ELECTRIC GUITARS,
ELECTRIC BASSES,
AMPLIFIERS, EFFECTS
& ACCESSORIES
2009

Ibanez has a rich heritage of producing high quality instruments that spans decades. Though the history is far reaching, the Ibanez impact on the music industry has not been solely due to the amount of time it has existed as a company. Each Ibanez instrument has demonstrated its value time and time again through its exceptional functionality and sheer versatility. The instruments have evolved to meet the new demands of musicians and push the limits of what is possible. For 2009, the envelope is being pushed again. The new lineup features a variety of guitars, including those with Maple fingerboards. These fingerboards provide a more sensitive touch to the

way each instrument responds. There are different graphics that have been applied to various models to blur the lines between guitars as instruments or fashion statements. The new Darkstone series takes on the ambitious task of applying modern functionality and building techniques to a classic sense of design.

RG

The RG is the most recognizable and distinctive guitar in the Ibanez line. Forged in the fires of 80s metal, this high performance machine was built with speed and strength in mind. Whether using a locking tremolo with a sharp action knife edge or a hard tail bridge, the RG is a precision instrument. Its basswood body provides the perfect balance of crushing lows and singing highs.

RG tremolo

RG Tremolo models stand up to the most abusive whammy bar users around, while still maintaining perfect tuning stability. Lightning fast fretboard work is no problem with the Wizard neck, flat fingerboard and jumbo frets.

RG320DXFM AM

Edge III Tremolo

Ibanez has long been admired for the Edge tremolo, and the Edge III embodies all of the classic function of the original Edge with some modern updates. It features lower profile fine-tuners, much like the Lo-PRO Edge. There are also two screws in the arm pocket for easy adjustment of the arm height and torque.

RG *Prestige*

The Ibanez Wizard neck is legendary for its super fast playability, especially with shred players. For 2009, the RG3000 series features the Super Wizard neck, a faithful reproduction of the original Wizard neck from 1987. All RG Prestige models are "Made in Japan" by the finest Ibanez craftsmen and from top of the line components.

Edge-Zero Tremolo

The Edge-Zero has a sharp knife-edge for extremely accurate tremolo playing. This tremolo also uses Ibanez innovations to keep string action constant and the bridge surface smooth. The specially designed arm socket prevents unnecessary wobble from the arm while providing full control over the arm's torque.

ZPS3 Zero Point System

The ZPS3 is the next stage of zero point systems. Made of lightweight Duralumin, the addition of two outer springs makes the guitar easier to tune and provides

much greater tuning stability. In fact, the other strings will stay in tune even if you break a string. If you prefer a full floating tremolo setup, simply remove the stop bar.

RG3620Z ABB

- Scale: 648mm/25.5"
- Colors: ABB (Atlantic Blue Burst)
HBK (Himalayan Black)

Super Wizard Neck

The RG3620Z Prestige models feature the Super Wizard neck, an exact reproduction of the original RG550 Wizard neck from 1987 (17mm/19mm at 1st/12th fret). The strength and stability of this legendary neck has been improved due to the new 5-ply construction.

Neck-Thru Construction

The 5pc thru-body neck on RG Prestige models offers massive sustain, easy playability at the upper frets, and incredible strength and stability.

RG
Prestige

Double Edge Pro Tremolo on RG1820X

The Double Edge Pro allows brilliant acoustic-style tones, which can also be blended with electric tones. Piezos by L.R. Baggs™ are isolated to eliminate palm noise and a 2-band EQ on the piezo output provides added tone control.

FX EDGE III-8 Bridge

Ibanez FX EDGE III-8 double-locking fixed bridge was made specifically to handle and augment the awesome extended range of the RG2228GK 8-string.

EMG® 808 Pickups

The U.S.A.-made EMG® 808 active pickups—the first ever full-production 8-string pickups.

Edge Pro Tremolo

The Edge-Pro makes use of several innovations in tremolo design. A Sound Metal Chip is present on each saddle to increase sustain at the most critical point of contact, the intonation point. The string holder blocks are part of the bridge, so you don't have to worry about them falling out when changing strings. You can also install new strings on the Edge-Pro without having to cut the ball end off.

RGA Active EQ (for RGA321) Ⓞ

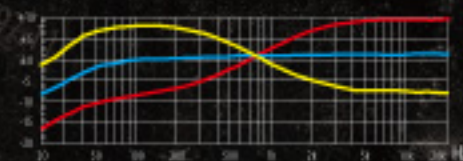

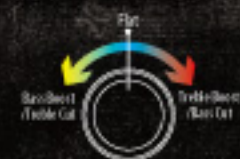

This EQ allows for everything from massive fat low tones to sharp treble tones through the turn of one knob with almost no change in output volume. The tone changes in a smooth and natural curve, so it's easy and quick to find the sound you're looking for.

LZ4 Pickups (for RGA321) Ⓞ

The LZ4 is an original Ibanez active pickup with a wide dynamic range. It produces powerful and clear humbucker sound with low noise.

Gibraltar Plus Bridge Ⓞ

The Gibraltar Plus builds on the design of the Gibraltar Standard by gently curving the saddles for added comfort.

RGA Active EQ (for RGA42) Ⓞ

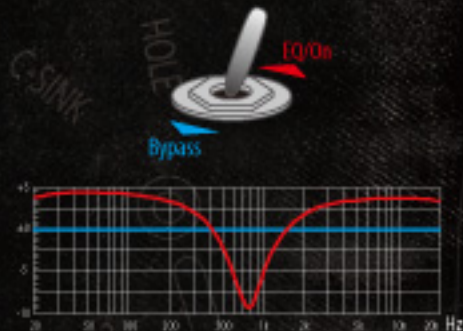

Specially designed to function with the fat and strong LZ3 pickups, the output is controlled by an active circuit to provide pure tone free of noise.

LZ3 Pickups (for RGA42) Ⓞ

The LZ3 is also an original Ibanez active pickup, but with higher output than the LZ4. It produces a fat sound with good clarity perfect for distortion sounds.

Gibraltar Standard Bridge Ⓞ

The Gibraltar is a simple fixed bridge that was designed to adhere firmly to the guitar body and make good transfer of the string vibrations. It is also incredibly smooth for maximum playing comfort.

RGA

With Gibraltar hard tail bridges and arched top Mahogany body, the RGA is a guitar with great inner strength. This workhorse wraps abundant resonance and natural sustain in a simple and elegant guitar design.

Gibraltar Custom 7 Bridge

The Gibraltar Custom 7 is a massive milled bass, 7 string version of Gibraltar Custom bridge.

X series

With the advent of the X series, Ibanez reintroduced non-traditional guitar shapes back into the mix. These off the wall shapes stand out in a crowd, but they are also excellent examples of form meeting function. The XPT

was developed for the extreme shred player with its fast neck and tremolo system. The ICT is great for hard rock, where thick tones are literally beaten out of the guitar. The DTT is a high gain animal, cutting through the most dense forests of fuzz and distortion.

Neck-Thru Construction

Neck-thru construction on the X-series provides massive sustain and playing comfort. (except XP300FX)

DiMarzio® D Activator-X™ Pickups

DiMarzio® D Activator-X pickups combine extreme power and clarity through the use of specially tuned coils.

ART

Activate Your ART

Simple and effective, the ART is a classic single cutaway guitar that was built for modern metal. The mahogany body is capable of producing the warm tones of yesterday, while the active low-impedance pickups can handle massive volume levels with very little noise.

ART320 TGB

Caiman Finish

The ART300 features the Caiman finish, a unique texture created by the scalloped top. This unique top combined with dark stained finishes has the look of reptilian skin.

