Custom Built Doubles

EB-2

The EB-2 hollow-body electric bass provides an exciting "new look" with its thin body double cutaway design. The sensational Gibson Bass/Baritone Pushbutton gives the bass player the enormous range and versatility he's always wanted. It's a combination of dramatic good looks and driving, full tone for a sound that really sells a concert.

FEATURES: Curly Maple arched top, back, and rim with ivoroid binding. Slim, fast, low-action neck joins the body at the 18th fret. One-piece Honduras Mahogany neck equipped with Adjustable Truss Rod. Rosewood fingerboard with Pearl dot inlays. Combination bridge and tailpiece adjustable horizontally and vertically. Powerful Humbucking pickup with separate tone and volume controls. Bass/Baritone Pushbutton for two different tonal characteristics. 18" wide, 18" long, 1 1/2" thin; 30 1/2" scale, 20 frets.

339 Faultless plush-lined case

338 Archcraft plush-lined case

DOUBLE 12

The Double 12 combines the conventional six-string guitar and a twelve-string neck, thus enabling the player to tune either in thirds or an octave apart for reinforced resonance and unusual tonal effect. Has two slim, fast, low-action necks of one-piece Mahogany, Rosewood fingerboards, pearl inlays. Adjustable Tune-O-Matic bridges. Twin Humbucking pickups on each neck with separate volume and tone controls. Three position toggle switch. Selector switch to activate either neck. 11 1/2" wide, 20" long, 1 1/2" thin; 24 1/2" scale, 20 frets.

EDS-1275 - Sunburst, White or Jet Black finishes

1275 - Faultless plush-lined case

DOUBLE MANDOLIN

The Double Mandolin combines a six-string guitar with a six-string guitar neck tuned an octave high to give you a unique Mandolin effect and special musical character to command attention. Two slim, fast, low-action necks of one-piece Mahogany, Rosewood fingerboards and pearl inlays. Adjustable Tune-O-Matic bridge on guitar neck. Special combination, adjustable bridge on mandolin neck with Rosewood base and Chrome-plated saddle. Twin Humbucking pickups on the guitar neck and single Humbucking pickup on the Mandolin neck with separate tone and volume controls for each neck. Toggle switch to activate either or both pickups. Selector switch to activate either neck. 11 1/2" wide, 20" long, 1 1/2" thin; Guitar neck 24 1/2" scale, 20 frets; Mandolin neck 15 1/2" scale, 24 frets.

EMS-1235 - Sunburst, White or Jet Black finishes

1235 - Faultless plush-lined case

DOUBLE BASS

The Double Bass combines a Gibson SG Standard six-string guitar with a Gibson EB-3 electric bass to create a new and exciting instrument offering great versatility and range. Two slim, fast, low-action necks of one-piece Mahogany, Rosewood fingerboards, pearl inlays. Neck selector switch. Toggle switch activates either or both pickups. Volume and tone controls for each pickup. Bass has EB-3 type pickups and guitar neck has Twin Humbucking pickups. 16" wide, 17" long, 1 1/2" thin; Guitar neck 24 1/2" scale, 20 frets; Bass neck 30 1/2" scale, 20 frets.

EBS-1250 - Sunburst, White or Jet Black finishes

1250 - Faultless plush-lined case

These instruments, or your own choice of double neck combinations, are custom-built to your order.

Amplifiers

When a thoughtful musician plays, monotony cannot exist. One moment he is quietly coaxing light, charming tones from his instrument that seem to flutter delicately like an elusive butterfly. In the next phrase he may be striking the instrument abusively, demanding fiery chords and roaring, thundering progressions. Then, in an instant, he is stroking lush, delicious chords, tenderly squeezing each string for its full measure of production.

This is the sound of the artist. For such an incredibly wide range of sounds . . . towering highs, majestic lows, clear, glistening brilliance and subtle, moving harmonies . . . only the brilliantly versatile Gibson amplifiers will do.

Solid State

GSS-100

The new Gibson solid state super power all-transistor amplifier series lets your audience hear every note, everywhere. Every exciting tone—clearly, distinctly, radiantly.

