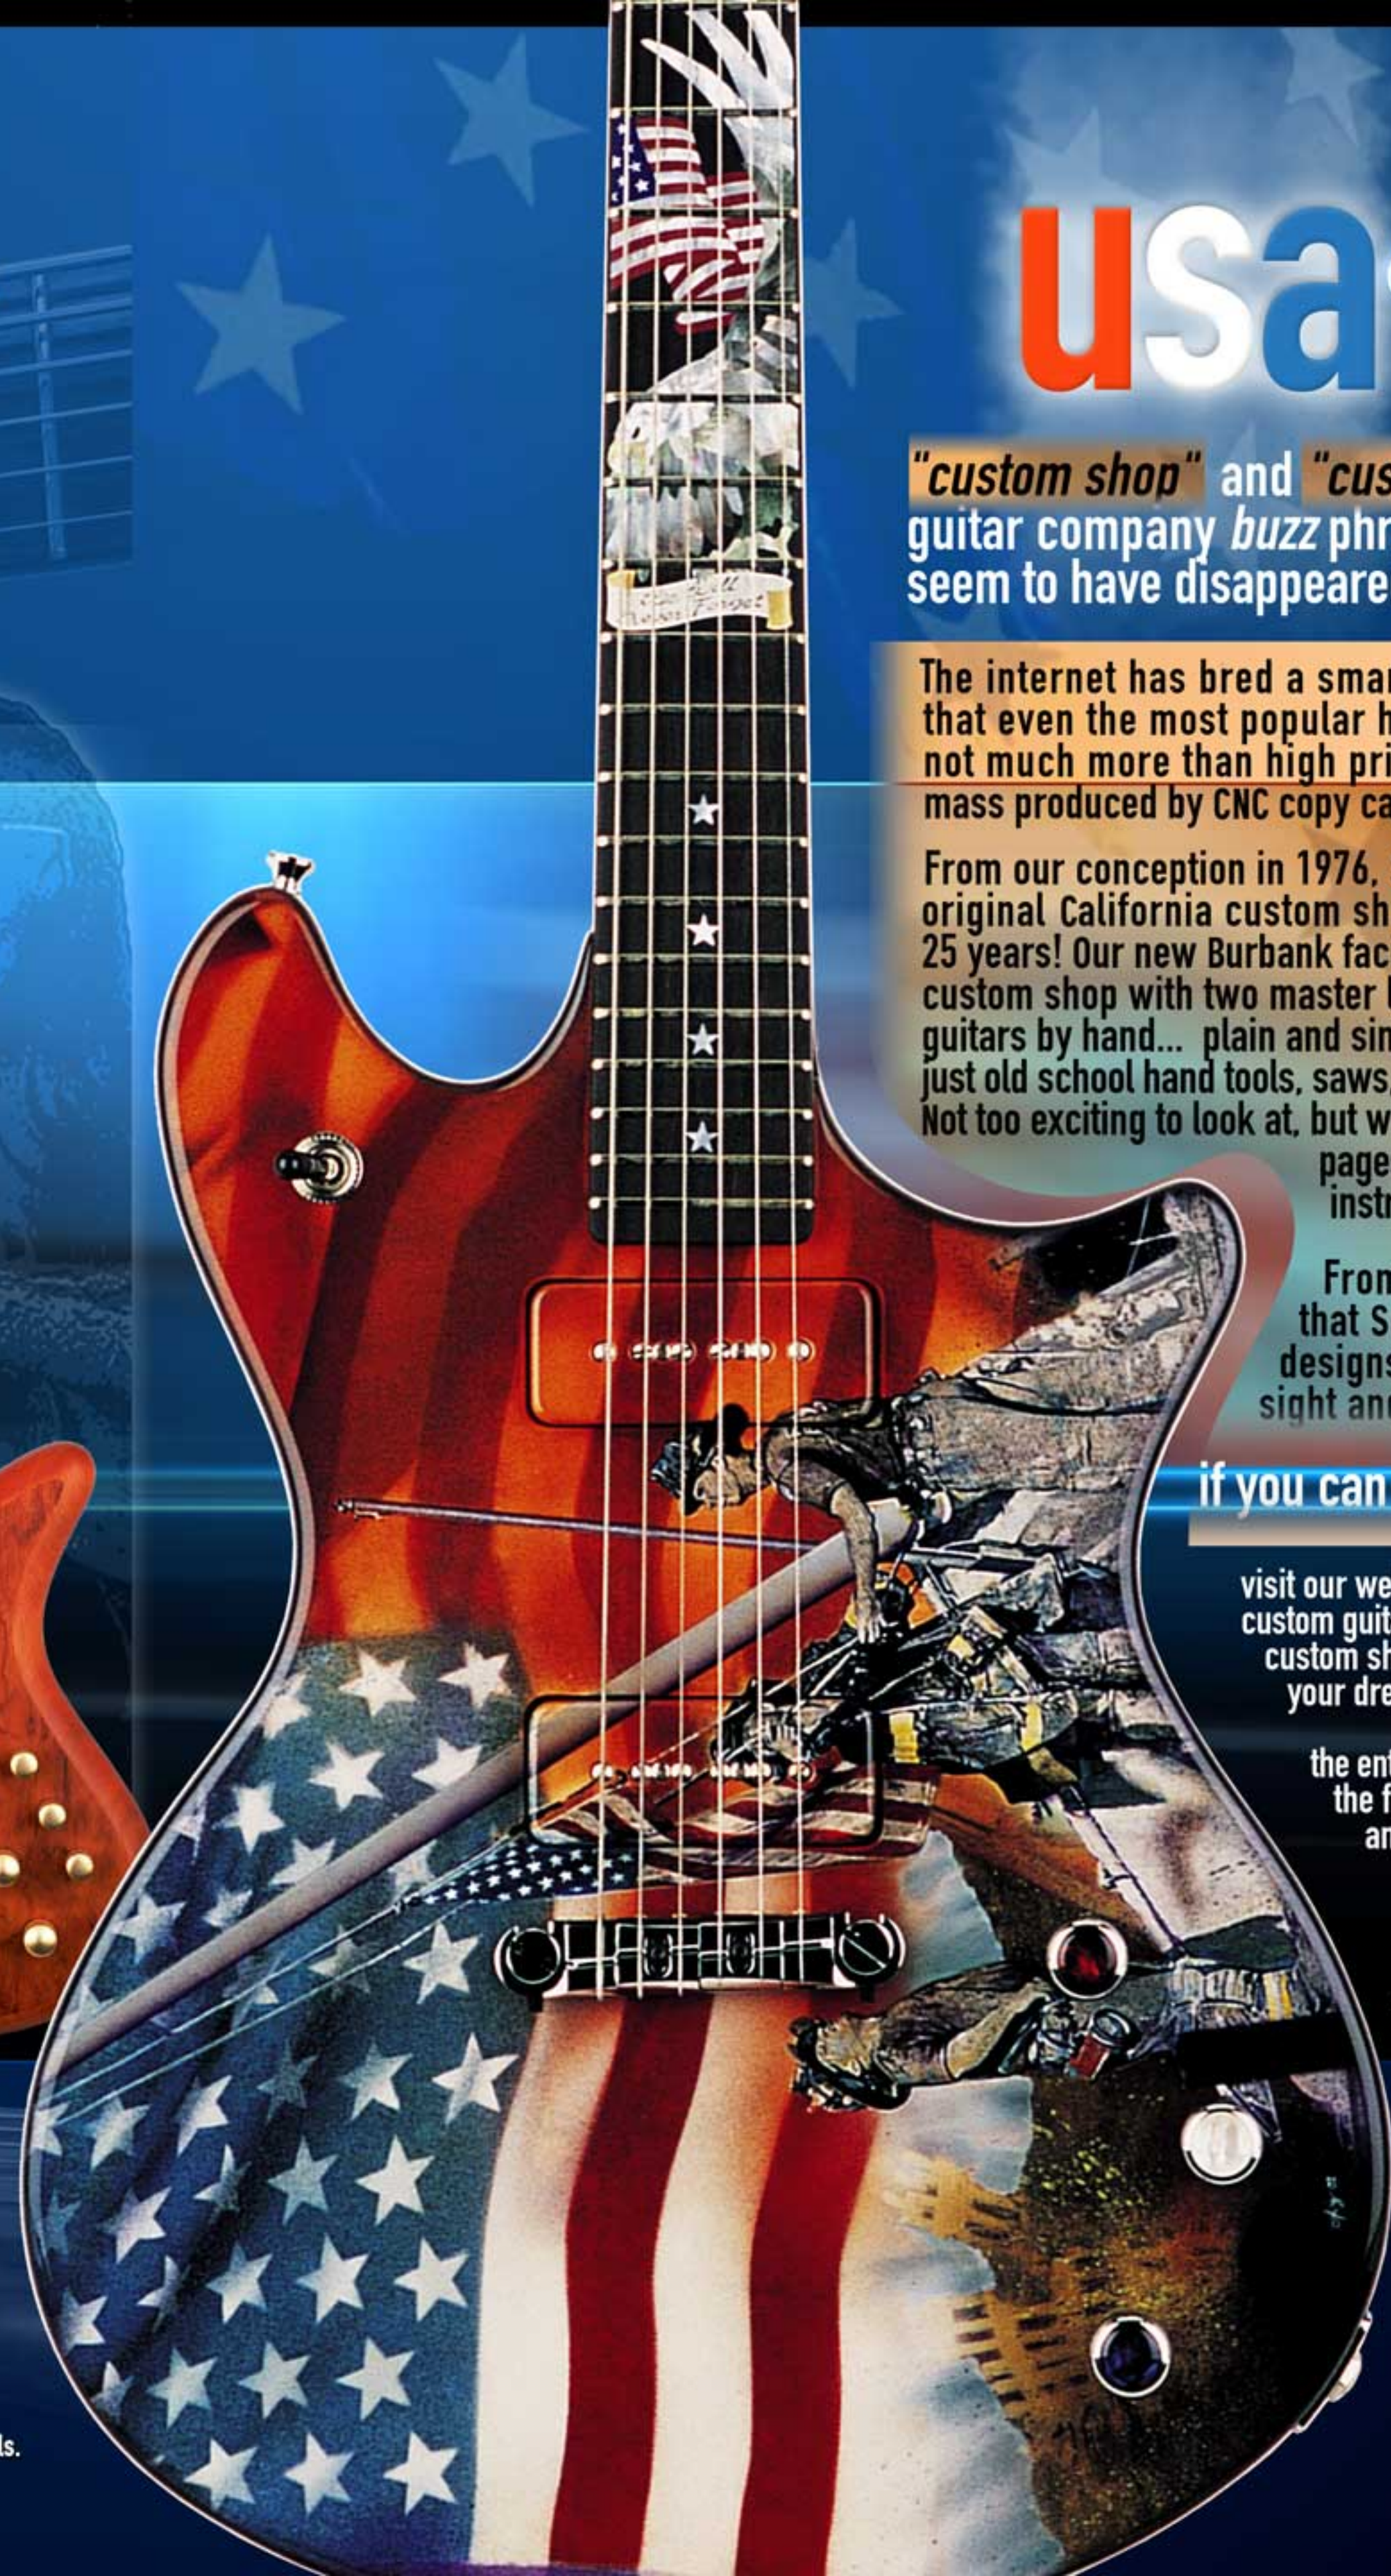

From the elegant exotic tone woods that Schecter is known for, to extreme designs that push the envelope of sight and sound.

**if you can imagine it... we can build it.**

visit our web site to see many more one-of-a-kind custom guitars and basses. your authorized schecter custom shop dealer will be happy to get a price on your dream guitar and help you make it a reality.

the entire schecter staff is committed to building the finest handcrafted electric guitars and basses in the world.