LZ1 Pickups

Ibanez original LoZ pickups have made the active pickup sounds accessible for anyone from starters to professionals. Operated by AA batteries, which are more widely available than traditional 9V batteries.

Gibraltar III/Quik Change III

With the addition of the Quik Change II tailpiece, string changes are a snap on the Gibraltar III bridge. Its simple rigid design is perfect for harder playing styles.

Gibraltar w/ Sustain Block

This is a faithful reproduction of the Original Gibraltar bridge.

Tri-Sound Sw

The AR300RE's original Tri-Sound switching system offers the choice of standard humbucking, single coil, or parallel humbucking sounds through the mini switches. Combined with the regular pickup selector, 15 distinct tone settings are available at your fingertips.

AR

The AR is a classic among Ibanez guitars. It was one of the first original designs produced by Ibanez and continues to be a sought after guitar. The AR300 continues that legacy with pride.

Ibanez Artists

DN

New for 2009, the DN is a solid rock n' roll powerhouse. It features a new design and sound unlike any other Ibanez guitar. The new Tight-Tune Bridge is sturdy and resonant,

and the new tailpiece is equipped with the Ball-End Stopper. The new humbuckers have a quick response with rich harmonics, and the new single coils are fat and powerful when compared with traditional single coils.

Tight-Tune Bridge/Tailpiece

Solid as a rock, the Tight-Tune bridge and tailpiece were designed to lock down securely and prevent any kind of wobble or movement. Each saddle is locked into the base plate, and the bridge is anchored by stud bolts into the body of the guitar. Furthermore, the studs are also locked onto the base plate so that the maximum vibration from the string is transferred to the body.

New PPT1 & HS1 Pickups

The tube pole-piece construction of the new pickups designed for the Ibanez Darkstone offers quick response, sparkling clarity and added harmonics for a humbucker sound. The newly developed humbucker-sized single coil pickups produce loud and crunchy tones that cut through for hard rock and punk styles.

FR *Prestige*

Free Style Rock Gear

The FR first appeared in 2008. With a simple and uncompromising design, the FR is a chameleon when it comes to musical genres. The ash body brings more punch to the midrange tones, while the Tight-End bridge provides maximum string vibration and playing comfort.

Tight-End Bridge

The Tight-End bridge integrates every aspect of the bridge design in rigidity and accuracy. Saddles are firmly locked onto the base plate for maximum string vibration, and remain perfectly linear during intonation adjustment for the most accurate set up. The saddle height can be adjusted individually by one screw. Also, the top side of the bridge is smooth finished. So if you play hard, the Tight-End bridge will forgive you and your hands.

CCR Pickups

The Ibanez original CCR pickups don't have the same heat of ceramic magnets, but still have the power to cut through the mix.

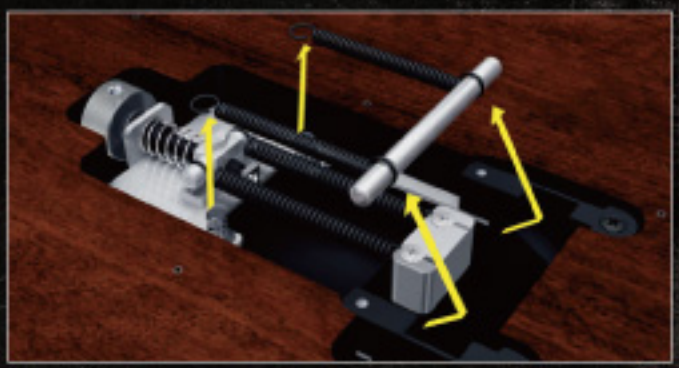

S Prestige

Serious Versatility

ZR-2 Tremolo

The ZR-2 is a revolutionary tremolo system. It plays incredibly smooth through the use of its ball bearing mechanism. This also keeps the string action constant, even during the most rigorous tremolo use. The top side features a smooth finish for total hand comfort, and the tremolo arm snaps in for quick setup.

ZPS3 Zero Point System

The ZPS3 is the next stage of zero point systems. Made of lightweight Duralumin, the addition of two outer springs makes the guitar easier to tune and provides much greater tuning stability. In fact, the other strings will stay in tune even if you break a string. If you prefer a full floating tremolo setup, simply remove the stop bar.

Sleek Body

The smooth, contoured Mahogany body of the S has long been a favorite for the extreme thrash of heavy metal players to the soft grace of fusion virtuosos.

The S Prestige series is "Made in Japan" by the finest Ibanez craftsmen and from top of the line components. This beautifully contoured

shape, combined with the ZR-2 tremolo system, produces warm resonant tones from a super thin mahogany body.

Barless Top-Lok

The Barless Top-Lok eliminates the need for a retainer bar to maintain string tension. Through its simple design, it holds the correct angle for the strings without one. The metal-injection molding process means that all the edges remain smooth, so you won't hurt your hands.

HGD & ST Pickups

The Hot Grinder pickups are specially designed for the S Prestige to output extra volume, yet sharpness is not sacrificed. The new Short Tracer pickup matches perfectly with the hot humbuckers to give versatility on the S guitars and to produce even the most delicate tones.

S The Ibanez S series first appeared in 1987. Ever since, it has changed in appearance and function to represent the cutting-edge of Ibanez design. Famous for its lightweight carved mahogany body, the S can

take a beating while still providing the resonance of guitars twice its size. The S series also comes equipped with the ZR tremolo system, a smooth ball bearing tremolo that makes every subtle nuance of whammy bar use come alive.

ZR-7 7-string Tremolo

The innovations of the ZR Tremolo system are not restricted to 6-string players. With the ZR7, the same great frictionless action and reliable tuning stability is available for 7-string players.

SV *Prestige*

True-Duo Pickups

The unique formula of the True-Duo system, the combination of Alnico and Ferrite, stacked coils and bar magnet, has answered the conflicting demand for one guitar. In the SSS setting, it outputs glassy and clear single coil sound, not like a coil tap does, while the HSH setting packs a beefy punch, by simply pushing/pulling the volume knob.

Serious Versatility

The S series has long been admired for its design, but some players prefer the simplicity of a non-locking tremolo. The SV was created to satisfy the professional

player, who wants a more versatile solution. The SynchroniZR non-locking tremolo uses the same smooth ball bearing mechanisms that have made the ZR bridge so popular. The SV also comes equipped with the True-Duo pickup system for superior tonal variety from the single coil and humbucker universe.

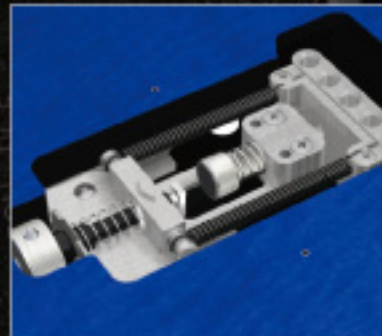

SynchroniZR Tremolo

The SynchroniZR provides all the innovations of the ZR tremolo in a non-locking design. The one-piece saddle construction minimizes unnecessary wobble and loss of string vibration, and the ultra-light Duralumin tremolo arm keeps the bridge stable while playing. The same intonation and adjustment features of the ZR-2 make this a top-notch choice for any kind of player.