The GSS-100, with its full power of 100 watts (more than 200 watts peak power), its three-unit sealed-case, cushion-of-air construction principle, and remarkable versatility, projects throughout any room or auditorium, regardless of size, shape or acoustics. The GSS-100 has the authority to enliven a vast outdoor audience, yet precision control for subtle, sophisticated jazz sound in an intimate room.

The Gibson GSS-50 is the 50 watt version of the GSS-100; its full power (more than 100 watts peak power) projects throughout any auditorium or concert hall, yet its single case, solid state electronic construction gives maximum portability without sacrifice of volume and tonal range.

The Gibson Plus 50 is unique in sound systems. Its solid state construction provides a full 50 watts (more than 100 watts peak power) in a lightweight, self-contained add-on or extension amplifier. Plug the Plus 50 A/C power cord into the A/C convenience outlet of your regular amplifier. The output of your amplifier plugs into the input of the Plus 50. Then add any number of Plus 50 amplifiers, in series. Each Plus 50 has a single volume control. Tone and special effects are controlled by the master amplifier. Add one, two, three, four or more Plus 50 amplifiers and add 50 watts of power with each addition.

This new series of Gibson solid state, all-transistor amplifiers is sleekly, the world's finest. They are musical instrument amplifiers that represent the new concept in sound projection. Amplifiers you'll be satisfied with for a lifetime of steady, rugged use.

Power Plus

TITAN

MERCURY

Gibson Power-Plus and Medalist amplifiers are products of advanced engineering and creative electronic research. These amplifiers feature professional, high power functions such as push-pull power tubes as standard equipment. The Power-Plus amplifiers allow you to lock the control chassis to the tone chamber, or operate the chassis away from the tone chamber with equal effectiveness. Medalist amplifiers feature similar electronic construction, with the Titan Medalist featuring a 15 inch bass-reflex speaker capable of reaching down to 40 cycles and a cross-over network to the high frequency 10 inch speaker. The result of such inspired electronic engineering is full power amplification in a single amplifier that can easily handle both guitar and bass. Special snap-on wheels provide maximum maneuverability. Tone chamber case design, including ported case construction, provides speaker angles and cabinet dimensions to smooth out resonances and project full, rich sound. Tilt-back easel provides added sound dispersion. Gibson Power-Plus and Medalist amplifiers are magnificent instruments for the accomplished performer.

Reverb Echo

VANGUARD

GA-4RE Reverb-Echo Unit

The Reverb-Echo GA-4RE, a small, compact and lightweight accessory that produces a complete reverberation effect and authentic echo in a single unit. You simply plug-in the GA-4RE and with Gibson's own "electronic memory" system you have echo and reverb coming from your own amplifier. Very compact in attractively designed cabinet with luggage type handle for easy portability.

APOLLO

Gibson amplifiers provide power, range and depth never before possible in musical instrument amplification. Gibson quality and dependability is clearly evident throughout the broad spectrum of these amplifiers. A new world of sound is possible with extraordinary performance for every type of amplified instrument.

Exclusive Gibson Spectrum Tone Controls allow precise settings, perfect control of treble, mid-range and bass. Each function entirely independent of the other. Set treble or bass without disturbing mid-range balance. Increase highs or lows, independently of each other.

Multiple speaker combinations with special input crossover networks, single speaker construction for smaller rooms or special uses, tone chamber design with ported case construction all provide optimum performance from every amplifier.

Every sound imaginable is possible with a Gibson amplifier. Exact, precision controls and power to spare assure musical instrument amplification to please the most discriminating professional.

By any comparison, Gibson offers the greatest range, maximum power and unlimited versatility. We invite you to see, hear and play a Gibson amplifier. Whatever the need, there's a Gibson amplifier with just the right shape, the right appearance and the exact power to do the job, perfectly.

Reverb Tremolo

LANCER

MINUTEMAN

EXPLORER

GA-3RV Reverb Unit

The GA-3RV Reverberation unit is a self-contained reverb accessory operating on the same spring principle as the regular line of Gibson reverb amplifiers. Plug it into any amplifier to produce amazing reverberation effects. Very compact in attractively designed cabinet with luggage type handle for easy portability.

