SPECIAL

The EVH<sup>™</sup> Wolfgang<sup>®</sup> Special is the result of an ongoing collaboration between Peavey and Edward Van Halen. This is the latest addition to the signature model line of guitars that bears the legendary guitarist's name. Many of the critical features of the EVH<sup>™</sup> Wolfgang<sup>®</sup> have been incorporated into this exciting and affordable new instrument.

The offset, double cutaway body has evolved into a straightforward, flat-top design. It is made of solid basswood, which offers lightweight and resonant tonal characteristics. In keeping with the straightforward approach, a single volume knob controls the output of the two Peavey EVH humbucking pickups along with a 3-way pickup selector switch.

The oil-finished neck is made of hardrock maple and features the

distinctive EVH asymmetrical neck shape contour. The peghead retains the EVH Wolfgang appearance in a straight peghead design. Strength and rigidity are ensured by the double expanding torsion rod and dual graphite reinforcements.

This new design provides the classic EVH Wolfgang look, feel, balance, playability, and most importantly tone—all in a more affordable package.