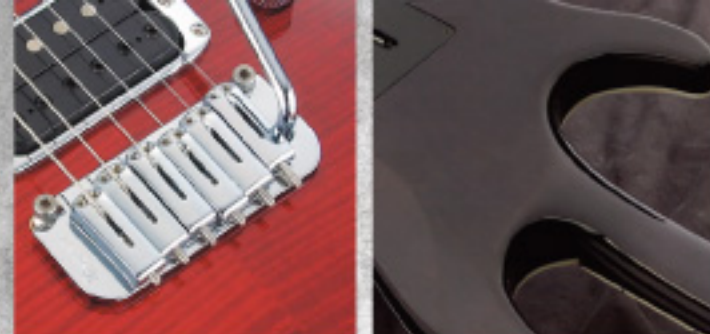

ZPS-FX System

The ZPS-FX is the simplified alternative to the ZPS3 system. This spring system allows switching from floating to non-floating tremolos with the turn of a knob on the back. Coupled with the SynchroniZR, the ZPS-FX offers total sonic control and the pinnacle of tuning stability.

SA

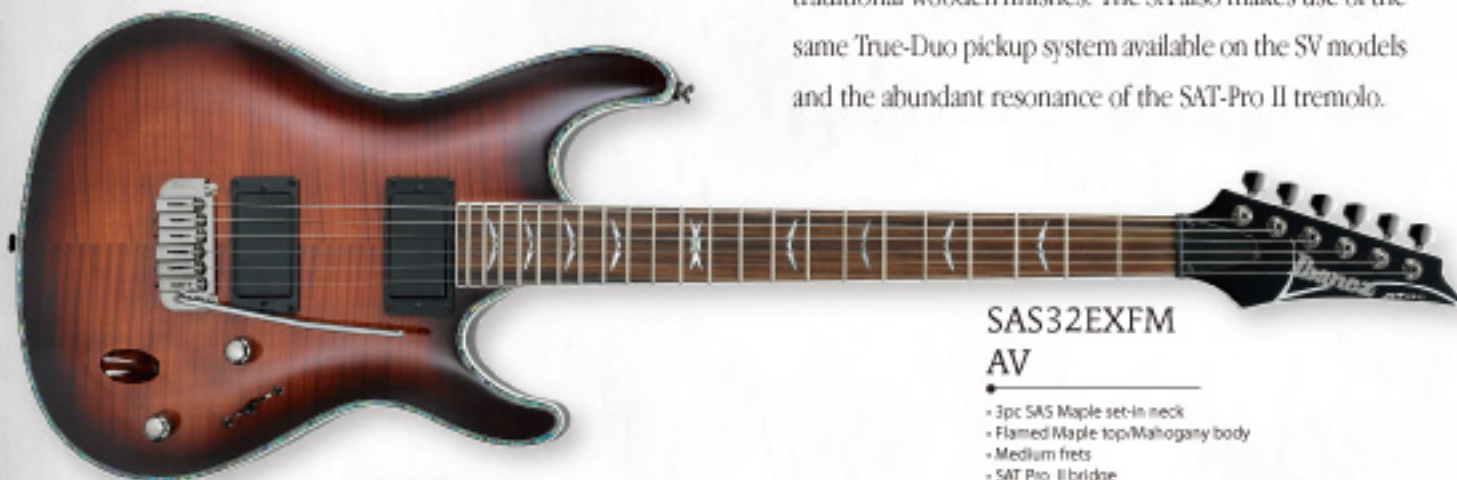

Sat Pro II Tremolo

The Sat Pro II eliminates unnecessary resonance around the saddles by firmly securing them to the bridge plate. This keeps the saddles very stable even during frequent tremolo use.

Set-in Neck Construction

SAS set-in neck features strong 3pc construction and special neck finish for extraordinary comfort and playability.

You want versatility? The SA adapts to any genre of music for clean rhythm, crunchy blues or even hard driving riffs and solos. It also offers a variety of looks such as metal-like solid colors or traditional wooden finishes. The SA also makes use of the same True-Duo pickup system available on the SV models and the abundant resonance of the SAT-Pro II tremolo.

SA

SZR

If thin is in, then the SZR is a true rebel. This guitar was built tough with a thick mahogany body for the warm, dark tones of a traditional solid body. The set-in neck makes every note sing with sustain and provides improved comfort when you grab the high notes.

60mm thickness Body

SZR models' 60mm thick mahogany body with maple top.

Neo Z Pickups

The SZR's massive tone is also supported by the new original Neo Z pickups that feature the Neodymium, the strongest magnet for guitar pickups.

JTK Pawnshop Perfection

Some people never forget that first prize guitar that they found at the local pawnshop, and with the JTK they never

have to. The Jet King takes all of the retro styling of a vintage guitar and couples it with solid modern hardware. Ibanez also developed original low noise pickups for the Jet King that reproduce the old school look and sound of soap bar pickups.

HFS Pickups

The HFS PU looks like a vintage single coil at first glance, but looks can be deceiving. Underneath, the HFS makes use of a separate coil to cancel any hum or noise generated by the single coil.

VBX60 Vibrato

Ibanez VBX60 Vintage Vibrato for solid body guitars.

ARTCORE

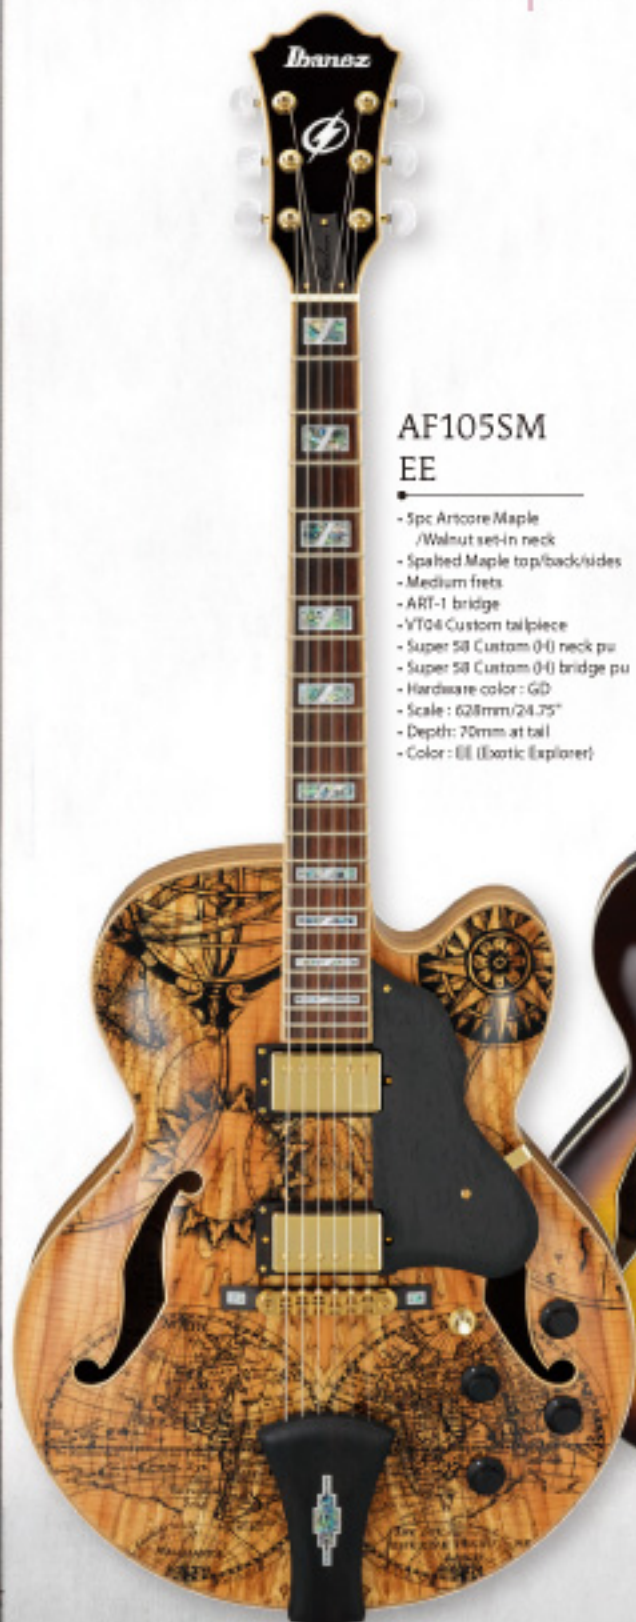

The Artcore line represents a step forward in the evolution of affordable hollow body guitars. Since 2002, Ibanez has been producing these exquisite guitars that are at home in a jazz combo

as well as a full-on rock show. Like many other Ibanez models, the Artcores are as versatile as they are beautiful. They come in a variety of sizes and hardware configurations to meet the needs of the one at a price fit for all.