Gibson amplifiers cover the wide spectrum from full power, high performance amplifiers for professional work, throughout the entire range to lower priced, lower powered amplifiers and accessories for specific uses, for smaller rooms and for home practice.

Throughout the construction of every Gibson amplifier, regardless of price or purpose, Gibson technicians apply the same careful construction techniques and engineering principles that make every Gibson amplifier the finest of its kind. Gibson amplifiers feature push-pull power tubes for maximum efficiency, tone chamber case construction for top acoustic performance.

All controls are precision engineered for accurate pin point settings. Speakers are of the highest quality, selected for tonal range and dependability and design-engineered for best performance with each type of amplifier.

As it is with every product that bears the name Gibson, quality is built in. Which is why Gibson amplifiers continue to be the choice of professional artists.

Flat Tops

*When the guitarist reaches the stage in his
development where his ability requires that he
play the very finest instrument available, he
selects Gibson.*

*Once you have felt the excitement of this
beautifully responsive instrument, heard its rich
tone and seen its exquisite, graceful design, you
will know the affection that artists feel for their
Gibson guitars—an affection that transcends
time, style and musical trends.*

Jumbo Flat Top

J-200

Called "King of the Flat Top Guitars" for its dramatic beauty, beaming resonance, and penetrating carrying power. Built with an extra large tone chamber and many exclusive design features. Beautiful appearance, flawless workmanship, outstanding performance.

FEATURES: Now has adjustable bridge with new inlay and gold Tune-O-Matic bridge saddle. Finest close-grained Spruce top with highly figured Curly Maple back and rim. Decorative black-and-white ivoroid binding, multiple inlaid purfling rings, and etched brown celluloid fingerrest. Slim, fast, low-action neck—laminated Curly Maple with adjustable Truss Rod. Bound Rosewood fingerboard with large pearl inlays. Pearl-inlaid Rosewood bridge. Gold-plated enclosed individual machine heads with metal tuning buttons. 17" wide, 21" long, 4 $\frac{1}{2}$ " deep; 25 $\frac{1}{2}$ " scale, 20 frets.

EVERLY BROTHERS

An unusual concept in jumbo flat top guitars, designed and developed in close cooperation with the Everly Brothers. A new principle in bridge design combined with the finest in materials and workmanship has resulted in an instrument that is unique in every way. It offers a powerful resonant low end and wonderful sustaining qualities.

FEATURES: Selected two-piece Spruce top. Maple back and rim. Attractive ivoroid binding. Slim, fast, flat-action Mahogany neck with adjustable Truss Rod. Bound Rosewood fingerboard with attractive star inlays. Special, newly engineered Rosewood bridge without pins that develops double action in the Spruce top, creating greater sustaining qualities. Chrome-plated individual machine heads. Large treble and bass side shell pickup. 16 $\frac{1}{2}$ " wide, 20 $\frac{1}{2}$ " long, 4 $\frac{1}{2}$ " deep; 24 $\frac{1}{2}$ " scale, 20 frets.

HUMMINGBIRD

A fabulous acoustic guitar—one of the finest ever made for voice accompaniment. The sound is big, and round, and full, with the deep rumbling bass so prized by guitar players. There's plenty of showmanship for the player in its wonderful, resonant tone and carrying power, and in its striking beauty too. The finish is Gibson's incomparable cherry-sunburst color, complemented by an exquisite pickguard, depicting hummingbirds in flight.

FEATURES: Fine grained Spruce top with Honduras Mahogany back and rim, and beautiful Hummingbird pickguard. New extra slim neck for fast, low-action with adjustable Truss Rod. Bound Rosewood fingerboard with large parallel pearl inlays. Special adjustable Rosewood bridge. Gold-plated enclosed individual machine heads. 16 $\frac{1}{2}$ " wide, 20 $\frac{1}{2}$ " long, 4 $\frac{1}{2}$ " deep; 25 $\frac{1}{2}$ " scale, 20 frets.

CENTURY 6

The graceful design of the Gibson Century-6 steel guitar makes it easy to hold and easy to play. Powerful Humbucking pickup provides exciting tone, and the special Century peghead and unique clef position markers provide a truly beautiful musical instrument.

