THE  
Catalog Tour  
2008

With most music flooding the airwaves today seemingly calculated and soulless, many think the last nail has been hammered into the coffin of rock n' roll. Computer-created cookie-cutter music has all but replaced the old school way of plug in, turn the amp up ... and play. Don't perpetuate this myth. Stop by one of the live music clubs showcased in this catalog any night of the week and you will find that rock n' roll is alive and loud! Seeing a band give their all in front of twenty people or 2000 people is what rock n' roll is meant to be.

What does all this have to do with Schecter? We have grown from a small custom shop to one of the biggest names in the music industry, due in no small part to the support of the bands that toil night after night in these very clubs. Yes, we have our high profile rock star endorsees.. but these guys did not start at the "Enormo-dome." Many of them also played every club from Corona, CA to upstate New York.

I am convinced that you can't design and build a great guitar unless you live and breath music. We do just that. Our staff here at Schecter is a melting pot of styles. From Metal to Punk to Texas blues, and everything in between. This versatility in styles, look and musical taste is reflected in our 2008 line. From the most popular metal guitar on the market, The Hellraiser, to the post-punk jangle of the new Stargazer... Schecter is a microcosm of what Rock and Roll is and what it should always be.

Michael Ciravolo  
President  
Schecter Guitar Research

## SCHECTER GEAR 2008

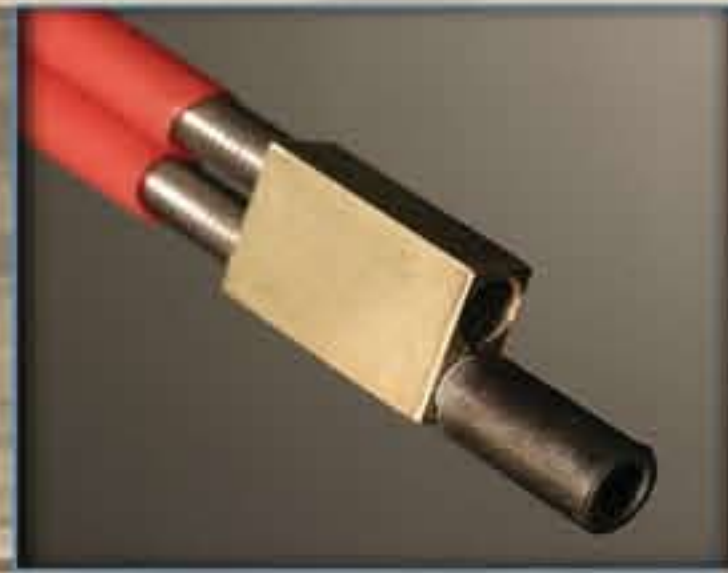

**Ultra Access Neck Joint**

Developed in the Schecter Custom Shop, this sleek set-neck joint allows for unobstructed access to the instrument's upper frets.

All Diamond Series electric guitars feature factory-installed **D'Addario XL** strings. All Diamond Series electric basses feature factory-installed **D'Addario EXP** strings. See our website FAQ for string gauges.

**Double-expanding truss rod**

The best in neck control: smooth 2-way action with superior strength, corrects both up-bow and back-bow.

**TonePros** components are the highest quality available and greatly improve the instrument's sustain, intonation and tonal qualities.

Since day one, **Duncan Designed** pickups have been a staple in Diamond Series guitars, offering great tone and affordability.

**Grover Tuners** are enclosed, permanently lubricated 18:1 machine heads, and the most trusted name in music around the world.

# Schecter

## SPEC SPOTLIGHT

Our instruments feature **REAL figured maple wood tops**, unlike many companies that use a 'photo finish' or decal. Hear the difference!

All 2008 Diamond Series now feature **Graph Tech** nut material! Compared to standard materials, you'll hear crystal-clear bell-like high end, big open lows, and a noticeable increase in overall sustain.

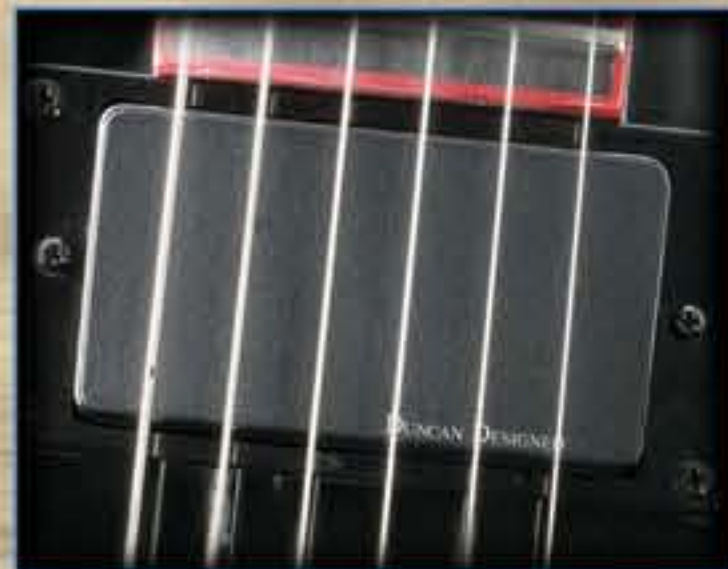

Designed after **EMG's 81/85** active set, the **81-TW** bridge and **89** neck pickup have the added versatility of being able to be tapped into single coils. Standard on all 6-string 2008 Hellraiser models.

**Seymour Duncan** pickups help provide the tone in our award-winning C-1 Classics and BlackJack Collection.

**EMG Hz** pickups power our Damien Collection with incredible sustain and high output for maximum overdrive.

The new **Duncan Designed Active HB-105** humbuckers provide today's aggressive attack, sustain, and tonal clarity in an affordable package.

The **EMG-BTS-V7 2-Band EQ** with 4-way treble frequency selection, providing custom-tailored tonal control.

Based on **EMG's 7-string 707** active set, the **707-TW** set is designed to be tapped to single coils, adding a much wider range of tonal possibilities. Standard on all 2008 Hellraiser-7 models.

Brand name floating tremolos like "**Original Floyd Rose**", and "**Licensed Floyd Rose**" lend new tonal possibilities and the confidence of stable tuning.

**Schecter SuperRock II & MonsterTone II** pickups offer classic Schecter looks and tone straight out of our USA Custom Shop.

**EMG EQ/Bass Preamps** help deliver all the tonal quality one would expect from our popular Diamond Series basses.

**Push-Pull Coil Tap**  
Pulling up on the tone knob allows you to "tap" the pickups, faithfully emulating the sounds of vintage single-coil instruments.

Many of our top-of-the-line Diamond Series guitars use thick, solid, **exotic wood tops**, much like many sought after vintage guitars. This provides superior sound quality, collectability, and increases the overall beauty of the instruments.

Built to Schecter's demanding specifications by **Gotoh**, this locking tremolo combines ultimate functionality, precision pivot points, and unequalled tuning stability. This unit is a standard feature on our top-of-the-line Stiletto Classic.

Our new **Blackjack ATX Series** is built around the aggressive power, clarity and tone of the new **ACTIVE Seymour Duncan Blackout** humbuckers.