ARTCORE Custom Neck

Artcore Custom models feature Spc maple/walnut neck for extra strength and stability.

Jazz and blues history is filled with the warm tones of large hollow body guitars. The AK eschews the bright sound of maple tops and metal bridges, replacing them with a spruce top and an all-wood bridge.

AK

AK80 BS

- Depth : 70mm at tail
- Color : DVS (Dark Violin Sunburst)

ARTCORE AF

The AF is the most traditional of the Artcore series. The traditional full-hollow construction means that there are no sound blocks in the body. Producing rich and complex tones, the AF is the guitar for the purist in all of us.

VBF70 Vintage Vibrato

This old school vibrato adds country and rockabilly nuances to the rich tone of a full-hollow guitar, but the included roller saddles eliminate "old school" tuning problems.

AF95 VLS

- 3pc Artcore Mahogany /Maple set-in neck
- Flamed Sycamore top/back/sides
- Medium frets

- Scale : 628mm/24.75"
- Depth : 70mm at tail
- Color : BS (Brown Sunburst)

ARTCORE AFS

Pushing traditional concepts one step further, the Ibanez AFS has the same shape and full-hollow body of the AF. For increased comfort and more midrange

punch, the body depth is one inch thinner. An Ibanez Vintage Vibrato is also mounted on the body with roller saddles, eliminating the tuning problems of traditional systems.

AFS95T MBU

*VBF70 Vintage Vibrato design licensed by Fredrik Gertch Designworks, Ltd. in the U.S.

The AS is a semi-acoustic guitar built to tackle just about any genre of music you throw at it. The pickups are mounted into a sustain

block for increased sustain and feedback elimination. The Quik Change III bridge makes it easy to change strings without a lot of time involved.

AJD

The AJD is the latest innovation in jazz box guitars, but it is neither large nor boxy. The light body is comfortable and feels like a solid body, with its abundant sustain. The semi-acoustic design maintains the tonal warmth of a hollow body. The guitar also features the ACT tremolo, a unique addition for this versatile instrument.

ACT Tremolo

The first knife-edge tremolo designed for semi-acoustic guitar, the ACT eliminates the tremolo cavity that sacrifices the tone. Shorter springs use less vibrating room and contribute to a stiffer arm response. Two ways to install the springs offer choice in string and arm tension. And on top of all that, the ACT is smooth to the touch and string changes are easy.

AJD91 VLS

- Scale: 628mm/24.75"
- Depth: 43mm at tail
- Color: BK (Black)

ARTCORE AGS

The AGS may be an improvement on the AG for many players. Based on the same body design as the AG, the AGS has a thinner body and sound block for feedback reduction and increased sustain.

17th Fret to Body Joint

The super-thin AGS83B features a 17-fret body joint and an extra-deep cutaway that makes it the right choice for players who want to spend more time, with ease and comfort, in the upper regions.

AGS83B ATF

- 3pc Artcore Mahogany /Maple set-in neck
- Flamed Sycamore top /back/sides
- Medium frets
- ART-1 bridge
- Quik Change III tailpiece
- ACH1 (H) neck pu
- ACH2 (H) bridge pu
- Hardware color: CK

SOUNDGEAR

SR *Prestige*

Revolution SR

The SR Prestige is the pinnacle of playing comfort, smart design and Japanese craftsmanship. All SR Prestige models are "Made in Japan" by the finest Ibanez craftsmen and from top of the line components. They feature the Mono-Rail bridge design, with complete string-to-string isolation so that each string vibrates without interference from other strings, the newly developed Power Curve III EQ for vitalizing the low end and midrange tones, and the same classic slim neck that has become an industry standard over the past 20 years.

Bartolini® US made Pickups

"The US made pickups are hand made at our factory in California exclusively for Ibanez. Ibanez was the first to ask for much deeper tone from the neck pickup while retaining a bright tone for the bridge, unlike traditional designs that used approximately equal pickup tone. The pickups are dual coil designs in several soapbar shapes, some rounded top and some flat top. In all cases, the Neck pickup tone is very deep and the Bridge pickup tone is bright. This allows the widest tonal sweep from the Blend control. Enjoy the wide tonal range!"

MR4 Mono-Rail Bridge

The Mono-Rail Bridge is the ultimate in string isolation for bass. Each saddle is independently and securely locked down to the body for maximum vibration transfer and no interference. One screw controls the height of each saddle for easy adjustment.

Power Curve III EQ

The new Power Curve III 3-band EQ was developed specifically for the new SR Prestige line. The Mid Q control makes adjustment of the core of your bass tone (the mids) extremely simple. EQ variable range makes it possible to get very natural sounding bass tones.

SOUNDGEAR
SR Prestige

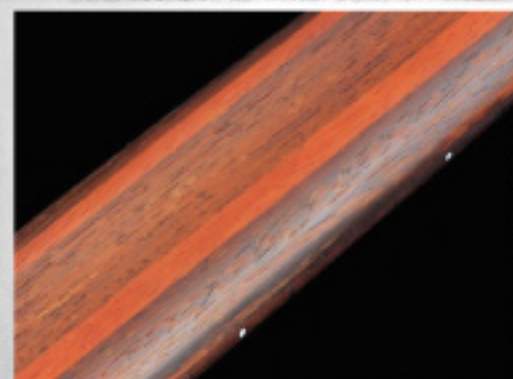

SR 4 STRING SOUNDGEAR

Since 1987, musicians all over the world have come to know the playing comfort and unique sound of the SR bass. This year's lineup includes a wide array of options sure to fit just about any style of music. With Style Sweeper 3-band EQ, the SR basses can produce any sound you require.

Bartolini® MK1 Pickups

The MK1 pickups are split coil designs that provides a very wide frequency range and enhanced definition for maximum accuracy. The Neck and Bridge pickups have equal response, like traditional single coils, but without the hum and noise.

Jatoba/Bubinga Slim Neck

Coupling Jatoba with Bubinga has made the neck strong and stable despite its thinness.

ARTB

For those who prefer a bass that has a more classic feel to it, the ARTB is a 70s style rock machine. The combination of the mahogany body, the 30.3" short scale length and set neck create a warm tone that recreates the days of arena rock. The short scale neck is also comfortable for smaller hands.

SRX

The SRX is the muscular big brother of the SR series. This is a bass that was designed for heavier playing styles, and it meets that demand in a no-nonsense layout. The EQB-IIDX 2-band EQ makes it easy to find sounds, and the now famous stock Ibanez PFR pickups that major artists rave about give you that extra punch.

PFR pickups and EQB-IIDX EQ

These powerful full-range passive pickups generate high output with extra low midrange punch. PFR-AL Powerful Alnico magnet pickups on SRX720s add more clarity and even response. The EQB-IIDX 2-band EQ enhances heavy tones with simple operation.

- Scale: 864mm/34"
- Color: NT (Natural)

With the ingenious ATK bridge, you have the option to string through-the-body for increased low end and more sustain, or through-the-bridge for slightly more high end and attack.  