FEATURES: Contoured solid body construction in cherry red finish. Six string versatility with powerful Humbucking pickup; Separate volume and tone controls provide a wide range of dynamics. Combination Chrome-plated hand rest and bridge cover.

No. 1 Century 6 Faultless plush-lined case

SKYLARK

The sensational performance and attractive appearance of this latest Gibson offers the finest in quality and tone at an extremely low price.

FEATURES: Solid body construction, high quality natural Korina finish. New powerful pickup unit; specially designed peghead, nut, and bridge produce a clear, powerful, resonant tone with unusual sustaining qualities and extra reserve volume. Special design and numbering of 29 fret fingerboard is most helpful in locating any position. Separate tone and volume controls for simplified "fingertip action." Attractive Chrome-plated metal parts.

No. 2 Skylark Faultless plush-lined case

ELECTRAHARPS

Gibson Electraharps are the ultimate in steel guitar development, offering an infinite range of voicings and tunings, exciting tonal brilliance and clarity. In styles and price ranges from the student EH-610 through the special six pedal EH-620 and the four pedal EH-630, the Gibson Electraharps are of lightweight construction and beautiful, durable finishes.

EH-610 Six string neck, fast, fingertip action. Easy positive pedal action. Powerful Humbucking pickup. Conveniently located tone and volume controls. Four detachable legs, 9" wide, 37 $\frac{1}{2}$ " long, 2" thin; 22 $\frac{1}{2}$ " scale, 36 frets. Lined Oak finish. (Illustrated)

15 Faultless plush-lined case

EH-620 Eight string neck, fast, fingertip action. Six pedals; seven related chord patterns. Feather touch pedal action. Adjustable stops to lower or raise any string 1 $\frac{1}{2}$ tones. Eight individual string rollers at both nut and bridge. Powerful Humbucking pickups with separate tone and volume controls. Reversible controls for instant tone change from bass to treble or treble to bass. Audio cut-off switch for added tonal effects. Four detachable legs, 9 $\frac{1}{2}$ " wide, 36 $\frac{1}{2}$ " long, 4" deep; 22 $\frac{1}{2}$ " scale, 36 frets. Curly Maple finish.

EH-630 Like the EH-620 except with four pedals and five separate chord settings.

19 Faultless plush-lined case

1. Exclusive Gibson Spectrum Controls allow complete control and perfect division of treble, mid-range and bass tones. Increase highs as necessary without borrowing or disturbing bass tone settings. Control bass tones independently of high tones. Mid-Range boosts just the right proportion of each extreme for an exact "middle" tone.

2. Wonder-thin and light, Gibson thin-body and solid-body electric guitars fit close and comfortably against the body, giving easy access to the entire fret range. The slender neck with low-action frets is extremely fast and easy to finger. Strings seem feather light. The feel is just right! Famous Gibson firsts—the electric guitar and the wonder-thin silhouette—are combined in these fine instruments.

3. Gibson Humbucking pickup is a new approach to tone generation from string vibration. This high impedance pickup is sensitive to the smallest string vibration but rejects interference in the form of hum, static, or radiated noise. Two methods are provided to set the pickup: 1) adjusting screws set pickup; 2) adjusting individual pole-pieces set each string.

4. Gibson Tune-O-Matic bridge makes it possible to tune your guitar to perfect accuracy on each individual string, at the bridge. It permits precise adjustment for intonation and each saddle can be reversed individually, for full range tuning. Easily adjusted for fast, low-action.

5. Gibson wonder-straight neck—with adjustable Truss Rod, first developed by Gibson. Positively keeps the neck from twisting or warping because of climatical change or string tension, keeps tuning exact in the upper register. Neck can be adjusted perfectly in minutes. This is the famous slim, fast, low-action Gibson neck.

6. Many Gibson guitars come factory equipped with Gibson Vibrola. Vibrola is optional equipment on other instruments. Every Gibson Vibrola is quality designed of the finest materials available and finished in either Chrome or Gold-plating to match the style of the instrument on which it is custom fitted. The exciting vibrato effect, in popular, jazz and country music is made even more exciting, more precise and is more easily attained with the standard or deluxe Gibson Vibrola.