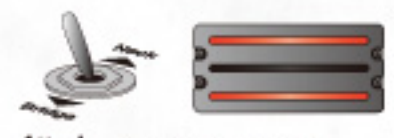

ATK Triple Coil Pickup

Trad Single Coil Sound + High Cut Filter

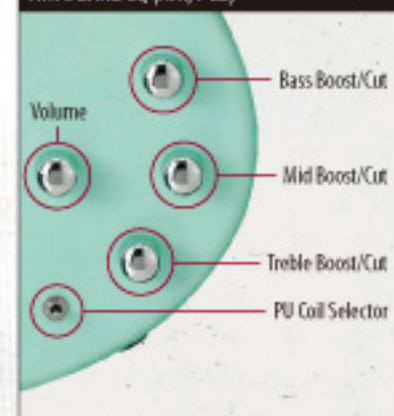

Bright Single Coil Sound

Attack Humbucker Sound (Parallel)

 Active Coil  Passive Coil (By Hook Circuit)  Inactive Coil

ATK 3 BAND EQ (ATK, PGB)

The ATK may be the most straight-forward bass in the entire Ibanez line. This simple rock n' roll bass with a punk attitude combines a large ash body with

a maple neck for big tight sounds. The special ATK triple coil pickups can only be found on these basses. Coupled with the 3-band EQ, this bass can generate some serious low end punch.

Nature of the Beast

BTB

The concepts behind boutique basses are often justification for making them extremely expensive. With the advent of the BTB, Ibanez decided that these same concepts of well-selected body materials, 35" neck

scale, and deep cutaways could be applied to an instrument that anyone could afford. The new BTB770s sport exquisite Poplar Burl tops in gloss finishes and powerful Bartolini® MK2 pickups exclusively designed for the BTB.

Bartolini® MK2 Pickups and EQ

The MK2 pickups are quad coil designs. The Neck pickup tone is very deep and the Bridge pickup tone is bright, just like the US made pickups. They are also balanced for output so that the deep tone Neck pickup does not overpower the Bridge pickup. The MK2 electronics compliments and enhances their wide tonal range.

Ibanez DFR Pickups & 3-band EQ

The BTB300s feature the Ibanez DFR passive pickups with 3-band EQ delivering a variety of tones and superior dynamics.

JTKB

If you want a bass that transports you back to hot rods and 60s rock n' roll, then the JTKB is your golden ticket. Its mahogany body, high powered pickups and solid bridge can take a beating and still produce the warm passive sound of a vintage bass. The JTKB is truly unique among Ibanez basses.

ACHB PU & Controls

The Jet King Bass is fitted with warm sounding ACHB pickups and classic knobs.

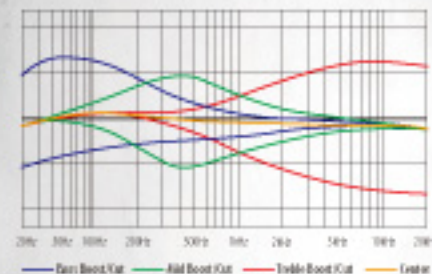

ARTCORE

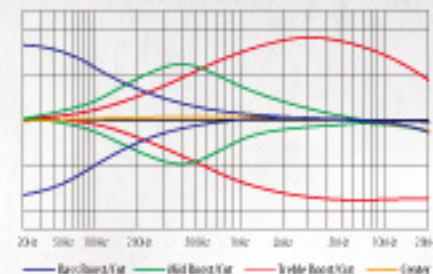

The Artcore Bass series was designed for players that are used to solid body basses but want the acoustic tone of a hollow body. The 30.3" scale neck increases playing comfort, and the acoustic body widens the palette of sounds at your disposal.

Ibanez Artists

SOUND WAVE

The SWX Sound Wave Bass amp series is designed for today's bass players at all levels, who want serious versatility. The SWX delivers a thick, natural and balanced tone, while its perfect combination of

function allows you to change the tonal character without any hassle. Playing the Sound Wave will give you what you need for the groove, the drive, the pocket and the tones - whether you need traditional thump or today's pop, slap and funk.

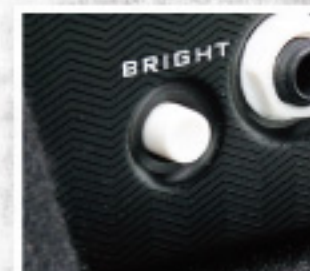

SWX100 100W Bass Amplifier

- output power 100Watts
- speaker unit 15" Bass speaker with Piezo Horn Tweeter
- controls Shape Switch, Bright Switch, Gain Level, Bass, Middle, Treble, Hue, Master Volume, Tweeter Switch, Auto-comp w/LED
- I/O's Input, CD / MP3 Input, Direct Out w/Post EQ Switch & GND Lift Switch, Effects Loop, Headphones
- cabinet Sealed Back Ported Bass Reflection Cabinet w/Caster
- size 520(W) x 642(H) x 312(D) (mm)
- weight 24.2kg

HUE Control

All SoundWave SWX series bass amplifiers feature the HUE control, which adjusts overall tonal character.

Bright Switch

Selectable Normal and Bright modes change the sound character immediately, from the tone of passive bass to that of active bass.

Shape Switch

Create the hi & low boost / mid cut sound instantly, which is one of the most desirable tones for many bass players.

Internal Auto-Compression Circuit

All SoundWave SWX series bass amplifiers are equipped with internal auto compression circuitry, which minimizes distortion and keeps the sound clean and powerful. (SWX20 does not equip LED for Auto-Comp)

SWX65 65W Bass Amplifier

- output power 65Watts
- speaker unit 12" Bass speaker with Piezo Horn Tweeter
- controls Shape Switch, Bright Switch, Gain Level, Bass, Middle, Treble, Hue, Master Volume, Tweeter Switch, Auto-comp w/LED
- I/O's Input, CD / MP3 Input, Line Out, Effects Loop, Headphones
- cabinet Sealed Back Bass Reflection Cabinet w/Tilt-Up System
- size 422(W) x 632(H) x 312(D) (mm)
- weight 18.8kg

SWX35 35W Bass Amplifier

- output power 35Watts
- speaker unit 10" Coaxial 2Way Bass speaker
- controls Shape Switch, Bright Switch, Gain Level, Bass, Middle, Treble, Hue, Master Volume, Auto-comp w/LED
- I/O's Input, CD / MP3 Input, Line Out, Headphones
- cabinet Sealed Back Cabinet w/Tilt-Up System
- size 378(W) x 532(H) x 312(D) (mm)
- weight 14.2kg

SWX20 20W Bass Amplifier

- output power 20Watts
- speaker unit 8" Coaxial 2Way Bass Speaker
- controls Shape Switch, Bright Switch, Gain Level, Bass, Middle, Treble, Hue, Auto-comp
- I/O's Input, CD / MP3 Input, Headphones
- cabinet Sealed Back Cabinet
- size 337(W) x 410(H) x 240(D) (mm)
- weight 8.6kg

- i/o's: 2 x Input (40&160)
- cabinet: IS412CA: Traditional Angled
IS412CS: Straight Front Angled
- size: 707 (W) x 755 (H) x 334 (D) mm (with casters)
- weight: 34kg (with casters)

The new generation Tone Blaster X series amps were designed and created to answer the needs of today's guitarist. The parametric mid EQ allows you to dial in any tone you're looking for in an instant. The exclusive X mode allows you to

get monstrously heavy and lets you cut through the din of the loudest rhythm section. The gain control in the normal channel can be dialed down to give you anything from a clean jazz tone to a crunchy, slightly overdriven rock'n roll tone. Plug in and express yourself with TBX.

Front Panel (TBX150H)

Gain control on Normal Channel

The TBX features a Gain control on the Normal Channel to offer wider tonal variation ranging from pure clean tones to crunchy overdrive.

X Mode (X Channel)

The X mode/channel emphasizes tighter low end and a unique tonality in the midrange, which increases sustain and harmonics.

Parametric MID EQ control

Mid range is a very important aspect in determining the character of an amplifier's sound. The TBX active Parametric Mid control allows you to shape a wide variety of distortion tones and amp sounds. This control also works for the Normal channel on the TBX15R and TBX30R.

HUE Control

Adjusts overall tonal character. (TBX150H/150R)

IS Speaker driver

Extremely efficient Ibanez IS speaker drivers are voiced for tight and focused low-end for today's modern music styles.

IFS2X

Footswitch Controller

Latching footswitch with metal housing for use with the TBX30R, TBX65R and T35.

IFS4X

Footswitch Controller

Latching 4-button footswitch with metal housing for use with the TBX150H/TBX150R.

MIMX

Traditional companies provide versatility and warm vintage tones with their modeling amps, but only Ibanez brings you the same versatility plus the heavy, searing modern tones required by today's players. The MIMX amps offer a wider variety of distortion and overdrive than any other modeling amp currently available, and there's still plenty of classic and clean tones to get you through any gig.

MIMX150H 150W Fully Digital Modeling Head

- 150 watt @ 4 ohms
- Fully digital programmable preamp with
 - 11 amp models
 - 10 memory locations
 - 50 rhythm patterns
 - 13 digital effects
- Accessory compartment
- 636(W) x 259(H) x 252(D) (mm)
- Weight: 13.9kg

MIMX65 65W Fully Digital Modeling Combo

- 65 watt guitar amp
- 12" Ibanez 51204G speaker
- Fully digital programmable preamp with
 - 11 amp models
 - 10 memory locations
 - 50 rhythm patterns
 - 13 digital effects
 - Chromatic Tuner
- 1/4" CD/MP3 input jack
- 1/4" headphones/record out jack
- Closed-back cabinet design
- 491(W) x 451(H) x 254(D) (mm)
- Weight: 16.2kg

IFC2 Effects Foot Controller

The PEDAL FX section is ONLY accessible using the optional Ibanez IFC2 Foot Controller for MIMX150H/MIMX65. (The IFC2 is not included and is sold separately)

MIMX30 30W Fully Digital Modeling Combo

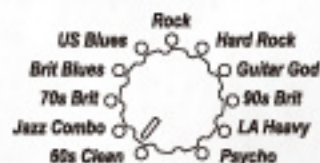

- 30 watt guitar amp
- 10" Ibanez 51008G speaker
- Fully digital programmable preamp with
 - 11 amp models
 - 4 memory locations
 - 26 rhythm patterns
 - 18 digital effects
 - E-note Tuner
- 1/4" CD/MP3 input jack
- 1/4" headphones/record out jack
- 442(W) x 409(H) x 220(D) (mm)
- Weight: 8.8kg

IFS2M Pedal Switch

The PEDAL FX section is ONLY accessible using the optional Ibanez IFS2M Foot Controller for MIMX30. (The IFS2M is not included and is sold separately)

Amp Selections (MIMX150H/MIMX65/MIMX30)

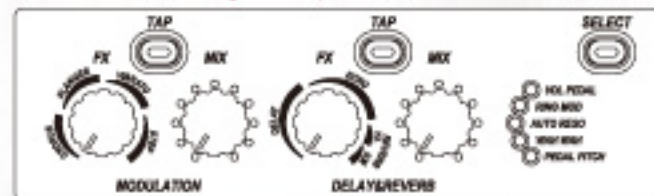

AMP SELECTION

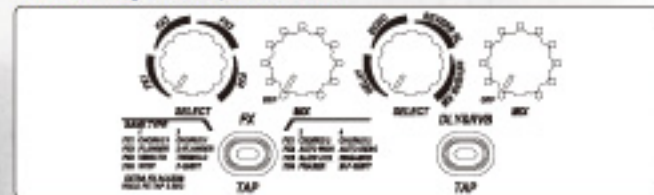

11 amp models with the widest amp/tonal type variation available. Features ten of the classic British, American and boutique amp models plus a new and original Ibanez high-gain "Psycho" model.

Digital Effects

MIMX150H/MIMX65 13 digital effects (up to three effects simultaneously)

MIMX30 18 digital effects (up to three simultaneously)

Programable Patches

Any combination of settings can be auditioned and adjusted in real time and then saved to MIMX memory locations. This includes amp model, equalization setting and digital effects and their particular parameters.

MIMX150H/MIMX65 10 factory Presets (over-writable)
10 user programs

MIMX30 4 factory Presets (over-writable)
4 user programs

Rhythm Patterns

Wide range of rhythms for any kinds of practice, recording or single gig: metal, Latin, hip-hop, ballad, shuffle, hard rock and much more.

MIMX150H/MIMX65 50 patterns Rhythm Machine

MIMX30 26 patterns Rhythm Machine

Thermion

The 120-watt Thermion features only the finest top-shelf, military-grade components...all in the service of a design that considers every aspect of modern playing from tone to transport. But the most important spec is this: Thermion is all-tube. There is absolutely no solid-state circuitry in the signal path. So you've got the tones, power and control you need to conquer every album track, every stage, every city, and ultimately, the entire universe (admittedly, that may take a little time).

TN120 THERMION™ Ibanez All-Tube Amplifier

- 120W 5%THD @4, 8, or 16 ohms
- All tube signal line circuitry (NO SOLID-STATE) with mechanical relays
- 4 x 6L6GC/MSTR MATCHED Ruby Tubes™ output tubes (user switchable to 6550s)
- 5 x 12AX7A-SELECTED Ruby Tubes™ preamp tubes
- HI/LO input impedance switch
- Two independent channels: Vintage Channel & Hot Channel
- Tube circuit Effects Loop w/Send and Return Level Control on the front panel and Blend/Serial switch on the rear panel.
- Illuminated front panel and illuminated Ibanez logo
- Dampening switch enables different distortion characteristics out of Hot channel
- Rotary 3-position Bright switch in Vintage channel
- Traditional passive EQ in both channels
- 3-button footswitch for Channel switching, Dampening and Effects Loop on/off
- Maintenance friendly, professional-grade design includes bias adjustment interface for output tube replacement on top of chassis, IEC 60065 compliance, high efficiency toroidal core transformer with automatically resetting thermal fuse, durable 3/4" plywood cabinet, heavy-duty toggle switches, potentiometers with dust-covers, and more.
- Size: 740 (W) x 290 (H) x 260 (D)
- Weight: 24kg

TN412A THERMION™ Traditional Angled Guitar Speaker Cabinet TN412S THERMION™ Straight Front Angled Guitar Speaker Cabinet

- 4 x Celestion® Vintage 30™ speaker drivers
- 5/8" birch plywood provides durability and augments resonance
- Input jacks w/stereo/mono switch
- Separate left and right chambers eliminate acoustic interference
- 2-1/2" large heavy-duty pop-in casters
- Durable 1.5mm black nickel-plated carbon steel corners and additional front angle corners (TN412A)
- Ultra-durable cane net grill
- Size: 778 (W) x 750 (H) x 366 (D)
- Weight: 50kg

- weight 5.1 kg

TROUBADOUR

ACOUSTIC GUITAR AMPLIFIER

What's the one thing that almost all small venue musicians strive for when it comes to amplifiers? Some might say "pure immersive tone", which would undoubtedly be followed by "portability". The new Ibanez Troubadour series Acoustic Guitar Amplifiers deliver exactly that, along with the striking appearance of a hand-crafted boutique amplifier. Whether you're strumming away at the local coffee shop or playing weekly gigs at a religious venue, the sounds of the new Troubadour will fill the room. Plus, you won't have to break your back getting your amp in and out. The Ibanez Troubadour was designed with portability in mind.

Dual "MODE" Switch

The natural mode produces rich, warm acoustic sounds with shimmering overtones perfect for fingerstyle playing. The shaped mode scoops the mids, producing an open sound with a tight bottom end for strumming styles.

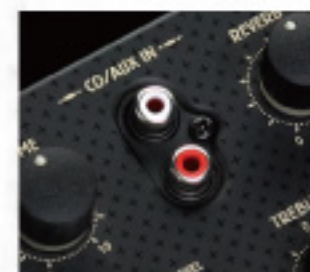

Chorus

All Troubadour Series Amplifiers feature chorus with soft natural mids and crystal clear highs.

Mic Input

The mic input features a totally independent mic preamp, so it won't be colored by any effects going through the guitar side. It also features independent tone and volume controls.

CD/AUX Input

The included aux input allows you to play along with a connected MP3 or CD player, great for bedroom jam sessions or rigorous woodshedding.

Jemini distortion

JEMINI - Steve Vai Signature Distortion Pedal

After developing so many guitars with Steve Vai, the long wait for this pedal has all been worth it. All aspects of the JEMINI are expressions of him, as are his axes. With the multi-colored die-cast casing, two identical distortions are built in for a variety of sonic occasions, and the unique large LEDs tell you they are in operation not only on a dark stage, but even under the daylight. Not just a new distortion pedal, the Ibanez JEMINI powers you and your axe up as it does Steve and his guitars.

LED Lit Controls

Each side includes drive, tone and level controls with LED indicators around each control and the LED brightness control switch for daytime use or saving the battery.

Steve Vai Signature Foot Pedals

Steve's trademark logo is imprinted on the Jemini's foot switches.

Heavy Duty Aluminum Housing

The housing is finished off with Steve's infamous trademark owl palm job.

TONE-LOK

EFFECTS PEDALS

On the inside, Tone-Lok pedals feature hi-fidelity components carefully tweaked with the constant input from a new generation of Ibanez players. And all this great stuff comes encased in cool looking, road tough metal boxes at prices the working player can afford.

On the outside, Tone-Lok effects are equipped with our exclusive "set and forget" Push-Lok rotary pots. Push the knobs down and your tone settings lock securely inside the case. No more lost settings or knobs broken.

AP7 Analog Phaser

The addition of the AP7 to the Tone-Lok series has brought with it the warm midrange sounds of a true Analog Phaser. The pedal features speed, depth, and feedback controls as well as a 3-way switchable phase circuit. When switched to 4-stage phasing, the pedal recreates the sounds of a vintage phaser. When switched to 2-stage phasing, the pedal produces more aggressive and deep phasing characteristic of modern pedals. This setting works best on more distorted lead sounds.

TC7 Tri-Mode Chorus

Are you bored with normal chorus pedals? If so, the new Ibanez TC7 will bring the thrill back. The TC7 can create three types of chorus with the combination of two individual chorus circuits. It truly expands your guitar's expressiveness.

SM7 Smash Box

The Smashbox is the most aggressive weapon in the Tone-Lok distortion arsenal. Armed with obscene amounts of gain, tight low end, and searing highs, the Smashbox is THE heavy rock sound for the contemporary guitarist. Special "VIB" noise gate and "EDGE" (sharp/smooth) controls let you handle anything from all-out shred to machine-gun metal riffs and rhythms.

SH7 7th Heaven

Designed specifically for 7-string guitars with the input from some of Ibanez's hottest 7-string players, the SH7 Seventh Heaven distortion pedal accentuates the low-end girth of the 7-string while reducing unwanted string noise. A special mode switch allows you to choose between two different distortion voicings: while Lo, Hi, Drive, and Level knobs give you total tone control. An absolute rock-haze effect for replicating the best 7-string sounds of others or creating your own individual tones.

DS7 Distortion

The most versatile Ibanez distortion pedal ever, capable of producing a wide range of smooth, dynamic overdrive tones, from a subtle tonal nudge to wailing rock'n'roll crunch, the DS7 delivers days of sustain and gobs of gain.

TS7 Tubescreamer

The Tubescreamer isn't just a stamper, it's an institution. Our latest generation Tubescreamer, the TS7, is no exception. With the Tubescreamer's classic subtle-but-smooth overdrive, the TS7 expands the expressiveness of your guitar while maintaining its tonal integrity. Tone adjustments are provided by the classic three knob configuration with an added "hot" switch for an extra gain boost.

FZ7 Fuzz

For out-kcomplete 60's feedback with none of the drawbacks, the FZ7 is the ultimate in psychedelic fuzz. With the FZ7's tone, drive, and level controls, it's never been easier to get the right retro tones. You can even engage the DAMAGE switch for that ratty, broken speaker sound. Yeah, baby, yeah! Dial in, tune up, drop down or whatever turns you on.

DE7 Delay/Echo

Add new dimensions to your sound with the DE7 Delay/Echo pedal. Get the best of both worlds: high tech digital sounds comparable to expensive rack units or warm vintage tape echo sounds—all with a simple flick of the switch. TIME, REPEAT and LEVEL controls help you dial in just the right amount of delay, while stereo outputs can be used for a more spacious sound. With a range of 30ms to 2.6 seconds, the DE7 is the only sound solution for every playing situation.

PH7 Phaser

Designed to emulate the effect of a rotating speaker, the PH7 has a switchable phase circuit capable of either four or eight stages of smooth phasing. With these two very different tonal modes, you can go from a subtle shimmer to all-out 70's "let's get Funky" phasing.

PM7 Phase Modulator

If you've gone through one phase after another, maybe it's time for the final phase. The PM7 Phase Modulator offers three types of waveforms to give you everything from classic phaser to EI effects to top say gun sounds. Since good things come in threes, the PM7 also has three phase stages: vintage, deep and dry, and deep and pronounced. With some minor tweaking, the PM7 goes from traditional to 21st century and beyond.

AW7 Autowah

There are autowahs. And there are autowahs. But the Tone-Lok AW7 isn't just any autowah. It's got standard wah where both the highs and lows are cut and it's got a wah setting where only the highs are cut. And it's got distortion. Band Pass Filter provides the sound of a standard wah pedal left at one setting (a favorite wah pedal technique of Joe Satriani). You can even change the chain order of the effects to get different tones: either distortion to wah or wah to distortion.

LF7 Lo Fi

The first dedicated filter pedal for the guitar, the LF7's voltage controlled analog high and low pass filters allow you to emulate transistor radio and reverb-type sounds. Best used at the end of a signal chain in combination with other pedals, this tidying new bomb creates wide soundscapes of far out tones that previously required a massive rack of analog electronics. The Lo Fi also performs equally well with rock, drum machines or in any "sea-dew" context.

PD7 Flat-Hed Bass Overdrive

Why let guitarists rule the stage? Loaded with growling low-end distortion, the PD7 levels the playing field for the rock bassist. The PD7 is armed with three pre-amp style voicings and an attack control switch, which accents the amount of harmonic content in your sound. With DRIVE, LO, HI, and LEVEL knobs, dialing in a thunderous bass sound has never been easier.

SB7 Synthesizer Bass

If you're looking for new tones or you're still squawking with resentment against synth bass keyboard players, the SB7 is the ticket. You've got real low freq—in other words no annoying tracking in error and delay. You can envelop chords.

TUBE KING DISTORTION

TK999HT Tube Distortion

When it comes to genuine tube distortion in a stomp box, the Tube King TK999HT rules. Featuring an actual 12AX7 tube, 3 band EQ/D tone controls along with Presence switch, the Tube King generates a wide variety of tones, including thick, singing distortion and outrageous heavy metal distortion. Also with its unique VXD function, it eliminates the noise and helps to create sharp rhythmic expression with heavy distortion. Housed in a unique shaped rigid die-cast case with visible tube through the transparent window, the Tube King will reign forever.

WD7 Weeping Demon

The most variable and controllable guitar wah you can get. The Weeping Demon's shrieks, cries, wails and seductive siren songs will have your audience screaming for more. The Weeping Demon features spring and normal footboard action, selectable wah range, fine tuning controls and more.

Mode Lever

Changes the mode so the effect can be turned on and off with the FOOTSWITCH or with the AUTO SWITCH (effect turns off when pedal is in the upright position). A1: AUTO SWITCH Mode A2: FOOTSWITCH Mode

Auto-Off Delay

In the AUTO SWITCH mode, you can set the effect-off either as a standard instant-off when the pedal is returned to the full up-right position or a delayed-off by turning the control clockwise.

Footswitch

Allows on-off switching of the effect independent of the footboard when the MODE LEVER is in the FOOTSWITCH mode.

TS808 & 9 series

When it comes to compact effects, nine is the magic number. There are sound reasons why, twenty-five years after they were first made, you still see these effects in players' rigs. If you missed out on getting one of these classics the first time around, it's time.

TS808 Tube Screamer

The TS808 reissue, described as "the Holy Grail of Tubescreamers", features the same famous standard square footswitch of the original and the even more famous warm tones of the JRC4558 chip used in most of the original TS808s. Ignore any over-the-counter look-alikes. If your tone is suffering from a lack of real warmth, the TS808 is the real, non-generic prescription.

TS9 Tube Screamer

The warmth of tube amps has been the goal for most of the over-drive pedals that exist. However, the Tube Screamer has been the choice 2nd to none by people searching for the best, because it lets the guitar sing so well in its original voice. The tone can be heard in playing by countless musicians over the years and still keeps fascinating new generations.

TS9DX Turbo Tube Screamer

"The Tube Screamer", TS9 had evolved on the same platform of TS9. The TS9DX offers three different settings for increased low end and crunch: +, Hot, and Turbo, all of which maintain the original TS9's total integrity.

FL9 Flanger

After more than a decade of digital, analog pedals made a quiet come back, because guitar players don't always equate fidelity with quality. Having said that, the Ibanez FL9 has eliminated the unnecessary clock noise and provides a wide range of flanging effects with the 4 practical knobs, including the delay time.

CS9 Stereo Chorus

Advances in technology sometimes declare gear obsolete in disregard of existing demand. The Ibanez CS9 features the sought out BBD IC to replicate the original chorus effect with the two simple controls. Stereo outputs enable creation of an indefinite sound space by using two amps.

AD9 Analog Delay

Analog delay was the hot topic in the music industry when it was first introduced. It changed the whole effort to obtain echo sound into just switching and turning knobs. And nowadays everyone has access to the effect, with much more exact repeat sounds due to digital technology. However, the warmth of analog delay has many adherents that will never be satisfied with its digital counterpart.

DC3&DC5 Splitter cords for powering 3 or 5 pedals from one adapter.

AC109 Standard 9-volt 200mA regulated adapter for Ibanez compact effects.

AC509 Standard 9-volt 500mA regulated adapter for Ibanez compact effects.

Tuners

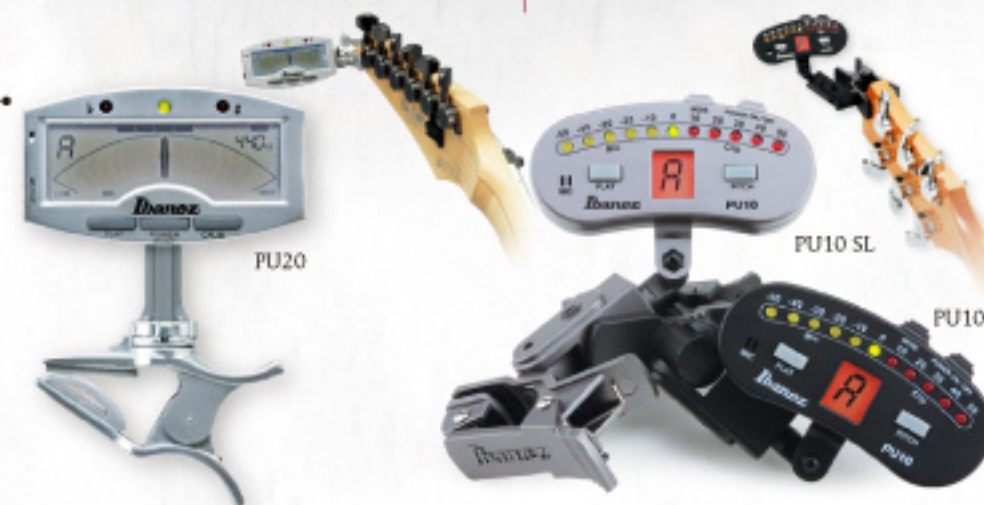

When you make 6-string, 7-string and 8-string guitars for players who use all kinds of alternate tunings, you'd better

be very serious about tuning. We are. Our wide variety compact tuners offer strict accuracy, easy operation and our famous Ibanez reliability.

Clip Tuner

Both Ibanez clip tuners, new PU20 and PU10, are designed to tune electric and acoustic guitars, basses, violins, banjos, mandolins, and more without interference from ambient room noise. It does it all without the use of mics, microphones or pickups. Tuning in noisy environments is a snap because the unique, flexible clamp actually feels the instrument's vibration instead of relying on sound. PU20 features backlit large LCD display for maximum visibility even in the dark stage. PU10 features the 4 hinges that allow a perfect view of the tuner's LED display from nearly any angle.

* Black and Silver colors are available in PU10.

RU10 Jam Tuner

There is no doubt that tuning is important. However it is just preparation, when your goal is to be playing guitar and having fun. With the Ibanez RU10, Jam Tuner, you can do both without firing up your amp. Besides functioning as a chromatic tuner, the RU10 combines a metronome and the Rhythm Play function that features preset rhythm patterns to play along with. The gain control enables you to produce an amazing, real deal distortion sound out of the built-in speaker, letting you jam right away.

LU20 Pedal Tuner

This tuner features a durable diecast housing and LED display with a three-color indicator for maximum visibility from the floor. It also features a true bypass on/off switch for the truest tone and a muting function.

LU10 Chromatic Tuner
Wide-size easy-to-read chromatic LED tones.

Picks

Ibanez offers picks for just about every type of player with different feels, functions and looks. Function wise, the Grip Wizard series feature sand or rubber grips for superior gripping ability. Look wise, Ibanez offers a selection of

original metallic colors and other unique colors and designs. And then there is the signature line of picks that are exactly what the artists use in most cases. In fact, Steve Vai won't use anything but his signature Ibanez picks.

Basic Color Series

Also, Ibanez covers the basic picks with orthodox shape color. You can choose from 6 kinds of shapes.

Ibanez Classic Design Series

Three of Ibanez' legendary icons are now featured on picks — "Tipping Finger," "Tree of Life" and a new design defined the "Ibanez trademark."

Grip Wizard Series Rubber Grip

Non-slip rubber softly fits your finger. Available on polycetal, or super hard PPS material picks.

Polycetal

Grip Wizard Series Sand Grip

Dense and wide surface sand provides hard and sure grip.
